

Austin Surf Park - DEL VALLE, Texas

AUSTIN SURF PARK

North America's first true surf park, featuring the latest WaveGarden technology, opened in October 2016 in Austin, Texas. Surfers from all skill levels are now enjoying NLand Surf Park's open-face, 35-second ride, unique in all the world!

CLOWARD H₂O is pleased to have had the opportunity to work in close collaboration with NLand and the WaveGarden team over the last several years to develop this destination surfing venue for surfers and wave sport enthusiasts.

With a total water surface area equivalent to over 12 football fields and a capacity of over 12 million gallons of fresh water, the wave lagoon's sheer size presented unique challenges to the **CLOWARD H₂O** engineers. The end result is a uniquely designed, self-contained system that captures, stores, and re-uses water from within the park boundaries and utilizes a combination of bio and media filtration systems, ozone sanitation, flocculation, residual chlorine, and pH balancing for water treatment.
