

**RULANTICA'S NEW FAMILY ATTRACTION, SVALGUROK,
IS A WORLD-LEADING PROSLIDE RIDEHOUSE® THAT
TAKES AQUATIC PLAY TO A NEW LEVEL**

Located in Rust, Germany, Europa-Park's Rulantica is a visionary water park that creates a world-class entertainment experience inspired by some of the most famous and evocative myths out of Scandinavian legend. Seeing an opportunity to build on the success of their indoor attractions and offer even more entertainment to their guests, Europa-Park extended the experience outdoors. This summer they opened a monumental ride complex at Rulantica: an instantly iconic, custom ProSlide RideHOUSE®. Named 'Svalgurok' after Rulantica's famous sea serpent, this RideHOUSE®, unlike any other in the water park industry, incorporates spectacular feats of design, engineering, and animatronic theming to set a completely new standard in aquatic play.

Out-of-This-World Theming

Europa-Park set out to create one of the top water park attractions in all of Europe and saw that goal fulfilled. Svalgurok has been completely customized to seamlessly integrate into the park's mythologically inspired Scandinavian theming.

The scene at Svalgurok depicts a breathtaking, awe-inspiring aquatic battle out of myth. The towering sea serpent Svalgur is perched high above, overlooking the entire structure, while locked in combat with a giant octopus – that is actually an expertly themed ProSlide Continuous BodyBOWL – with massive tentacles encircling the RideHOUSE®. The theming on the structure is elevated by intricate detail work that has been integrated into every element to maintain the level of immersion for guests.

A tunnel that serves as a bridge between sections is designed to appear as though it's constructed from whale bones.

Subtle details like hand-carved Viking shields, guardrails and wood planks deepen the immersion and cement the fantasy experience is fully realized.

Hand-painted theming on the water slides ensures they effortlessly blend into the structure, while the large fiberglass tipping bucket that holds the appearance of being constructed from wooden planks heightens the experience.

Precise animatronic engineering enables Svalgur's head to move and spray up to 200 gallons per minute of water from four nozzles inside its mouth. Guests can even take the reins and control the sea serpent's head on their own, thanks to the integration of advanced technology.

High-Performance Water Rides That Amplify the Experience

Svalgurok's industry-leading theming is matched by the expertly engineered ProSlide water rides that make up its ride mix. An astounding mix of 10 tracks of high-performance ProSlide Water Rides are anchored to it, providing a multitude of thrilling experiences in a single location. Rides like the two-lane competitive ProRACER® let riders of any size race their friends in a high-speed dash to the finish line. And with the addition of three TWISTERS and four KIDZ TWISTERS, riders of any age can enjoy the classic, open-flume experience as they accelerate into turns and high-banking loops. Guests will marvel at the diverse entertainment options available that truly provide something for everyone.

Vision and Design that Transform Aquatic Play

No strangers to grand vision, Europa-Park's newest addition to Rulantica exceeds every expectation that came before and completely transforms the world of aquatic play. Subtle details, intricate theming, captivating storytelling, gargantuan sea monsters and high-performance water rides all work in tandem to make Rulantica's Svalgurok truly transformational.
