WHAT WE DO.

With over 30 years of experience on projects of all sizes, we know that your personalised people mover will be the backbone of your attraction.

We tailor our vehicles to your specific requirements. Whether you want a simple design to fit your branding, or a fully themed vehicle to compliment the launch of a new attraction. The team at TDI-PS will support you throughout the entire process, from initial design to delivery, to ongoing maintenance support.

**IF YOU CAN IMAGINE IT,
WE CAN CREATE IT.**

DESIGN & RENDERING

INFOTAINMENT

VINYL WRAPPING & CUSTOM PAINTWORK

BESPOKE CUSTOMISATION

DESIGN & RENDERING.

Our dedicated design team are specialists in vehicle visualisation and rendering. The process of realising your concept is simple. Firstly, we book a meeting with you to gain insight of your specific requirements. This will then be relayed to the design team, who will create a catalogue of renders for you to narrow down and finalise the concept you would like to move forward with. This could be designed based on your brand or themed in a way that represents your park, values or even a new ride.

Perhaps you want your electric people mover to look like a rocket or designed to fit into one of your natural landscapes? We pride ourselves on finding a way to do anything and everything.

T-LINER Trailer Body render

VINYL WRAPPING & CUSTOM PAINTWORK.

We always support local businesses and the products we use are carefully selected for their quality and longevity. The vinyl wrap and paint are specifically chosen for their durability and to protect the paintwork of your people mover.

We offer a wide range of colours and combinations, whatever your aesthetics we can help make it a reality. The possibilities are endless. We can even tell a story with your people mover by depicting a series of different images on each carriage.

INFOTAINMENT.

The story doesn't end at the bodywork of your people mover. You can captivate your guests with our customised infotainment systems. We install all the audio and visual effects that you want to include. Be that individual passenger screen, or specialist window monitors that can create your own journey through space, time or environment. We can even add visuals in the roof of the carriages to create different dimensional effects for your passengers.

Our carriages are fitted with 4 speakers as standard; however, we can also re-arrange the seating plan to facilitate not just more passengers but more infotainment. All of our power units come with digital displays, radio/MP3, and USB charging ports in the drivers' cabs. LED lighting throughout the train is easily customizable with a range of colour and style options available.

BESPOKE CUSTOMISATION.

We adapt your people movers to suit your attraction. They are built to your specifications and are designed to combat any operational requirements, whilst creating a comfortable and enjoyable experience for your guests.

Whether you need extra space to accommodate more disabled bays, lower curb heights, wider carriages or even snow tyres. TDI PS can help. No matter the climate, terrain, or size of your attraction we provide the best people mover for you.
