

MONTGOMERY
WHITEWATER CENTER
MONTGOMERY, ALABAMA

CLOWARD H₂O
WATER PERFECTED

Montgomery Whitewater is one of the few recirculating whitewater parks in the country, featuring two separate river channels providing an Olympic standard course and a dynamic recreation channel, bringing whitewater rafting to an accessible location.

The channels can be easily adjusted in order to provide varying types of rapids and levels, catering to everyone from beginners to seasoned experts. The facility is available for camps and team-building events, as well as swift water rescue training facility for first responders.

CLOWARD H₂O
WATER PERFECTED

When operating Montgomery circulates 12,000,000 gallons of very active water. Opening the summer of 2023, the facility is set to enhance economic development and boost tourism in the region allowing for visitors to experience whitewater rapids without traveling to remote places.
