Widely regarded as the key attraction in any amusement or theme park, many types of roller coasters have been developed by **INTAMIN** to provide thrills and excitement for all ages. This product line is and will continue to be refined by **INTAMIN** on a mission to always set new limits.

Some of the worldwide achievements reached so far are:

- Highest and Fastest Roller Coaster
- Fastest Multi Launch Coaster
- Fastest Catapult Drive (LSM)
- Longest Launch Coaster
- Highest Inversion
- Strongest LSM Launch
- Highest Number of Track Intersections (116 times)
- 48 World Records
- 47 Global Awards

LSM LAUNCH COASTER

Explosive accelerations, steady cruising speeds, ground breaking maneuvers and near miss elements for a perfect thrilling experience granted by the strongest LSM drive system on the market. Available in a single or multi launch, swing and/or dueling configuration.

REVERSE FREE FALL COASTER

Unique weightless free fall journey, with forward-backward seating.

SURF RIDER

Acceleration, spinning and weightlessness at different heights.

IMPULSE COASTER

Suspended coaster with vertical free falls, multiple launches and twists.

VERTICAL LIFT COASTER

Exciting configurations paired with a unique vertical lift system (LSM or chain).

ATV

JET SKI

FAMILY LAUNCH COASTER

Friction wheel-driven launches for a genuine first acceleration followed by one or more booster sections. Close to the ground track to enhance the feeling of speed for a true family attraction.

GIGA COASTER

Record-breaking heights with blistering speed, airtime and fast transitions.

MEGA COASTER

Going big in height, speed, airtime and g-forces. Available with inversions.

ULTRA COASTER

Medium-size coaster packed with airtime - every coaster enthusiast's dream.

SUSPENDED COASTER

Dangling feet at high speeds, fast inversions and even LSM launches.

SUSPENDED FAMILY COASTER

Family-friendly with almost all features of the thrill version. Available with launch.

ZAC SPIN COASTER

Intense flipping, eye-catching, space-saving ride, with launch option.

WING COASTER

Passengers on the outer seats with feet in the air, experiencing airtime and speed.

MULTI INVERSION COASTER

Dynamic ride providing multiple inversions, utilizing most comfortable train.

INDOOR COASTER

Exciting, fast-paced indoor coaster suitable for the entire family.

FAMILY COASTER

Next-generation family coaster resulting in a fun experience.

MINE TRAIN COASTER

The classic coaster that will never go out of style.

MULTI DIMENSION COASTER

Coaster with different, most unique track elements and special features.

HOT RACER

New single-rail track in combination with single row seated racing trains.

SPINNING COASTER

Every ride providing a different spin on single cars, back to back or face to face.

FAMILY SPINNING COASTER

Spinning experience on a train, with rotating vehicles and launch possibility.

WOODEN COASTER

Unique wooden track design for speeds and elements others can hardly achieve.

AQUA TRAX COASTER

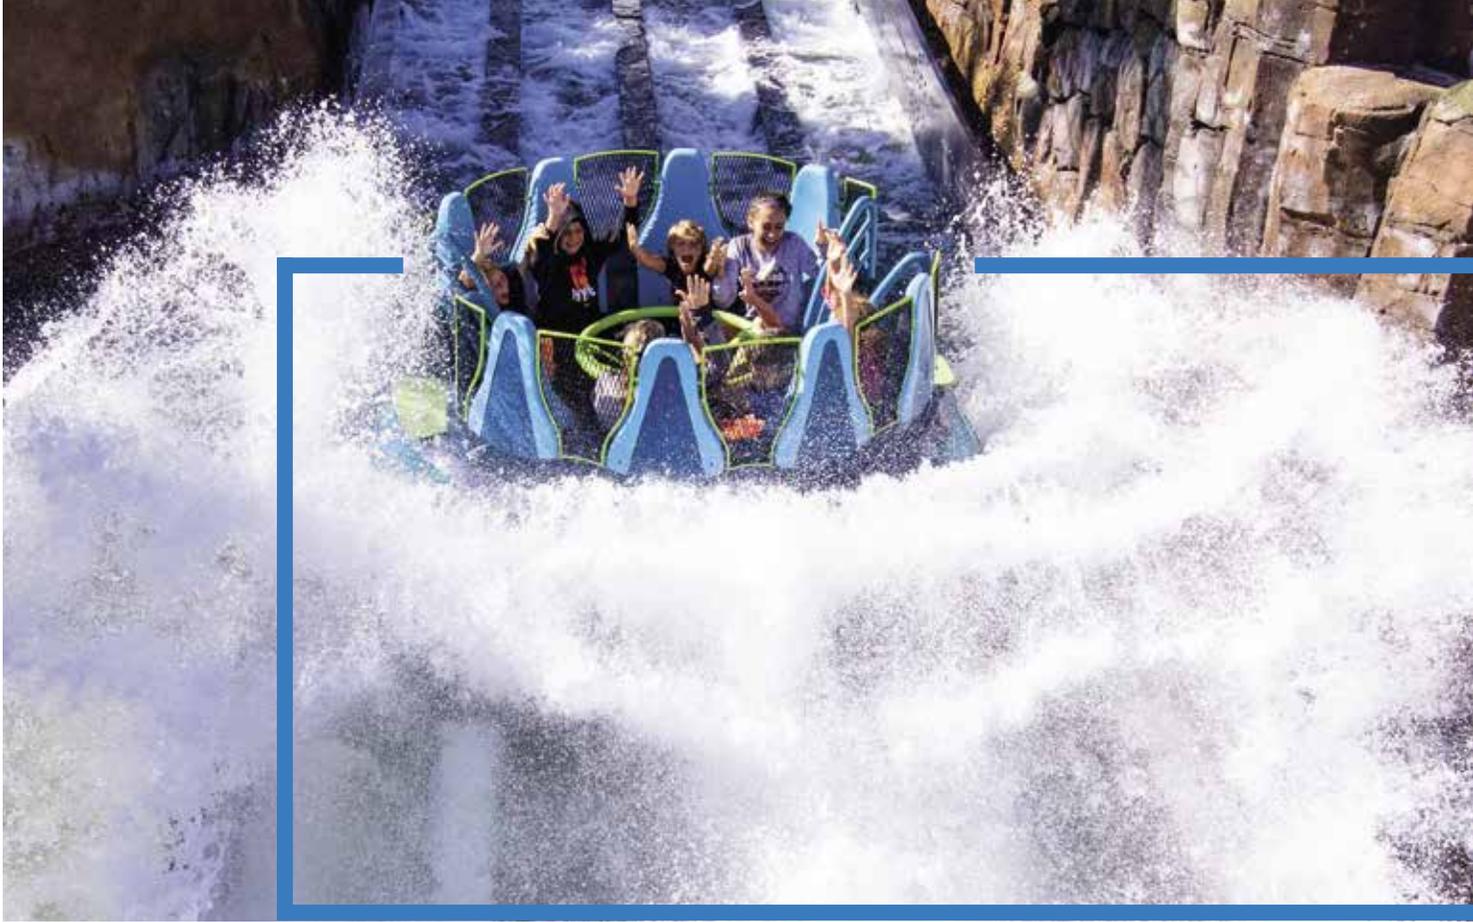

LSM technology combined with water features for a launch coaster experience.

WATER COASTER

A coaster and a water ride in one, featuring height, speed and splashes.

WATER RIDES

As the inventor of the Rapids Ride water ride with the vast experience on all different kinds of water rides and inspired by different roller coaster technologies, **INTAMIN** is able to offer exceptional water ride experiences ranging from a lazy river to the most thrilling elements, such as wild rapids, boat chutes, turntables, whirlpools, vertical lifts and backward runs. **INTAMIN** is at the forefront of the most advanced technologies and always researching the next level of excitement.

Based on its intensive experience, **INTAMIN** has developed its own computer model software for water hydraulic simulations recreating layout profiles and inputs. Applying this technology will result in the design of optimized attractions for ensuring highest customer satisfaction.

FLUME RIDE 4

FLUME RIDE 6

FLUME RIDE 8

REVERSE FLUME RIDE

FLUME RIDE

With a completely flexible layout configuration, **INTAMIN** can create a unique ride experience using any combination of down chutes, special effects and theming for a true family attraction.

WATER COASTER

A coaster and a water ride in one, featuring height, speed and splashes.

HYPER SPLASH

Bow-shaped tandem vertical lift providing an extra thrill before getting soaked and creating an amazing wave.

RAPIDS RIDE 8

RAPIDS RIDE 9

RAPIDS RIDE 12

RAPIDS RIDE VERTICAL LIFT

RAPIDS RIDE

Invented by **INTAMIN** in 1979, the Rapids Ride is a must-have ride for any amusement park. This ride never delivers the same ride twice, and it is fun for all ages. Even more thrills can be added, such as a vertical lift or a down-chute splash with more unique features to come.

MEGA SPLASH

Impressive heights, speed and huge waves for getting riders and spectators sprayed by a water blast.

ULTRA SPLASH

LSM-powered water ride with an aesthetic structure combining acceleration and speed, forward and backward, with a splash.

SPILLWATER 12

SPILLWATER 20 INCLINED LIFT

SPILLWATER VERTICAL LIFT

SPILLWATER

This high capacity attraction can feature any number of down chutes and special effects which make this ride a hit among all ages. Available with inclined or vertical lift.

GIGA SPLASH

The water ride icon equipped with rotating lift, featuring record-breaking drops and massive waves.

SLOW- TOW BOAT RIDE

The boat ride provides the impression of floating free while being guided by submerged booster pumps or an underwater cable.

OBSERVATION & VERTICAL RIDES

From an iconic giant wheel to the most thrilling and tallest drop tower, **INTAMIN** can offer the most extensive variety of vertical rides and observation attractions on the market along with some of the most interesting applications on buildings and raising structures.

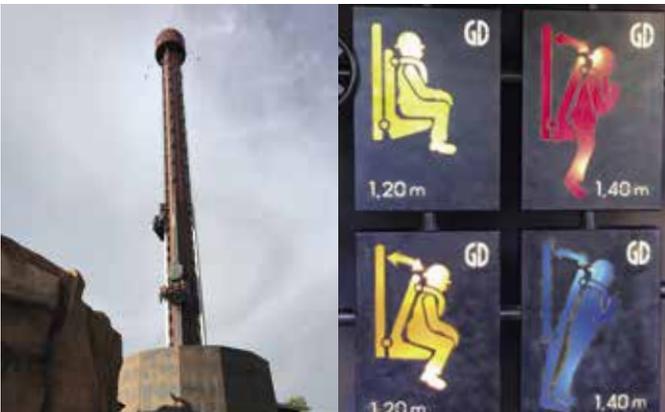

SKY JUMP 16

SKY JUMP 32

SKY JUMP

Riders experience the exact same feeling of skydivers, with their head facing down to the ground before finally getting back in vertical position when they open their parachute for a soft landing.

MULTI & GIANT DROP 4

Four different ride alternatives in one structure! Sit down, sit & tilt, floorless & tilt and stand up & tilt.

GIANT DROP 8

Eight passengers share an amazing view as they wait for a breathtaking weightless surprise.

GIANT DROP ON BUILDING

Placed on the side of a tower or integrated into a new building, these installations will provide a whole new level of thrill.

PARACHUTE TOWER

The high-speed up and down movements can satisfy the smallest thrill seekers or adults wanting to have fun with their kids.

RING DROP 20

RING DROP 36

RING DROP 65

RING DROP

This ride combines the pleasant feeling of a panoramic tower with the white-knuckle experience of a free fall, an unusual and exciting mixture.

GYRO DROP 30

GYRO DROP 40

GYRO DROP

The seating ring structure rises and rotates slowly around the tower to give passengers a good all-around view of the surroundings before experiencing a breathtaking free fall.

SUPER GYRO TOWER

Offering different heights and capacities, the Super Gyro Tower cabin gently raises and lowers while rotating to deliver a magnificent view. The walkable cabin is available with one or two levels in a seating and stand up configuration.

GIANT WHEEL 120 / 8

GIANT WHEEL 120 / 15

GIANT WHEEL

Available from 80 to 165 meters of height with cabins of 8 or 15 passengers, guests are provided with an unforgettable experience in a comfortable and climate-controlled setting.

COASTER WHEEL 35

COASTER WHEEL 45

COASTER WHEEL

This unique wheel design combines panoramic views with exciting movements created by cabins travelling along an elliptic track with sudden acceleration and swings.

GIANT WHEEL ON BUILDING

This attraction can be installed at the top or integrated into the facade of a building delivering a new architectural concept.

FLYING ISLAND

Passengers are lifted into the sky being offered astonishing views, in a rotating open-air or climate-controlled cabin on a pivoting arm.

ROUND RIDES & IMMERSIVE RIDES

State-of-the-art technologies are used to guarantee the most impressive performance on **INTAMIN** rides for thrill seekers in any amusement or theme park. Fully-immersive rides are also developed considering the most current projection systems including 3D format and augmented reality experiences.

TOURBILLON

Giant thrilling gyroscope spinning and flipping around all axes.

GYRO SWING

Weightless sensation and high g-forces mix on a swing and spin rush.

BOUNTY

The classic swinging ship with the perfect dimensions and movements.

SUSPENDED TWIN HAMMER

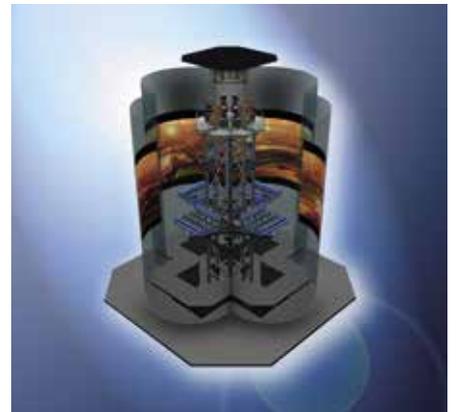

Forward-backward fast looping experience with dangling feet.

DOME RIDE THEATER

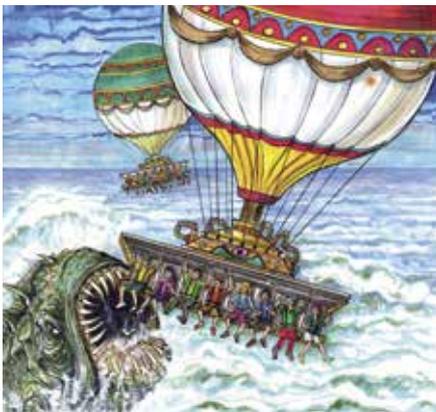

Immersive 360° journey for 80 passengers with rotating and tilting movements.

ULTRA TOWER

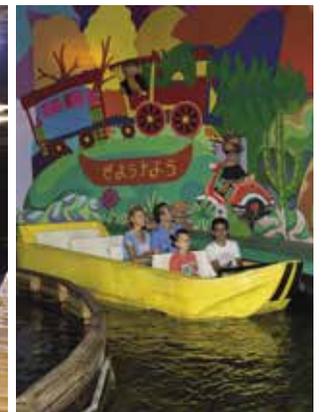

Media-based motion simulator combined with the thrills of a drop tower.

360 FLY ADVENTURE

Unique movements and special effects for a matchless immersive ride.

DARK RIDE SYSTEM

Specialized multi-motion cars combined with simulator technologies for action journeys, suspended vehicles for flight-settings and boats for water-based environments.

MONORAIL SYSTEMS

The monorail is not only a modern and comfortable means of transport, but also an advanced transportation system which can easily cope with high passenger volumes. **INTAMIN**'s monorail systems feature elegantly-designed trains and unique stations which serve to enhance the attractiveness and beauty of resorts, tourist environments and cities. From an elevated level, the passengers are able to enjoy a great view of their surroundings.

- High transport volumes
- High average speed, superior to road transport of tramways
- Fully automatic, driverless operation
- Low investment costs compared to other means of transport
- Trains run silently on the track

MONORAIL P6

A unique sight-seeing experience for exhibitions or large tourist events. A perfect solution for sightseeing in parks and tourist environments.

MONORAIL P8

An affordable transport system for the medium and light transport capacity segment. Elegant trains provide passenger transport at an enhanced comfort level.

MONORAIL P30

The P30 Monorail is designed for modern and efficient public transportation. It provides a fast service with high passenger volumes, capable to link city spots, resort venues or even airport terminals.
