

Leisure Equipment &  
Asset Protection Scheme

**LEAPS is the Leisure Equipment and Asset Protection Scheme — an equipment management system based on HSE guidance and best practice. From the outset, it has been designed to help you put public safety front and centre of your operation.**

Competent  
Operator

Safe  
Asset

Competent  
Inspector

### What is LEAPS?

LEAPS is the only leisure safety scheme to offer assurance to the public that the three main causes of accidents are managed within your operation; Competent Operator, Safe Asset, Competent Inspector. These are known as the three LEAPS stars and to be a LEAPS Certified Site, all three of these stars need to align. The scheme has been written with the principles of the System of Safety for Attractions as published by the Health and Safety Executive.

### Why LEAPS?

LEAPS is approved for its members use by the British Association of Leisure Parks, Piers and Attractions (BALPPA) on an equal footing to the ADIPS scheme, but LEAPS is a more agile system that will allow for a very broad range of leisure equipment including soft play areas, outdoor adventure courses, roller coasters and much, much more. Regardless of the different types of equipment you require inspection for, you are safe in the knowledge that the LEAPS standard has been reached and will be maintained by competent inspectors, assuring compliance with your legal duty to ensure a competent person has inspected your equipment.

Whatever type of fixed leisure asset you operate: high/low rope course; trampoline park; farm attraction; theme park; aqua park or something else, you can show you put safety first for your guests.

### How do I join LEAPS?

To join the growing number of LEAPS certified safe sites you will have to self-certify your agreement to follow the principles in the Scheme Operating Procedure relevant to your industry, manage your equipment in line with the SOPs, and have it independently inspected by a LEAPS certified inspector annually. Once you have become certified your name will appear in our easily searchable public directory of operators giving them reassurance that you are operating to the highest standards.
