

2022 BLOOLOOP AWARD SUBMISSION
SwitchBACK™ @ Splashway Waterpark & Campground
Cullman Wellness & Aquatic Center

THE SWITCHBACK™ TRANSFORMS THE WATER RIDE EXPERIENCE

The summer of 2022 saw a new ProSlide innovation debut at two water parks in the southern United States. These installations opened back-to-back at Splashway Campground & Waterpark and Cullman Wellness & Aquatic Center, unveiling ProSlide's latest water ride feature: the groundbreaking **SwitchBACK™**. It combines multiple innovations that contribute to making it the industry's first multi-feature tubing wall ride.

World's first SwitchBACK™

The latest evolution of ProSlide's award-winning TornadoWAVE

Fuelled by patented TornadoWAVE® technology – ProSlide

Exclusive

Uses a new, two-person, face-to-face tube developed exclusively for SwitchBACK™

NEW RIDE, NEW VEHICLE

Designing a new ride with such an innovative ride experience necessitated the creation of an equally innovative vehicle: the Face-to-Face Tube. By situating riders in this type of configuration, they're able to see the expression on each other's faces, allowing for a greater opportunity to share the experience.

RIDE EXPERIENCE

- A. Riders experience a fast, abrupt change in direction.
- B. Near zero Gs as riders travel up the feature.
- C. Fast up and down oscillations at least once in the ride path.
- D. Playful experience with short oscillations and quick transitions.
- E. Face-to-face positioning allows riders to share in the thrills

POWERED BY PATENTED TORNADOWAVE® TECHNOLOGY

The **SwitchBACK™** is the latest evolution in ProSlide's TornadoWAVE®. Utilizing the company's reducing radius funnel to control the ride experience, the feature is powered by award-winning technology that allows for more exciting drops, twist entry, higher speeds, sweeping motions across the wall and controlled, repeatable outruns.

INFINITELY ADAPTABLE, TOTALLY CUSTOMIZABLE

ProSlide's team of experienced engineers and ride designers can adapt the **SwitchBACK** to any landscape and footprint. Its versatility allows for it to be added to ride paths with existing ProSlide features like the **TORNADO® 18**, **FlyingSAUCER® 20** and **30**. This completely transforms the ride path into a brand-new experience and brings the **TornadoWAVE®** features into every single ride ProSlide ride category.

AN ALL-AGE, SHARED SENSATION

With a ride experience purposefully designed for the entire family, the **SwitchBACK** is a 'slow-and-go' adventure ride that's perfect for almost any rider. Seated in a face-to-face configuration, two riders share a slow start, followed by quick, sharp changes in direction with fast up and down oscillations. The quick transitions keep riders on their toes as they share in the thrill of the next speedy direction change.

And thanks to its scaled size, parents can even join their younger kids to capitalize on the opportunity for a shared experience.
