The lagoon covers an area of 102,000 square feet (2.34 acres or 9500 square meters) and has a volume of just over 4 Million gallons (15150 cubic meters).

CLOWARD H₂O
WATER PERFECTED

An aerial photograph of a large, multi-level resort pool complex. The pool is a vibrant blue and is divided into several sections by a central wooden walkway. There are approximately 12 buildings with brown, gabled roofs situated around the pool. The surrounding area is landscaped with palm trees, lounge chairs, and umbrellas. The overall scene is bright and sunny.

Providing designs and construction support for over 3.25 acres of land, as well as 5.2 million gallons of water. Maintenance for such large bodies of water is minimal due to a combination of ozone and chlorine for disinfection.
