^d FARMER ATTRACTION *development*

Hunderfossen - Where Fairy Tales become real!

Hele Norges
Eventyrpark

- Unique Norwegian troll and fairy tale Theme Park
- 60 attractions and activities for fun and learning through play.
- For families with children 1-13 years.
- Annual attendance approx 300,000.
- USD 11 million annual turnover.
- USD 100 million invested in the park.
- The most indoor attractions in all of Norway.
- 500 main-season employees.

Hunderfossen
EVENTYRPARK

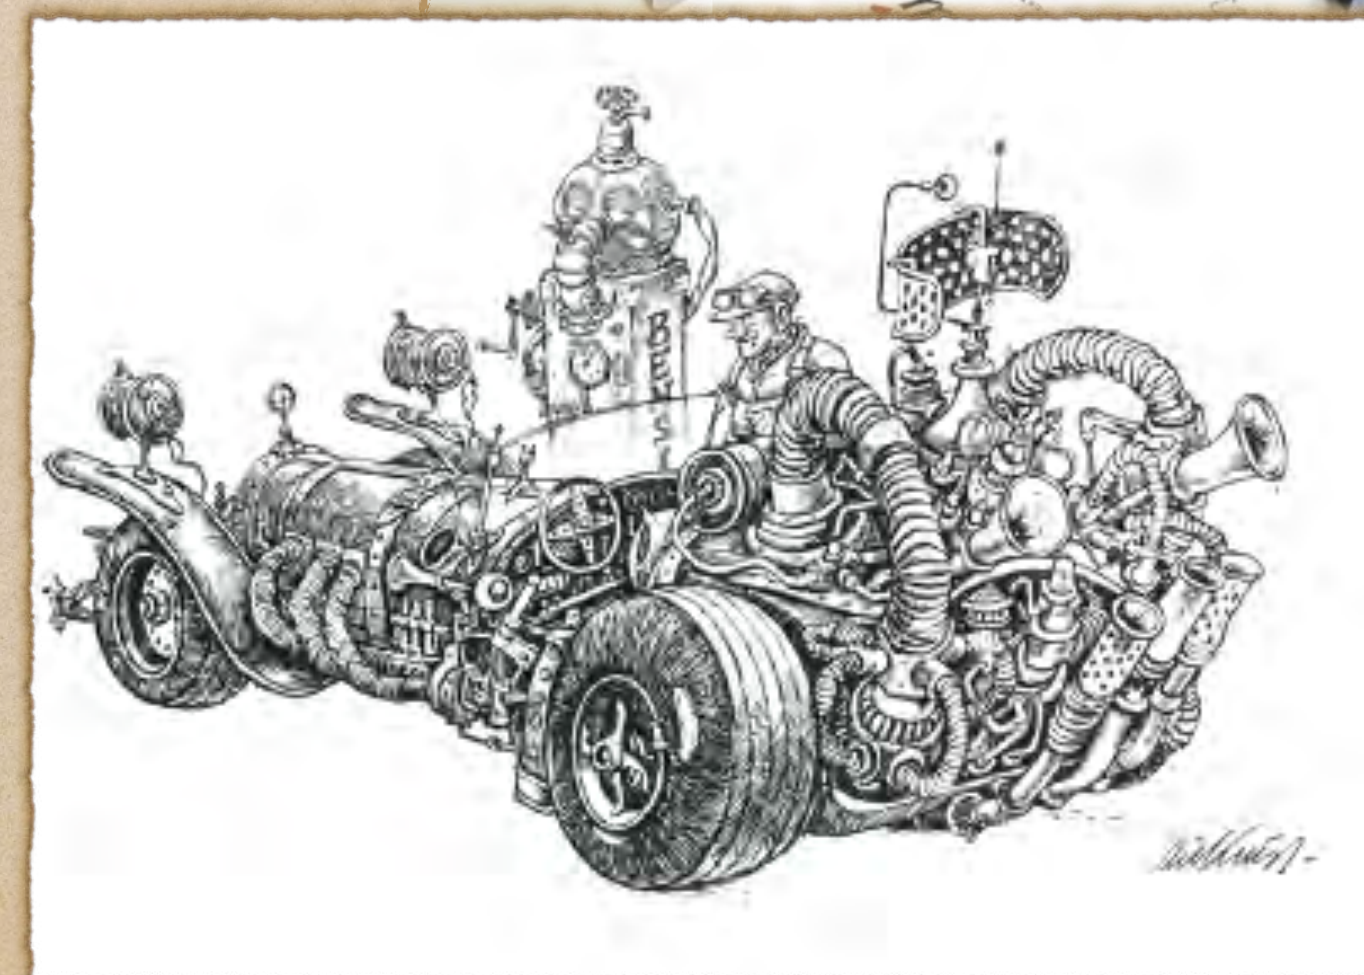

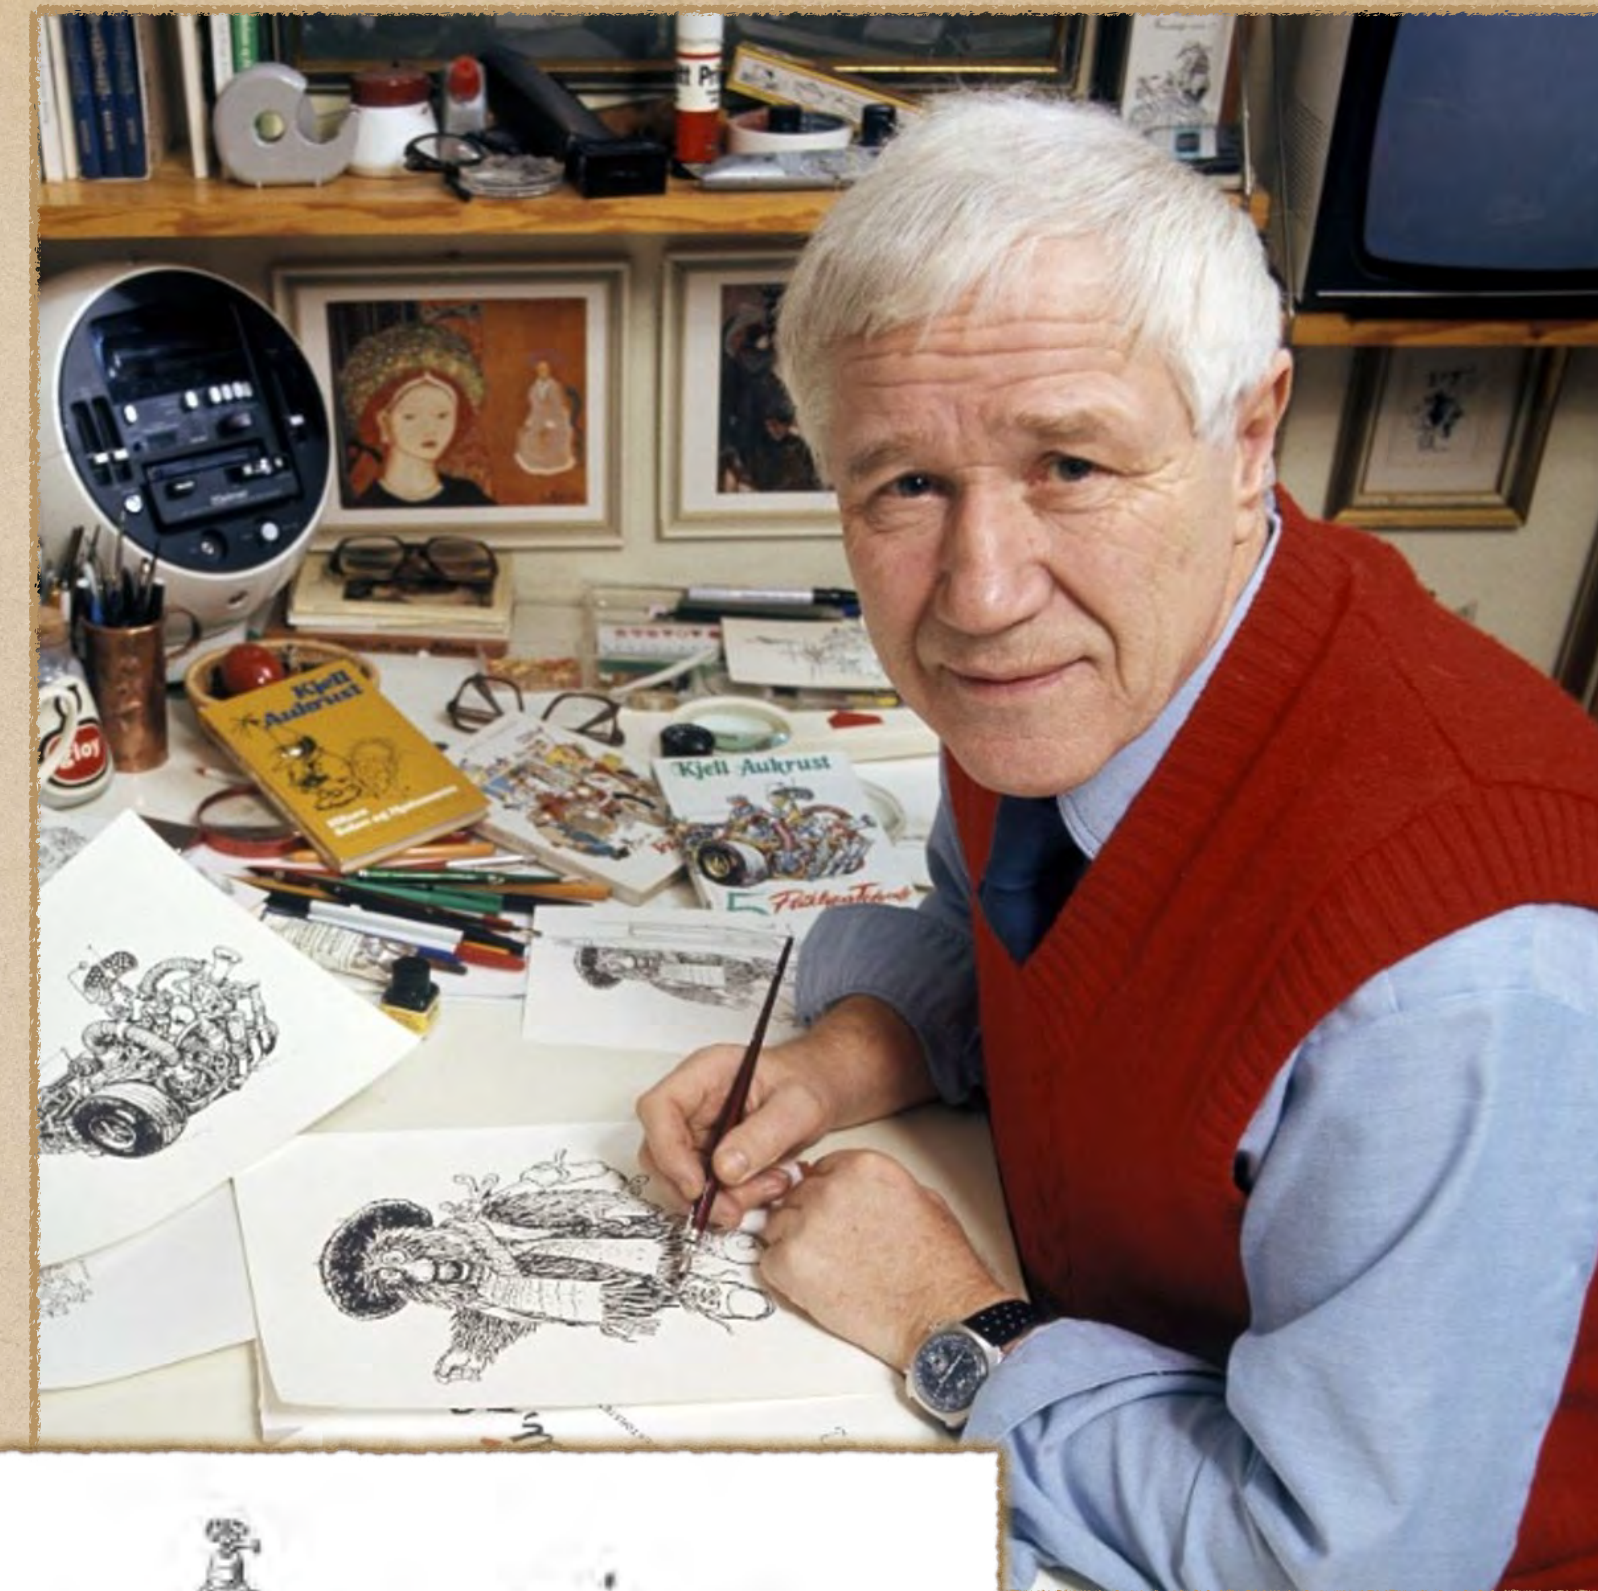

Kjell Aukrust (1920 - 2002)

Reodor Felgen's Hyperakselerator is based around the characters from the famous Norwegian author and illustrator, Kjell Aukrust's, Flåklypa Universe. The particular characters featured in this attraction are together part of the greatest movie success in Norway; Flåklypa Grand Prix (Pinchcliffe Grand Prix) that had more than 5.5 million tickets sold in a country of 4.5 million inhabitants.

Hunderfossen's partnership with the owners of the IP behind Flåklypa has been long standing and the Norwegian Icon's stories which are that of a national treasure. They have been successfully integrated into theming in attractions in the park previously - having begun with the construction of their Rollercoaster 'Il Tempo Extra Gigante' back in 2014.

The popular nature of the IP guaranteed it to be much anticipated with no other attraction like it that sees guests take part in a whole new adventure with the well-known characters where theming and story could be fully fleshed out.

The original film is heavily inspired by the birthplace of Kjell Aukrust's father. The Flåklypa-mountain is a stylised version of a real mountain, where the valley underneath it is named Flåklypa. It is also widely believed that the characters are caricatures of real persons.

Story

In this fantastic attraction, guests accompany Solan and Ludvig, as they test out, Reodor, a crazy Norwegian inventor's solution to major climate challenges related to sustainability in the automotive and transportation industry – a totally green hydrogen fuel made by harvesting burps and farts from different animals.

The story begins inside the workshop of Reodor. Where Solan and Ludvig are testing out the Hyperakselerator - A traditional Norwegian Kicksled given a high-tech upgrade with the Hyperakselerator engine on the back of it - for the first time. But when Ludvig pulls the wrong lever, the vehicle goes out of control and flies off the test track, crashing through the walls of the workshop.

Now high on the snowy Pinchcliffe mountainside the Kicksled begins rushing down hill at great speed with little control crashing through piles of snow. They finally reach a more wooded area where the ground is less snow covered. Still descending at speed they now face the threat of falling trees, as they weave in and out of the woodland. They finally splash down into the river at the bottom of the hill and begin floating downstream, just as they're about to relax they see a waterfall in the distance that they're headed for. Not knowing what else to do, they are forced to press the big red button. The audience are encouraged to also press the physical buttons on their dashboard in order to activate the Hyper-accelerator. And BOOM, the Kicksled takes flight soaring off the top of the waterfall into the air as it soars through the sky it loops over the Hunderfossen Theme Park where we see some of the headline attractions before CRASH! The sleigh flies through the roof of the Hyperakselerator attraction's venue at the park. Reodor walks up and asks how it was, and Solan and Ludvig exclaim that it was fantastic!

The Venue - Built out of an existing building which used to be a Videodome

The building was built in 1989, and housed a panoramic cinema with 110 seats. The show technology and the films became slowly outdated, and the park direction has over the last decade worked with many different concept ideas to renew the attraction. The building itself was ideal for the Simworx Stargazers, and the position of the building, just between two other Reodor Felgen/Aukrust-themed attractions in the park, made it perfect for the Reodor Felgen's Hyperakselerator.

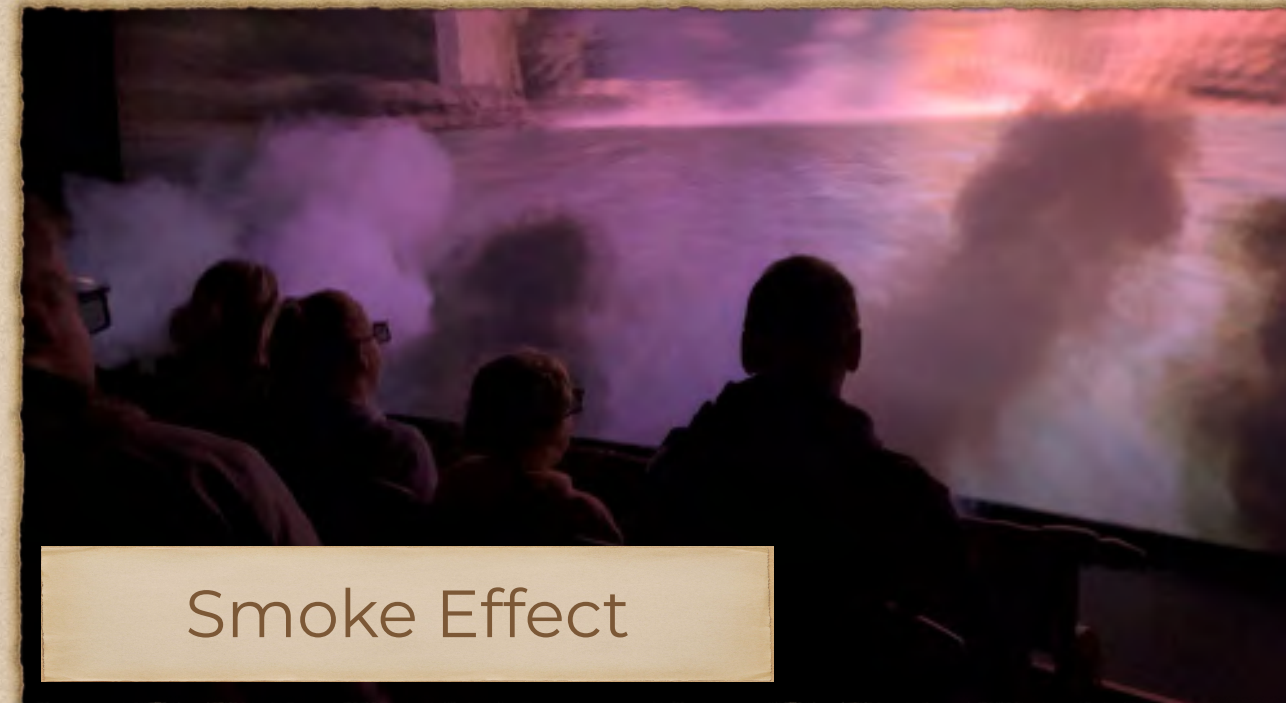

Ride Features

The attraction consists of four, 8-seat Stargazers that utilise 6DOF motion platforms, which allow for a wide variety of movements – making the ride both smooth and adrenaline inducing.

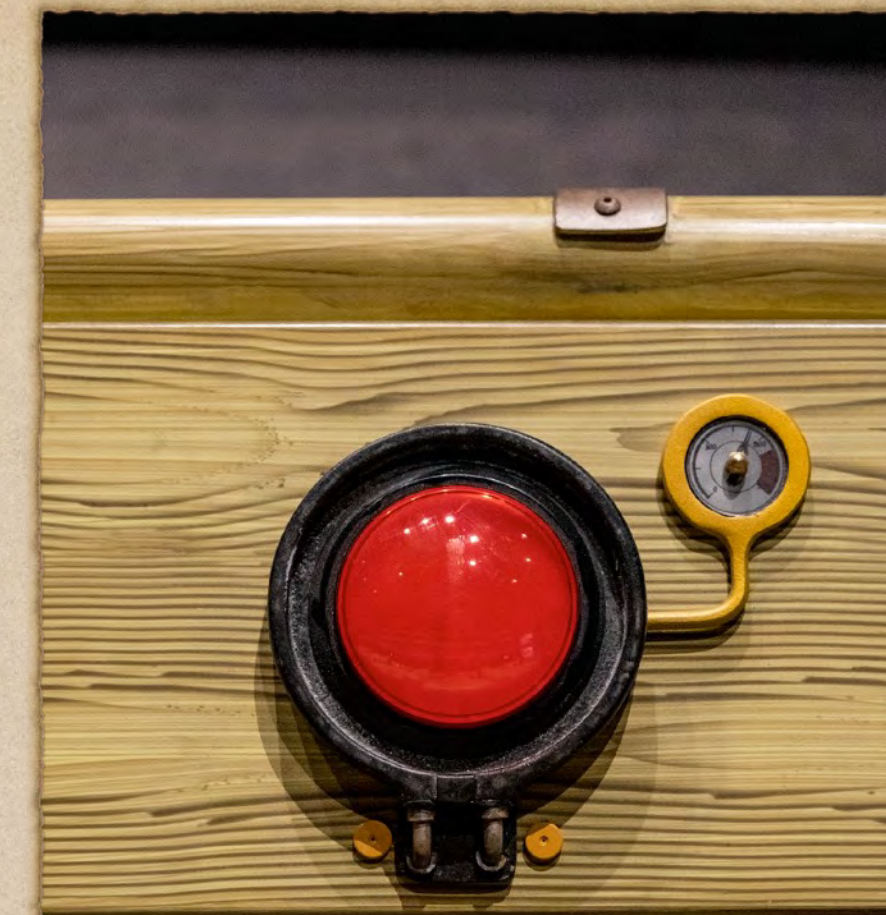

They sit in front of a large 3D, curved 16 metre wide projection screen. The vehicles, with steam punk inspired theming, have been designed to look like Reodor's Hyperakselerator from the story, and combine old and traditional elements to resemble something of a snow sleigh with a high-tech upgrade.

The ride itself lasts approximately 5 minutes in total with each Stargazer fitted with on-board special effects including water spray, wind and leg ticklers, as well as off-board smoke effects. These really enhance the story's realism and bring another dimension to the storytelling that compliments the media.

To differentiate this experience from that of a passive one we also integrated a big red push button that introduces an element of interactivity so that guests feel like they are interacting with on-screen media by pushing the button to activate the Hyperakselerator.

Stories from a Norwegian icon

Simworx has unveiled its latest Stargazer attraction, Hyperakselerator, at leading Norwegian theme park, Hunderfossen. Park World editor, Becci Knowles speaks to Simworx CEO, Terry Monkton to find out more about this fun, family adventure and the narrative that drives it.

“It is a fantastic ride that the Simworx team and Hunderfossen can be proud of but we're extra proud to release it.”

Reodor Felgen's Hyperakselerator is based around the characters from the famous Norwegian author and illustrator, Kjell Aukrust's Flåklypa Universe. The attraction is a Stargazer roller coaster, which means it's a family-friendly ride with a focus on storytelling and character development. The ride is set in a dark, industrial environment with large gears and pipes, and it features a variety of characters from the Flåklypa Universe, including a man in a red hat and a woman in a blue dress. The ride is a family-friendly roller coaster, which means it's a fun and exciting experience for everyone. The ride is set in a dark, industrial environment with large gears and pipes, and it features a variety of characters from the Flåklypa Universe, including a man in a red hat and a woman in a blue dress.
