Turning Point

Chapter 1:

The Big Idea

Chapter 2:

The Experience Plan

Chapter 3:

The Implementation

Chapter 1:

The Big Idea

Turning Point is a global issue, artist, media and creative-based experience that will blur the lines between the physical and digital worlds in real time to trigger change in the future of humanity.

The Turning Point experience is the phygital mash-up of **Twitch, MR-VR-AR, Burning Man, The Met, Chihuly in Tel Aviv, Sydney Vivid**, real-time gaming in **Unity** and **Unreal**, real-time artist creation around the globe, satellite speed communications, mobile technology, real time global activism, and real-time human interaction using centuries of **data**, for solving **global issues**.

Triggering a response a call to action to change, a *Turning Point*.

What's the mash-up of **Twitch** with **MR**, with **Burning Man** from **The Met**, and real-time human interaction using centuries of **data**, for solving **global issues**?

A response that will trigger change - a *Turning Point*.

Turning Point

Turning Point

This project is a first-of-its-kind responsive performance art collaboration, connecting global artists, scientists, programmers, activists and the public with interventions to inspire positive change to our planet's biggest challenges.

Linking urban centers and nature, physical artistic field installations respond to big data and are powered by participants via a game engine's interactives, to create a communication loop in real time, triggering a turning point towards action for our planet's future.

Why?

Our goal is to establish real-time intervention around global issues to inspire actions that positively influence the future of our planet by triggering a *Turning Point* in the earth's climate, migration, and social challenges. The combination of collective spheres of knowledge, networks, and influence will propel new avenues of impact beyond individual efforts.

“If your dreams don't scare you
they are too small,,

Phil Beaton

The Challenge. The Opportunity.

Before us stands the single greatest opportunity in the history of humanity to redesign, redevelop, and rebuild the society as a whole. The environmental movement has always been viewed as negatively affecting the economy, business, and political structures.

We must change that message from one of limitation and reduction, to one of unlimited opportunity for economies, businesses, talent, labor, and communities to prosper economically and socially.

In Location Based Entertainment and the Arts, we have the ability to dream the impossible and make it possible. Not only do we make it possible; we make that reality highly profitable. Join us as we lead business sectors, governments, society, and local communities to transform the world.

The time is now to Light the Way to our collective future.

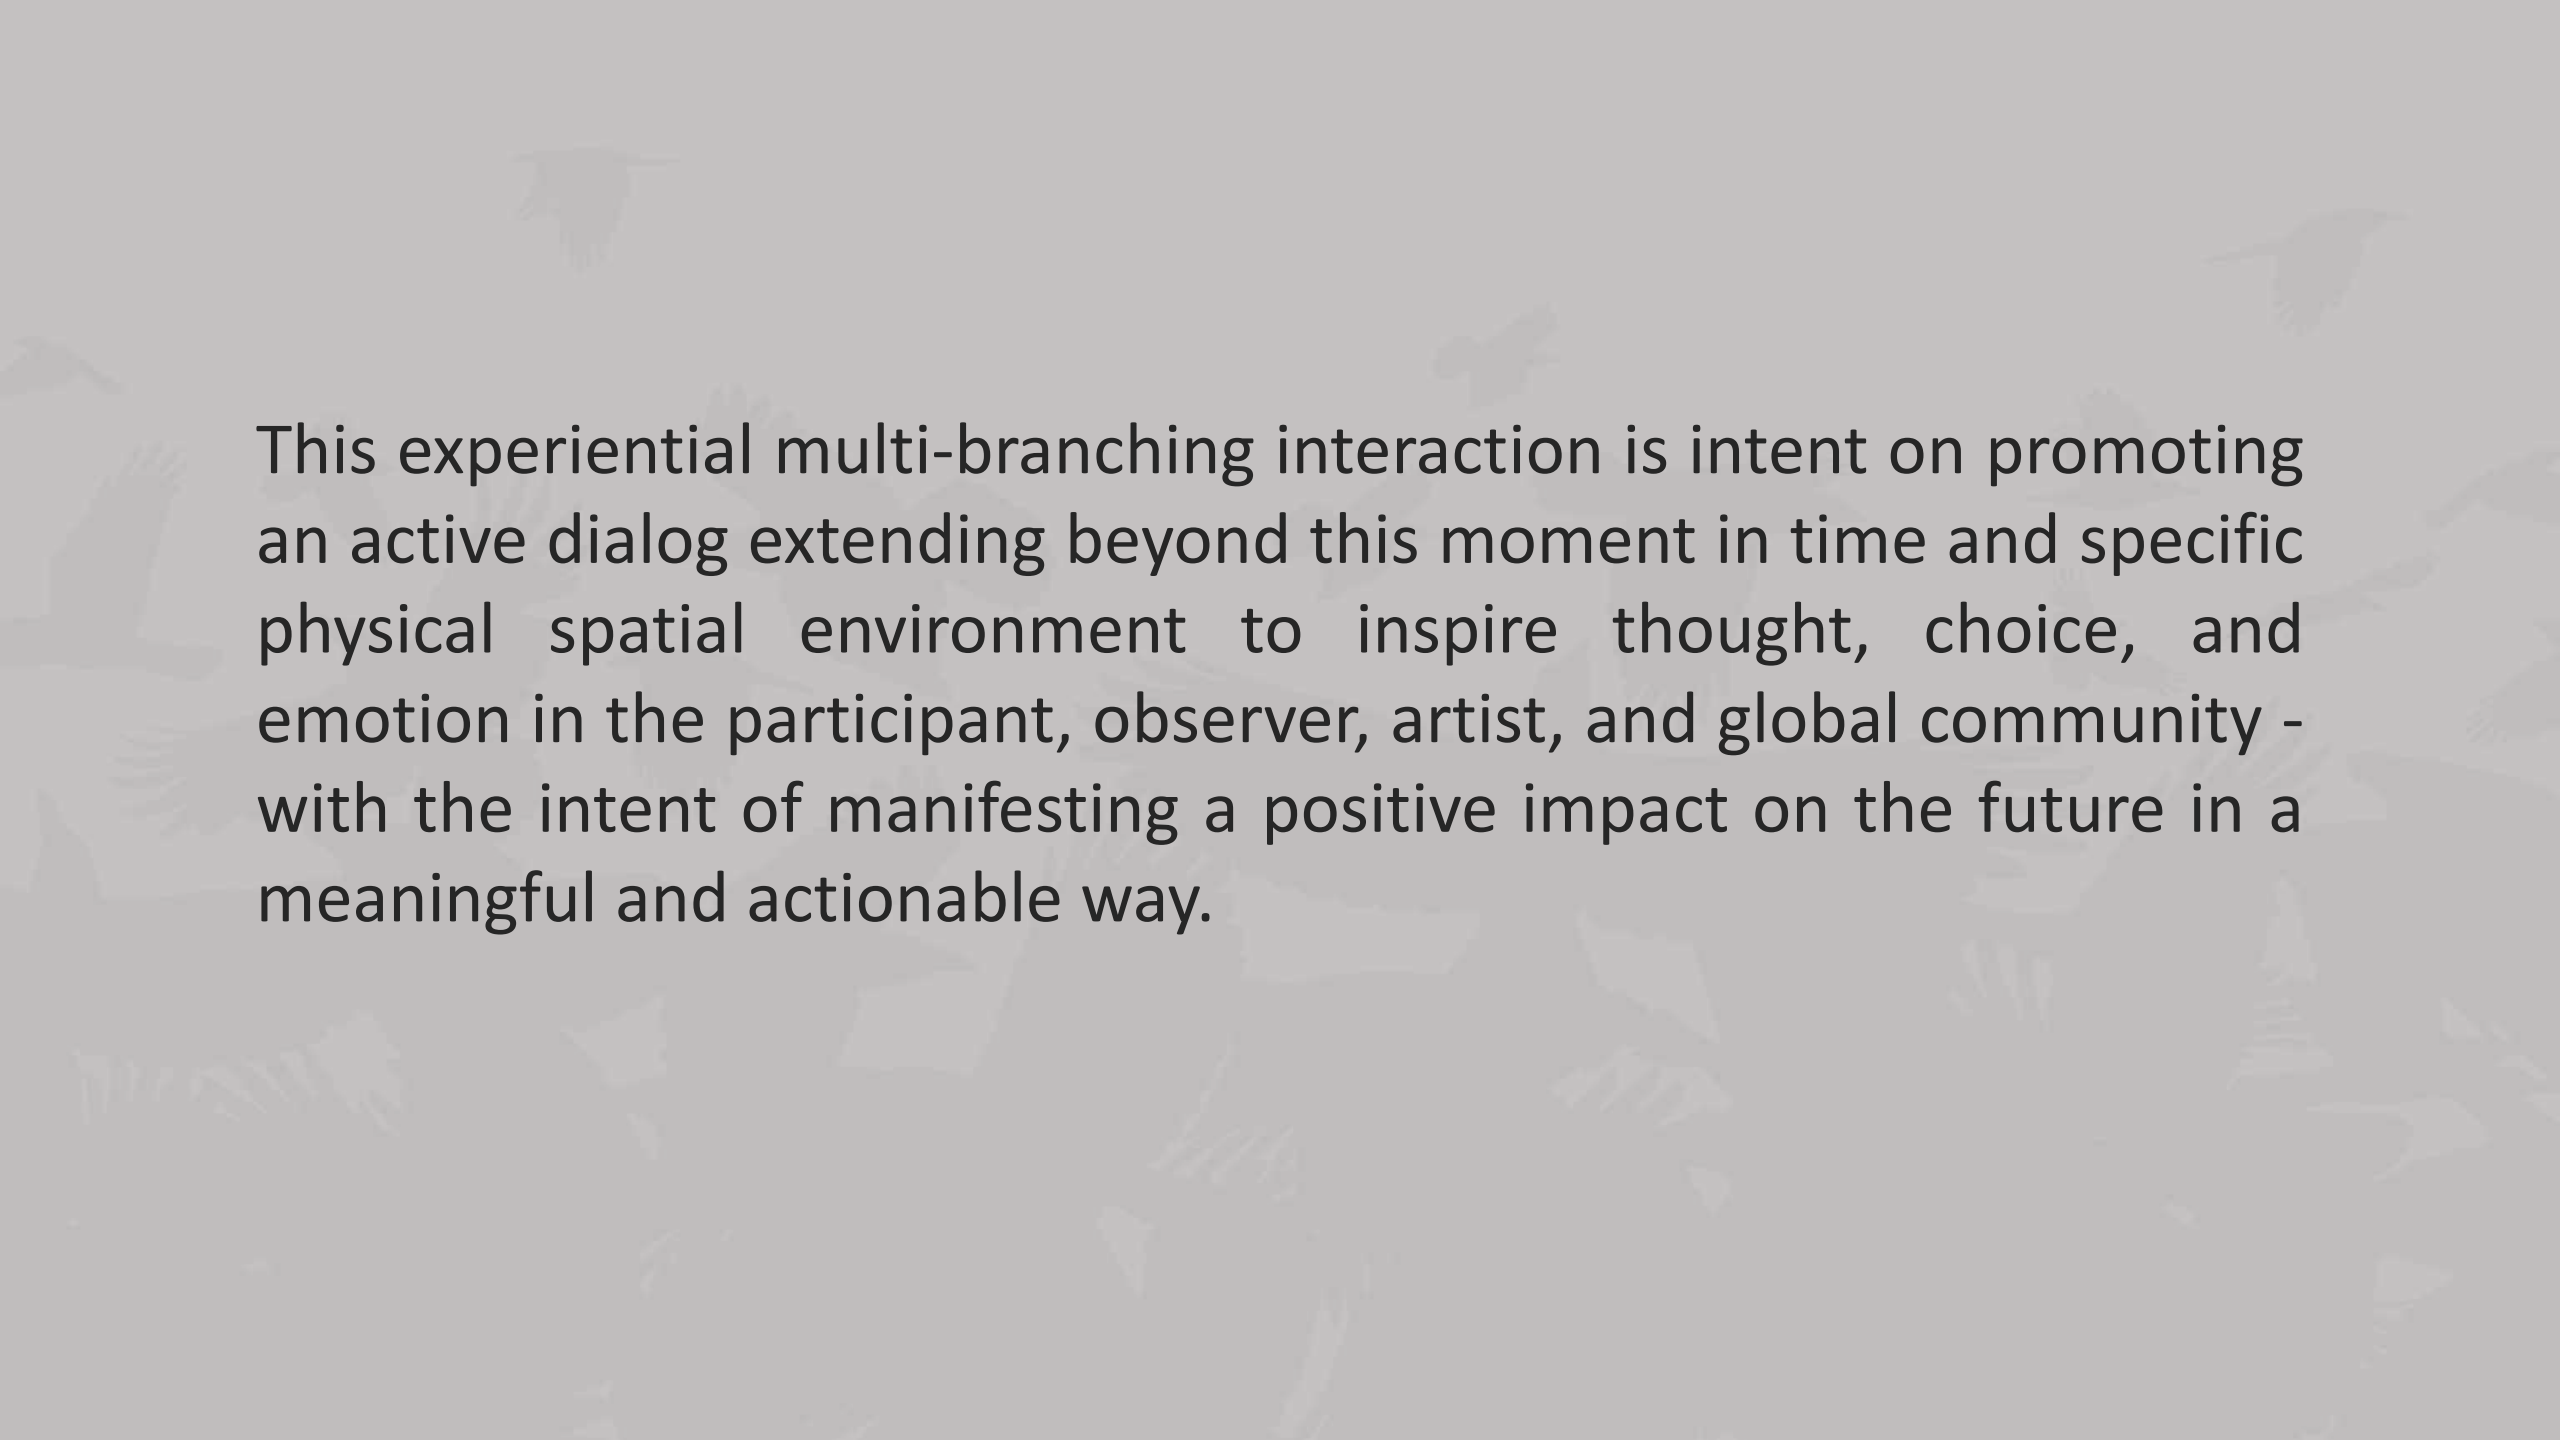

Long Form Narrative Statement

Lighting the Way

A collaborative experiential intervention harnessing the power of art, story, place, time, technology, and thought to inspire change in the message about the planet and people's crisis' resulting in energy, choices, and meaningful actions that will achieve a Turning Point in the earth's climate, migration, and social challenges (crisis / opportunities).

Together, seeding a future of opportunity for the people, planet, and its inhabitants.

The collaborative experiential intervention will be a catalyst, representing the opening statement of a collective of forward-thinking artists, technologists, thinkers, and global contributors whose actions, life, and work (commercially and privately) exhibits, reflects, expresses, and articulates an interaction of the environment, artist, active on-site participant, casual on-site observer, and digitally accessible participants and observers through real time dialog generating a multi-branching experiential interaction.

The background of the slide features a faint, light gray image of numerous hands reaching upwards from the bottom, creating a sense of collective effort and aspiration. The hands are of various sizes and are positioned at different heights, all pointing towards the top of the frame.

This experiential multi-branching interaction is intent on promoting an active dialog extending beyond this moment in time and specific physical spatial environment to inspire thought, choice, and emotion in the participant, observer, artist, and global community - with the intent of manifesting a positive impact on the future in a meaningful and actionable way.

Through the use of technology, human interaction, real time actualization, and interpretation (resulting in a continuous loop of creative re-interpretation), our intent is to move beyond passive mediation, and linear intervention, to boundary-less realization⁽¹⁾, non-linear activation⁽²⁾, and abstract manifestation⁽³⁾.

*This physical manifestation of this experiential intervention may be fixed or traveling, with opportunities to participate in the experience at a single destination and or at multiple interconnected physical destinations and digital representations.

(1)-beyond the physical confines of the space the intervention is being physically realized in, incorporating the digital realm.

(2) - via each loop of data and interaction influencing the other in variable patterns in real time, creating new influences and outcomes; for example ripples intersecting during a storm.

(3) as in influencing the energy and outcomes of the future via potential behavior and choice-based outcomes.

We must reshape the global message

Good Environment
= Good Social
Well-Being
= Good Economics

We will articulate, express, and create an interactive platform that will support dialog and artistic co-creation between artist and audience resulting in ideas, social, cultural, and technical outcomes that will open the way to new avenues of expression, new modes of thought, new opportunities in industries, jobs, and prosperity for earth and all of its inhabitants.

We must remind people and humanity what we have achieved when intent is applied.

By motivating an action-based mindset, re-illuminating previous successes and existing successes, participants may adopt and create new solutions for a collective global future.

Key emotional, inspirational, and thought leadership touch points

Express, inspire and motivate a call to action in the participant and viewers through the interaction with the intervention

Civilizations seed and inspire civilizations
Cycles of civilization

Art creates art
Story / ideas / inspiration / call to action
Observance passive and interactive

Everything is interconnected
Rhythms of life
Everything is always in motion, undergoing change

The power of choice and intention on the human condition
Birth of Awareness / Cognoscente thought
Collective Understanding and common truths in the age
of the absence of truth
Empathy / choice / cause and effect

A living piece of performance art,
combining, story, art, technology, self-
actualization, and thought inspiring
action to influence the future.

YES

Is this idea commercially viable?

Examples of hybrid fine art / technological / experiential installations that are well received by the public and commercially viable

Turning Point
Experience plan

Global Issues
Cycle 1

Creation Leads to
Creation
Cycle 2

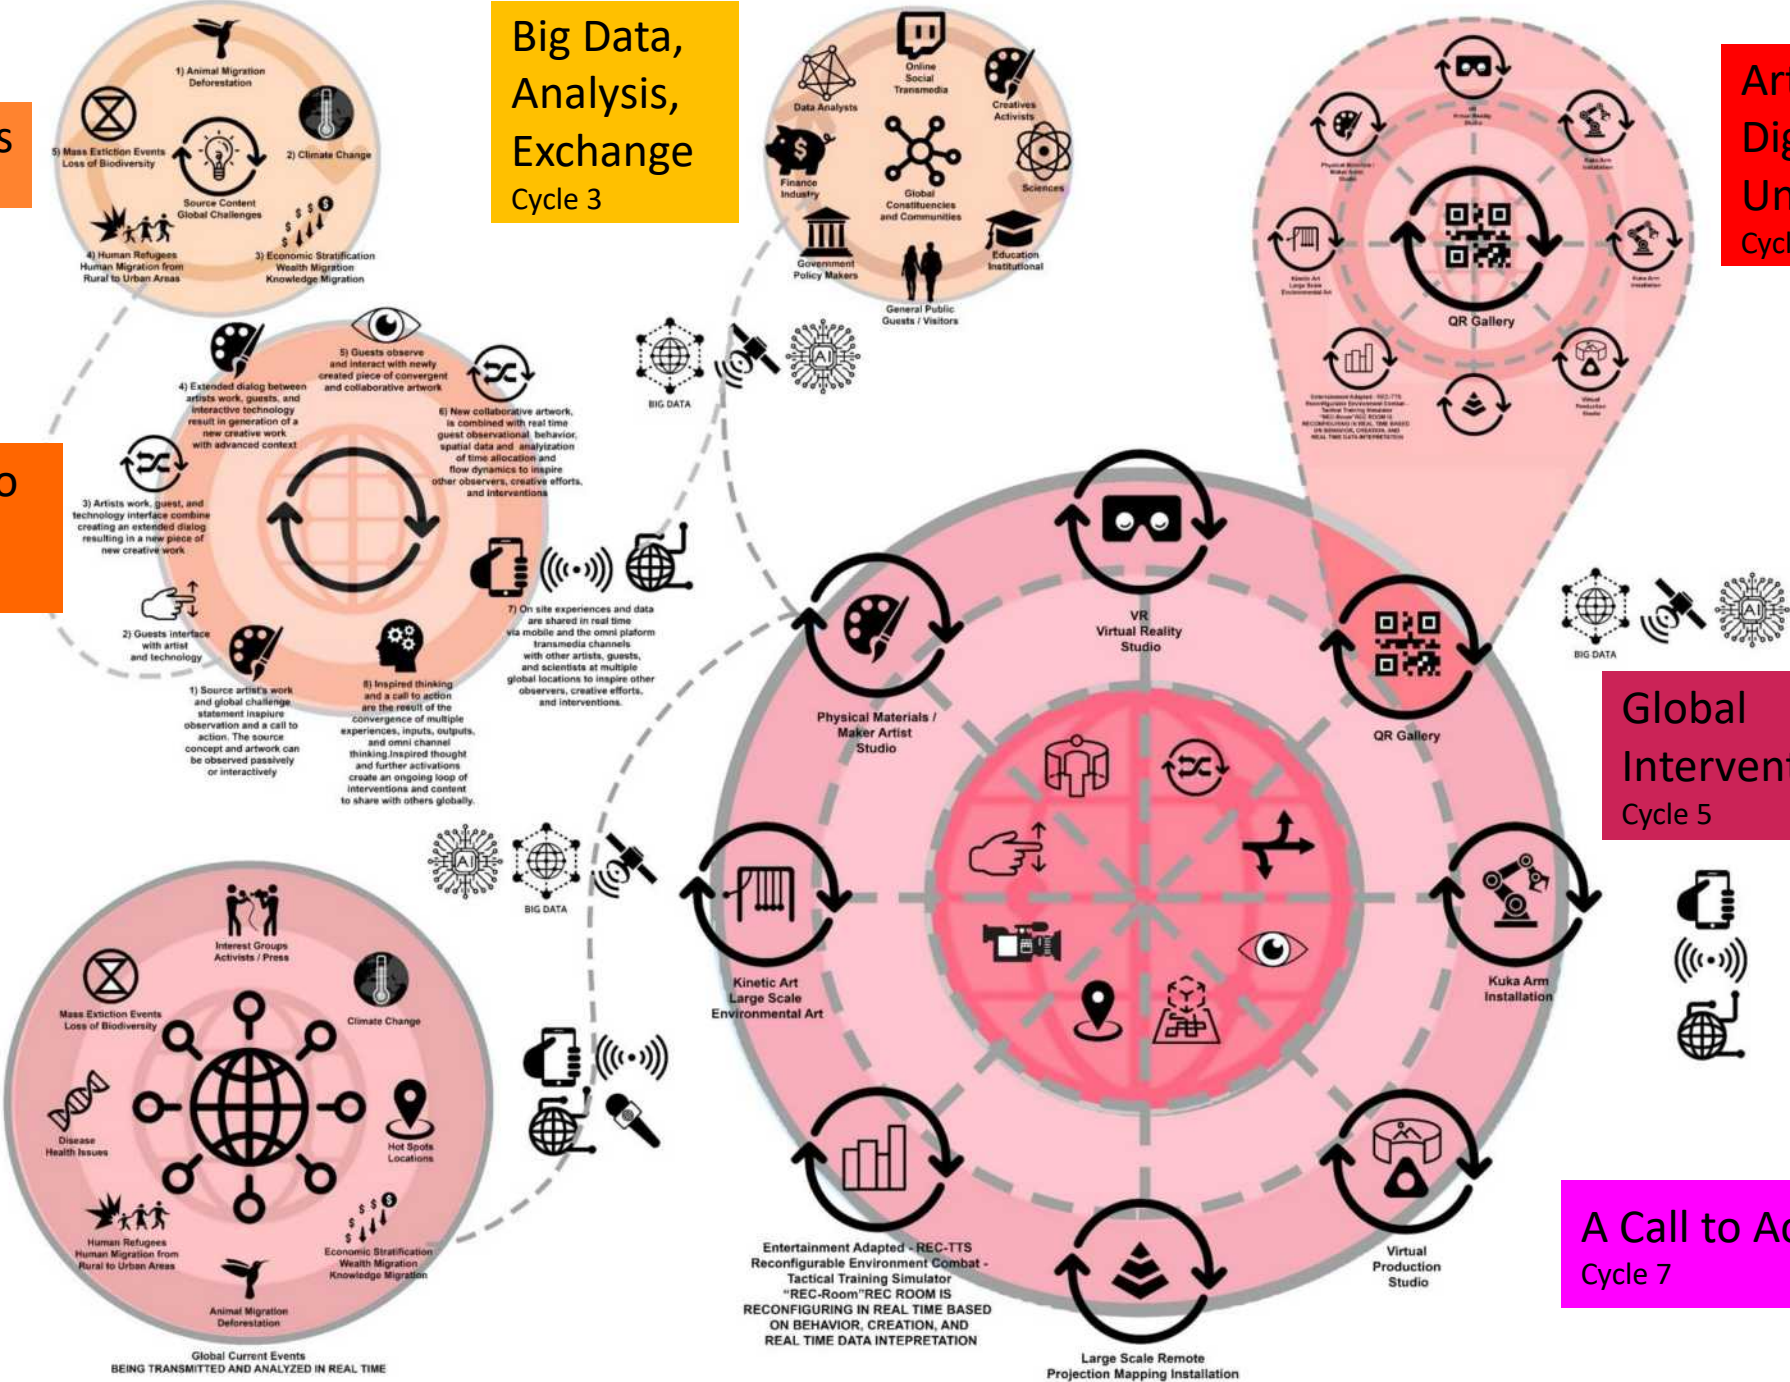

Hot Spots - Crisis
In Real Time
Cycle 4

Big Data,
Analysis,
Exchange
Cycle 3

Art In The
Digital
Universe
Cycle 6

Global
Intervention
Cycle 5

A Call to Action
Cycle 7

Intervention installation sites are positioned all over the world.

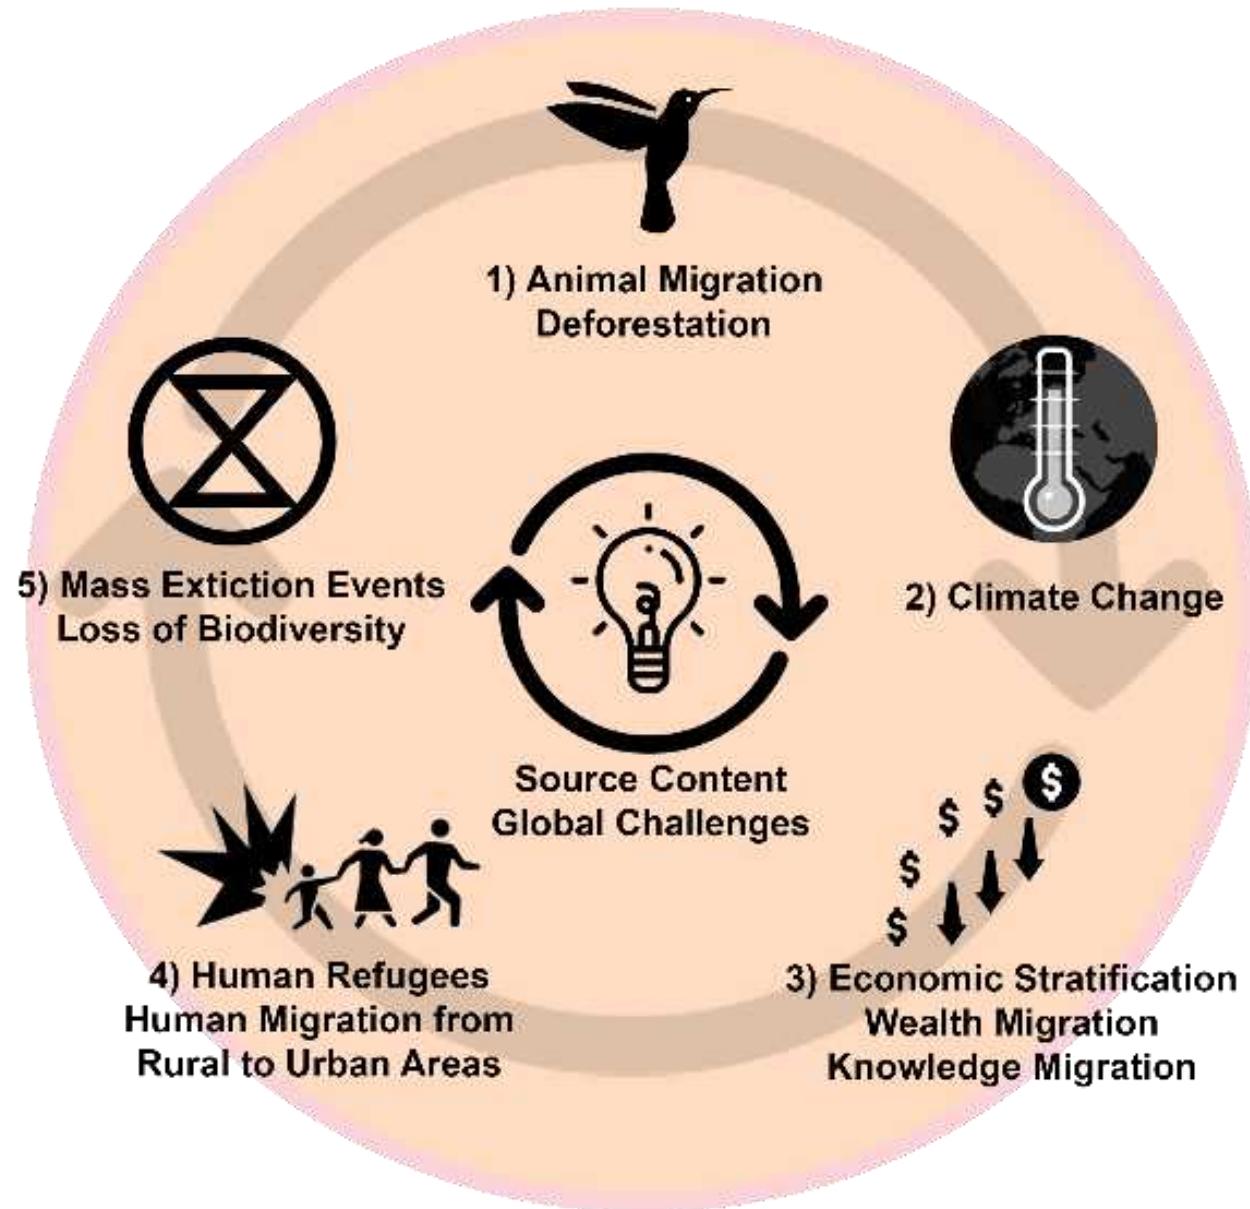

Each is in real time communication with the other, influencing each other, through the collaborative interaction of artist , guest, interface, data, interpretation, and realization through the game engine , internet and mobile technologies.

Global Issues

Cycle 1

Global Issues inspire thought and require a call to action on a personal, local, region, national, and international levels.

Experience Plan

A glass sphere sits on a sandy beach, reflecting the sunset and the ocean. The text "Global Issues Awareness" is overlaid in a white, outlined font.

Global Issues Awareness

Global Issues Awareness Creation Cycle 1

- 6th Mass extinction event
 - Loss of Bio-diversity
- Climate change
 - Temperature rise impact on humans, animals, plant life
- Environmental Destruction
- Resource Depletion
- Fractured migration routes
- Global Hot Spots
- We have faced serious challenges before and succeeded
- We have choices to make

Everything is Inter-related

History shows us that self interest, short term (survival-based) thinking, and craving for social status is what has made humanity survive. Those traits are among our strongest skills.

How can we use / leverage our short termism to nudge us into behavior that affects positive change and a call to action?

How can we harness this immense power of our self interest to build status through modern forms of sustainable business models thereby creating and shaping a new global culture.

To succeed - we must build bridges to what motivates us, what drives us, and what we need to do to solve global challenges.

Inspired by Hannah Helmke

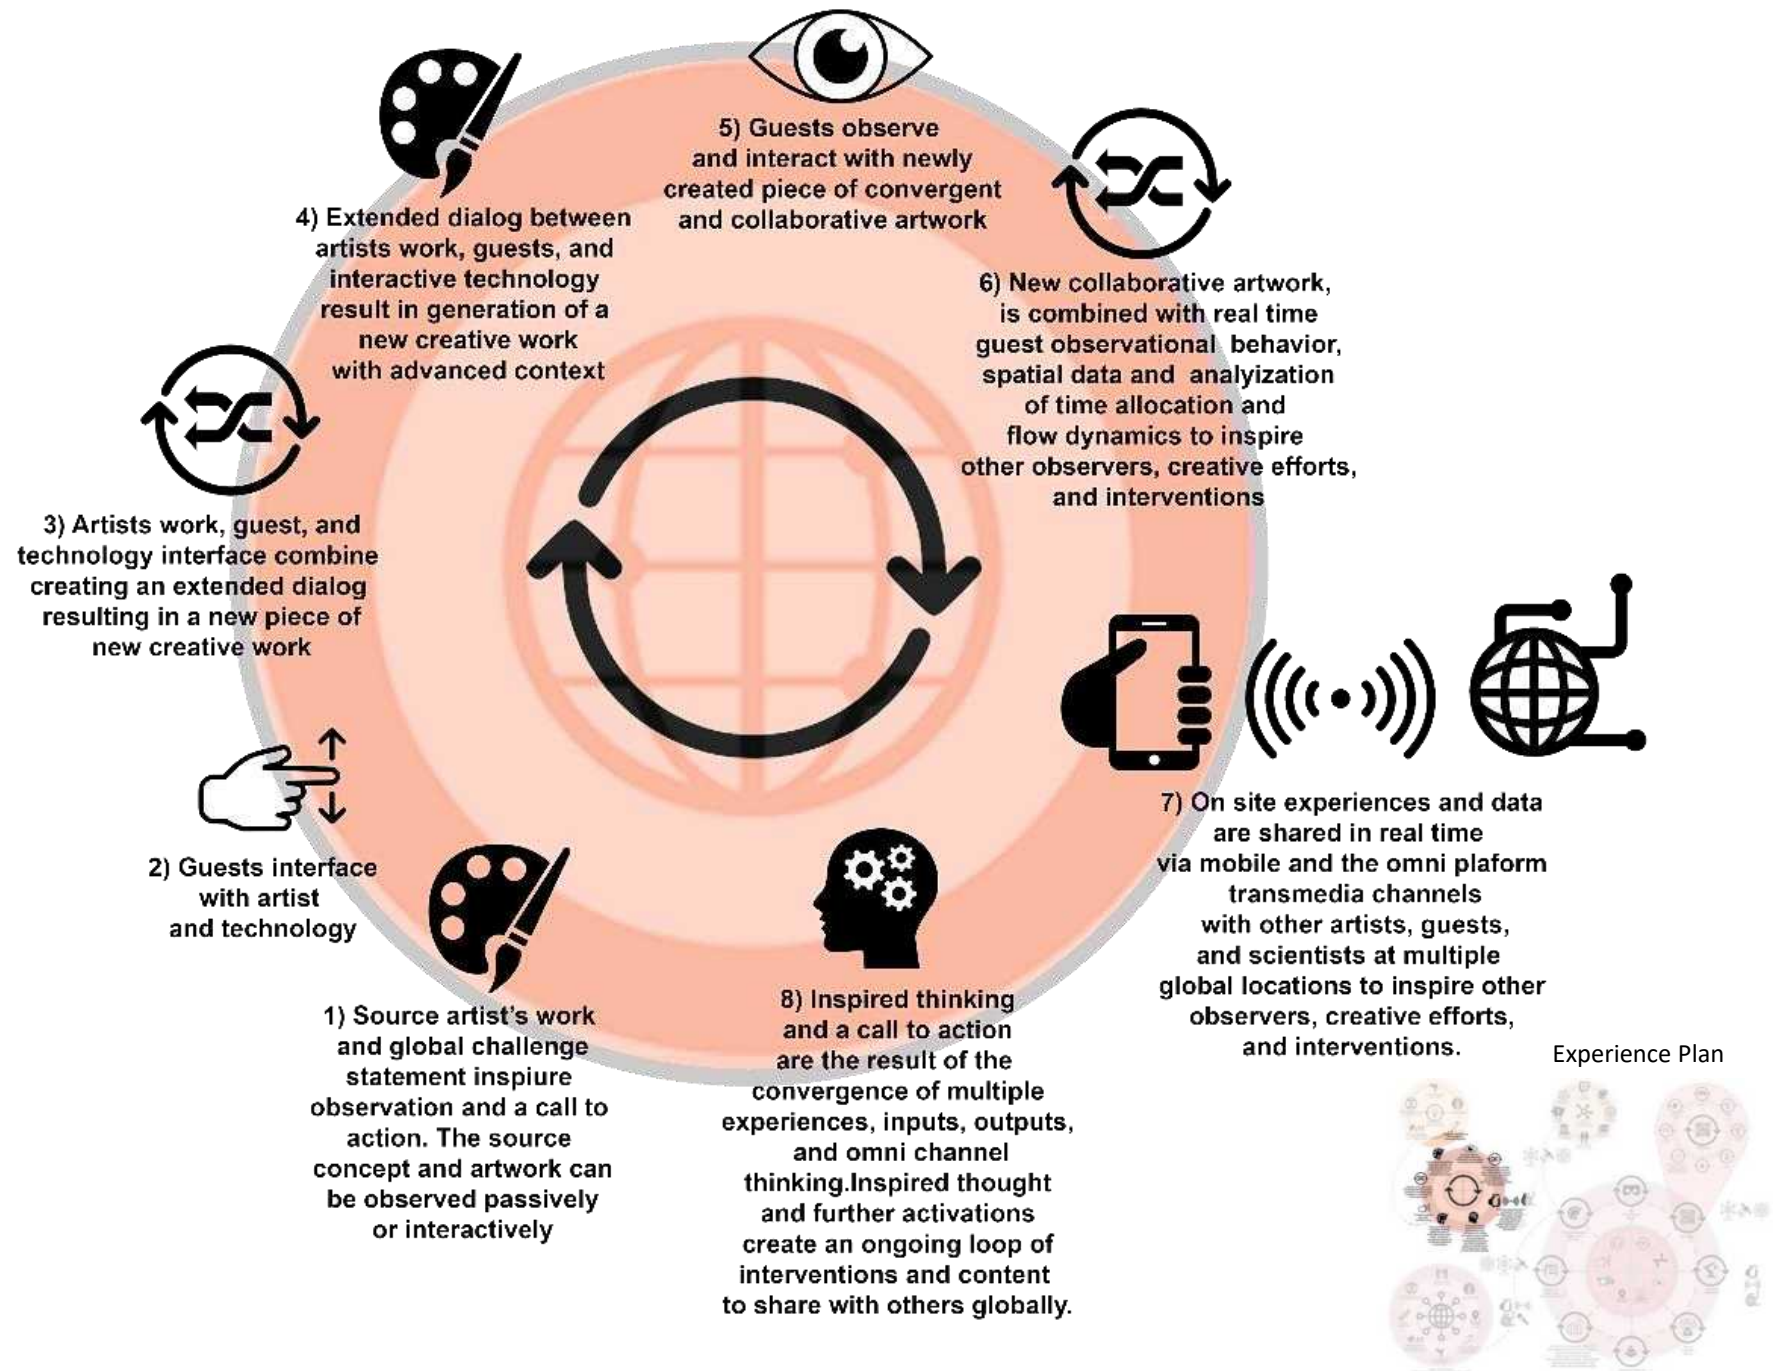

Creation Leads to Creation

Cycle 2

Initial intervention installation leads to initial guest interactive interface, resulting in the manifestation of new large-scale intervention.

Crowd behavior, choices, reactions, and movement capture (haptic, spatial, density, duration, and speed) create relationships, providing real time data analyzation, real time reactive visualizations, and real time content generation, digitalization, and meaningful outcomes.

Data is transmitted in real time to a cadre of artists, data analysts, global challenge sources, and intervention sites globally, seeding further interventions.

An aerial photograph of the Acropolis of Athens, Greece, during the golden hour. The Parthenon and Propylaea are prominent on the rocky summit. The Theater of Dionysus is visible on the lower slopes. The surrounding city of Athens is partially visible at the bottom of the frame.

Creation
Leads to
Creation

Cycles of Expression Civilization and Art

- **Expression**
 - Art creates art
 - Story / ideas / inspiration / call to action
 - Observance passive and interactive
-
- The need for humans to mark their presence I was here
 - Hand on cave wall
 - Obelisk / Pyramid / Great building
 - Painting
 - Tree etching
 - Bathroom marker
 - Spaceship plaque / Moon flag
-
- Art and music - and the ability to express our existence in humanity separates us from many of the other species on earth
-
- It is the act of expressive choice - Art allows us to fold time and be present with the creator at the moment the work was executed or completed, to engage in a direct dialog and make a human connection
-
- Art reflects the cognitive revolution and awakening of humanities consciousness

Destruction

The Savage State

**What you leave behind is not what
is engraved in stone monuments,
but what is woven into
the lives of others.**

— *Pericles*

Intervention Installation - 001

- Guests can observe intervention piece
- Guests interact and create with controlled Kuka Arms around the intervention piece.
- 1 Kuka arm is projecting light. 1 Kuka arm is capturing this projected light through the sculpture.
- Using a combination of projection technology and game engines (to capture movement data and guest decisions in real time) the output of this projection is a collaborative piece that is then beamed to another intervention site installation and projection mapped at large scale onto a mountain.

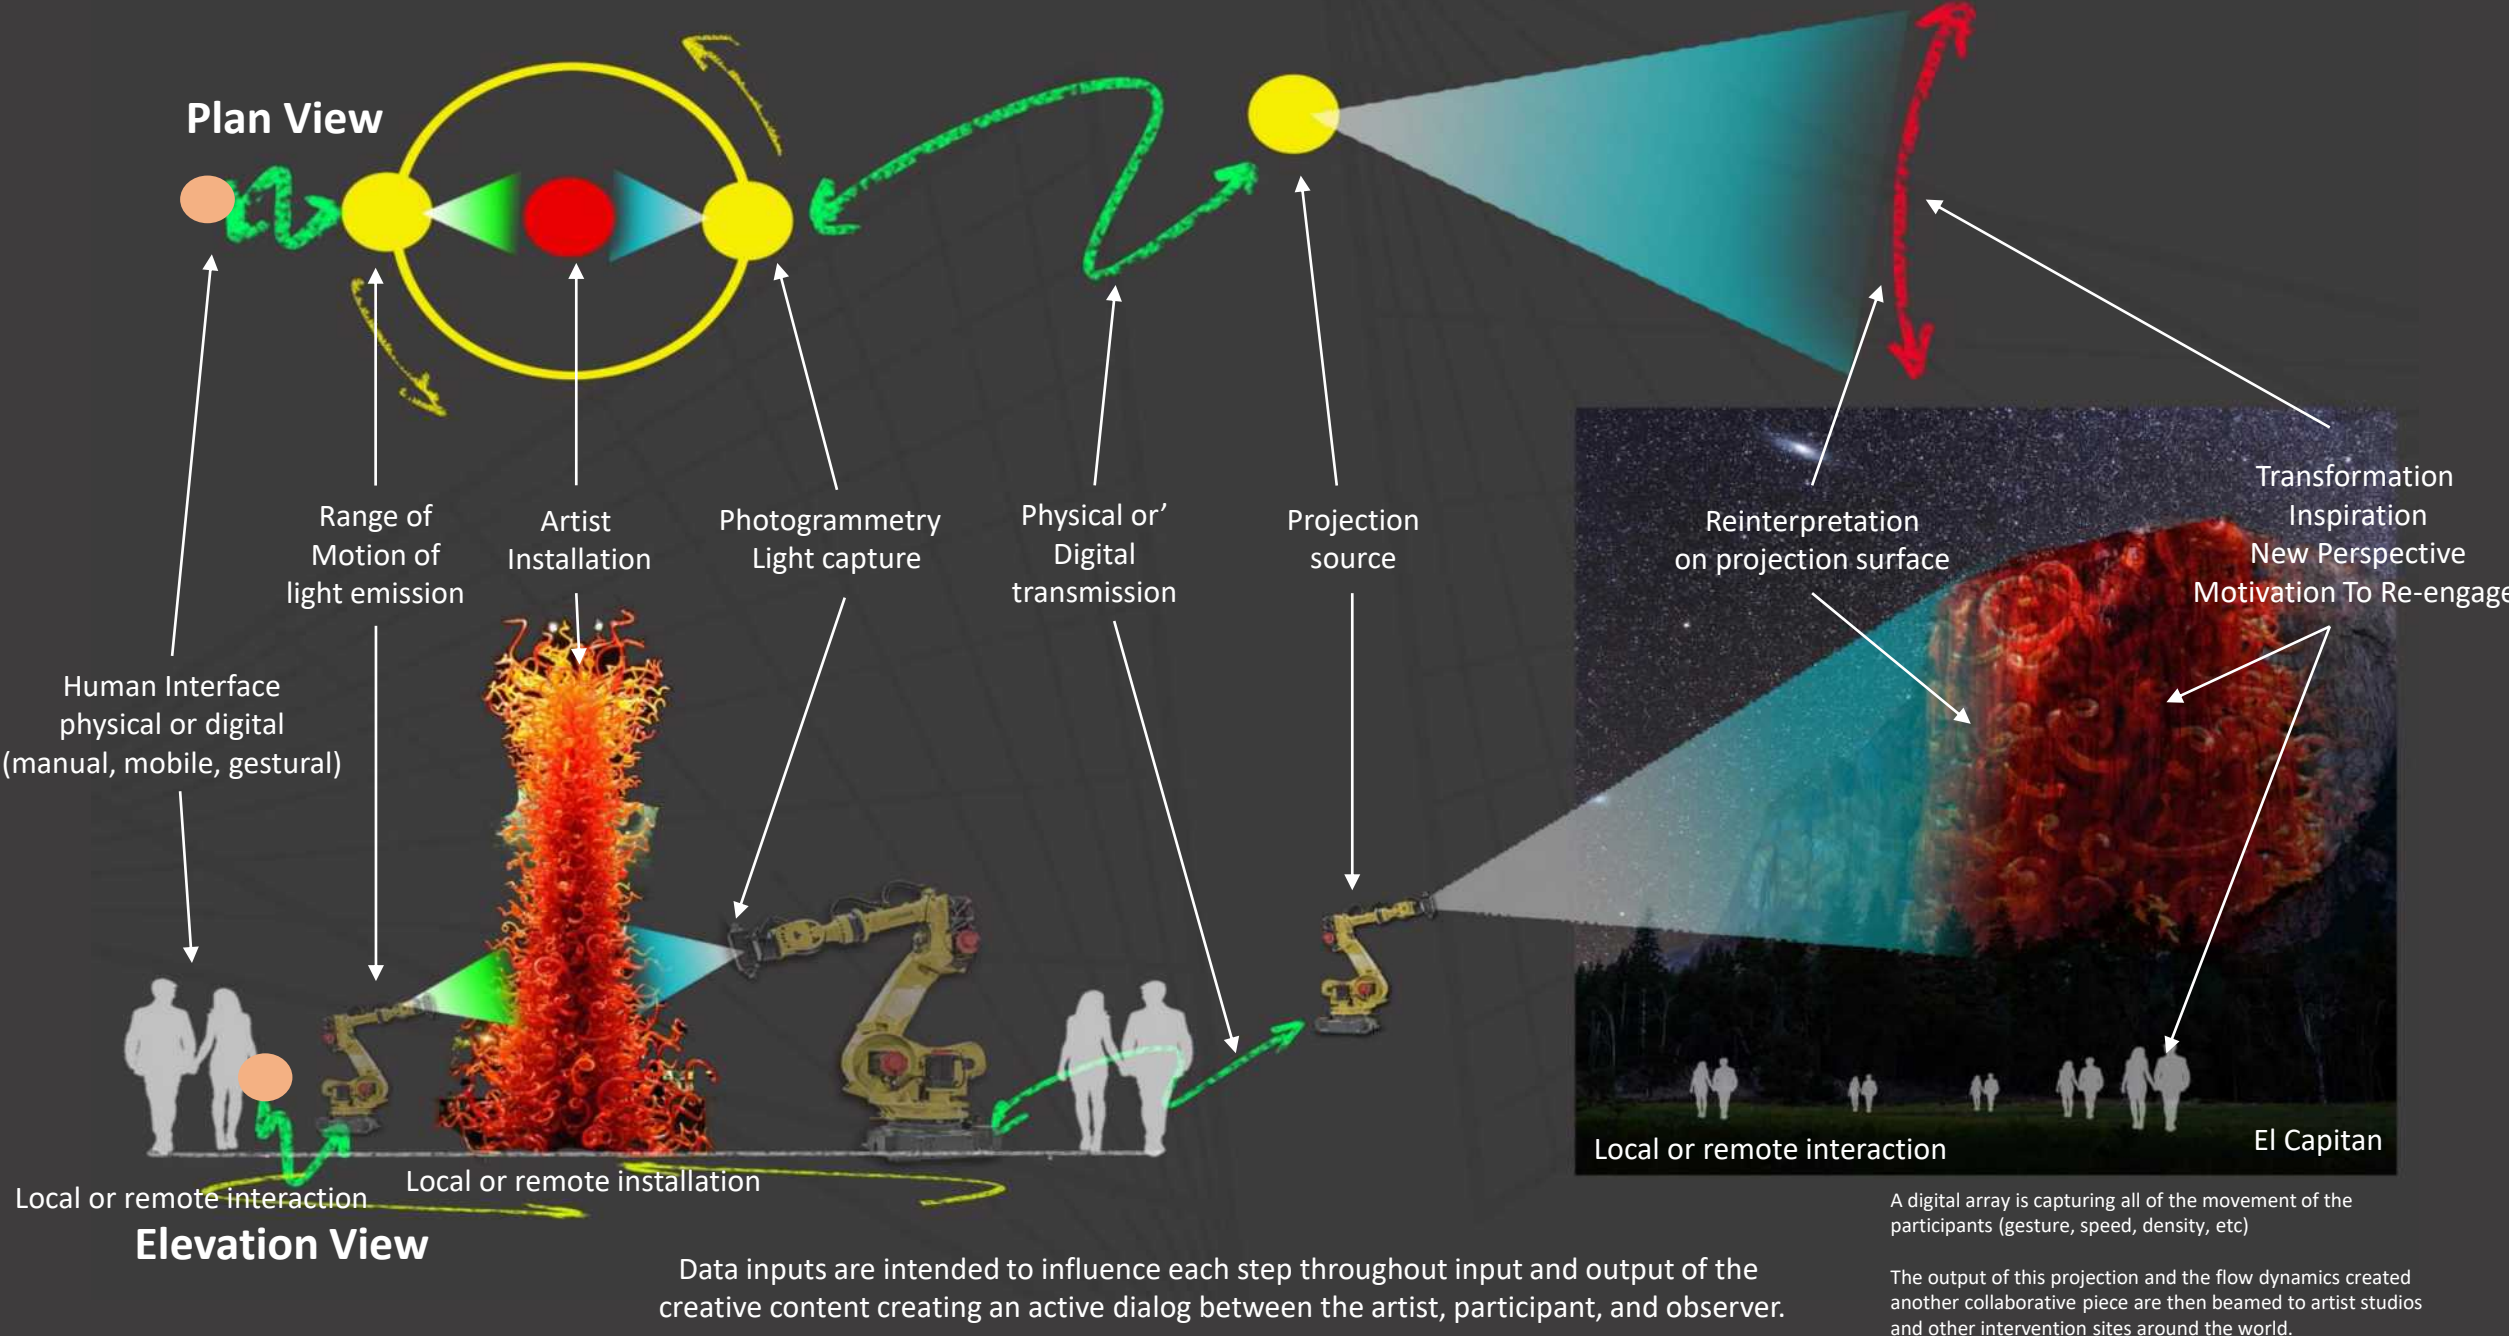

Watch on YouTube:

<https://youtu.be/O5wG1fVfPR4>

Intervention Installation 001
Interactive dialog

Hypothetical linear relationship between intervention 001 and 002

- Large scale intervention / installation - 002
- Guests can observe collaborative intervention
- Guests interact and create with controlled Kuka Arms around the installation piece.
- Source content for this intervention is being beamed from another global intervention site.
- A digital array is capturing all of the movement of the participants (gesture, speed, density, etc).
- The output of this projection and the flow dynamics generated as result of the guest's choices and interactions result in creating another collaborative data set and intervention, which are then beamed to artist studios and other intervention sites around the world, seeding additional creation, thought, and intervention.

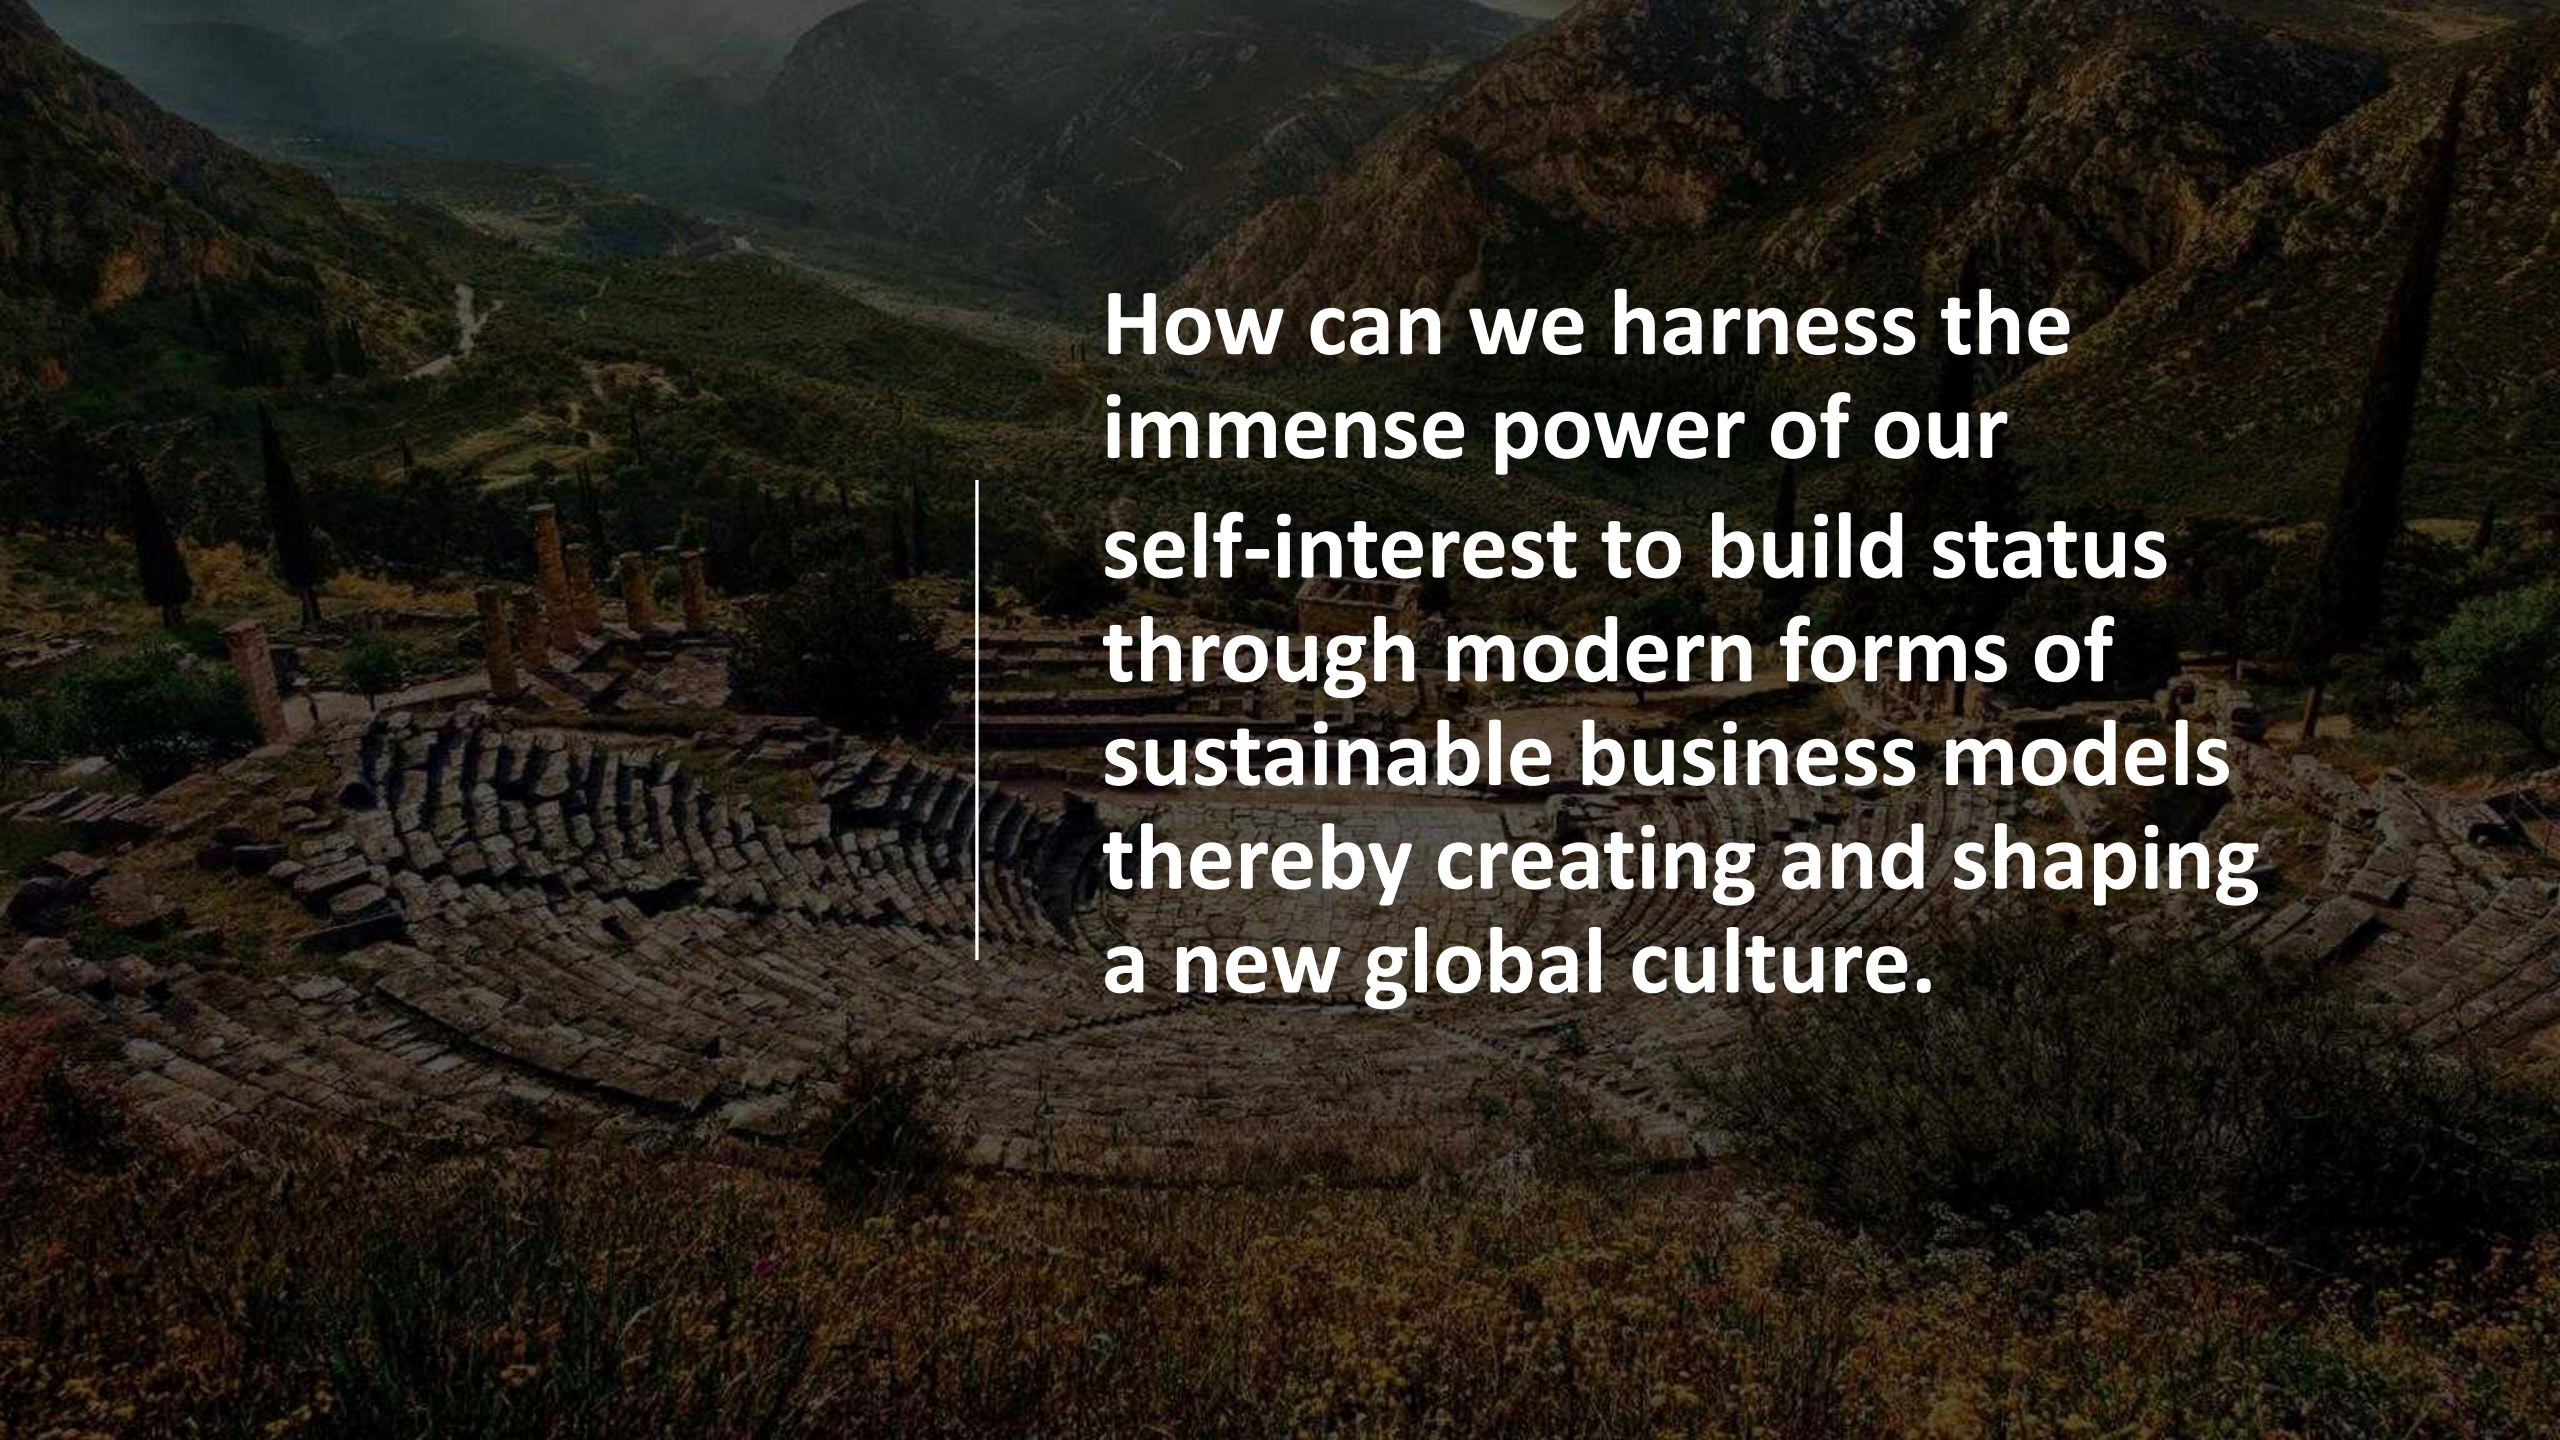

Watch on YouTube:

<https://youtu.be/CVRaBhODJSM>

Intervention Installation 002
Interactive dialog

A photograph of an ancient Roman amphitheater, likely the Amphitheater of Aspendos in Turkey, nestled in a lush green valley. The stone seating is arranged in a semi-circular pattern, and the surrounding landscape features steep, forested hills and a winding river in the distance. The image is overlaid with a semi-transparent dark rectangle containing white text.

**How can we harness the
immense power of our
self-interest to build status
through modern forms of
sustainable business models
thereby creating and shaping
a new global culture.**

Big Data, Analysis, Exchange

Cycle 3

Observing and studying Big Data in real time via data capture, analysts, scientists, and policy makers, assess, interpret, and identify new and previously unseen relationships resulting in additional content to the physical and digital creative dialog inspiring new interventions.

The background is a dark blue field filled with a complex network of white and yellowish lines and dots, resembling a data network or a molecular structure. The lines connect various points, some of which are highlighted with a warm yellow glow. The overall effect is one of a vast, interconnected digital space.

Big Data

- Using the game engine, global positioning, contemporary data, historical data, algorithms, and predicative analytics, the data regarding human flow dynamics patterns are extrapolated into visualizations and outputs to create individual pieces of art to advance machine learning and AI, and to inspire the work of other creatives, scientists, activists, policy makers, thought leaders and the public.
- These data sets are translated into geospatial expressions that can be projected onto static and kinetic art, structures, public spaces, and in the digital environment. Movement and interactions in the physical and digital space, create real time data sets which result in reactions that are interpreted to represent various other visualizations and manifestations of the data and activities resulting in outputs such as kinetic light panels, lights that are controlled and colored to illuminate the public space, online visualizers, computer drawn art, or music that other artists may create too.
- The output of this flow dynamics information and resulting flow dynamics data creates another opportunity for creative assets that are beamed to artist studios and other intervention sites around the world. Other works positioned on the earth and data sets from other sites (such as migration patterns, temperature change, resource extraction, extinction events, and human impacts (such as war and refugee movement), can exchange dialog and content with this data set resulting in other interpretations and extrapolations into visualizations of light, sound, and movement at various site. Another example would be 5 axis sculpting of forms by a kuka arm that can sculpt abstract objects from this data.

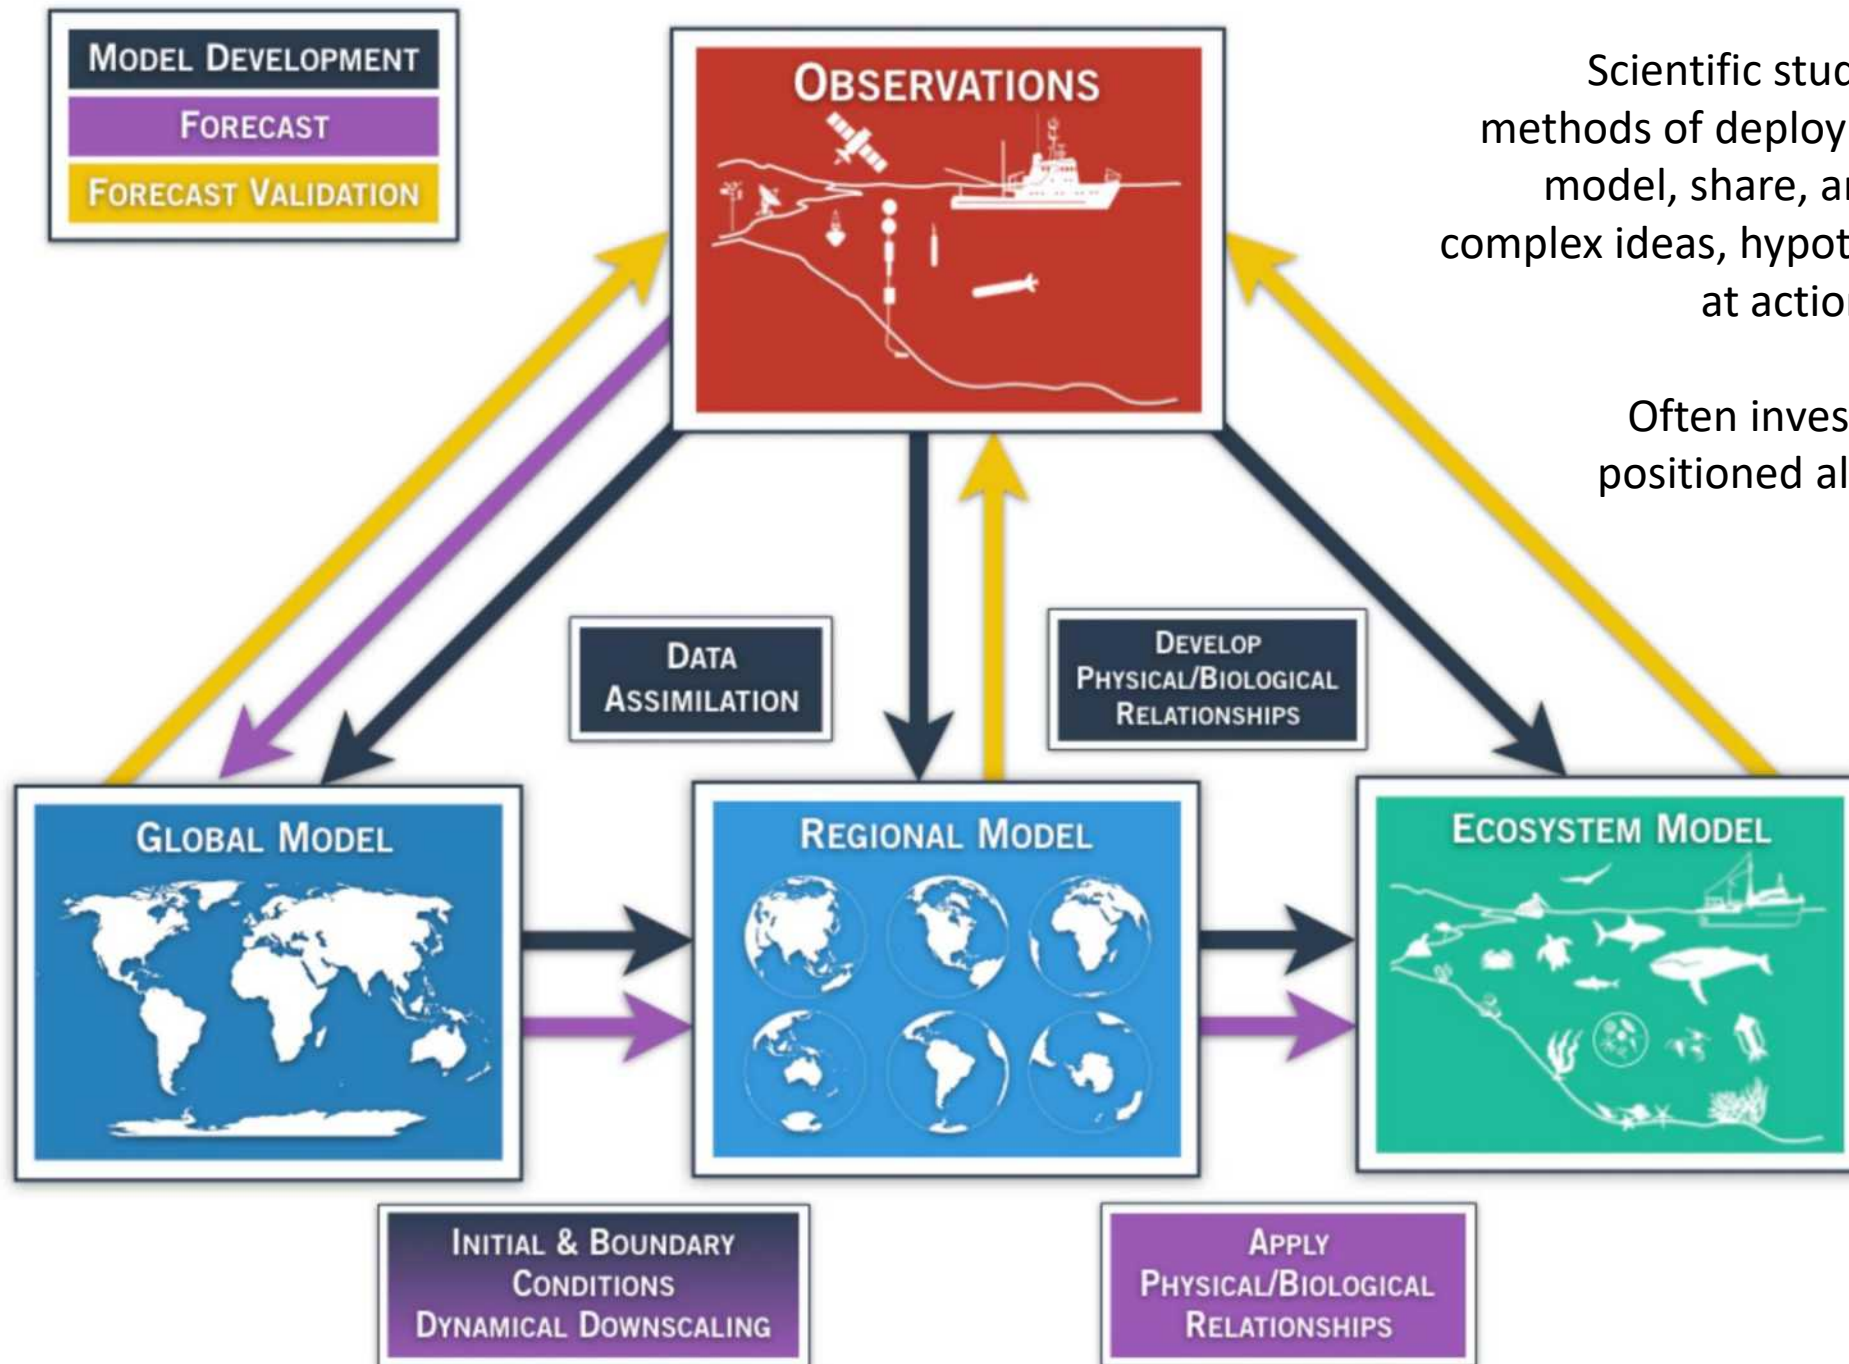

Watch on YouTube:
<https://youtu.be/Q7IJXZNmJbc>

- The outputs and interactions of site interventions 1 and 2 are beamed to other site installations, artist studios, scientists, data analysts.
- Using the game engine and complex algorithms, art, human interaction, big data, machine learning, AI, global data sets, historical data, and predictive analytics are synthesized and extrapolated to create new content that is shared globally in support of creating new creative works in real time.

Intervention installation sites are positioned all over the world. Each is in real time communication with the other, influencing each other, through the collaborative interaction of artist , guest, interface, data, interpretation, and realization through the game engine , internet and mobile technologies.

Scientific study follows similar methods of deployment to explore, model, share, and communicate complex ideas, hypothesis, and arrive at actionable outcomes.

Often investigation sites are positioned all over the world.

Hot Spots

Crisis In Real Time

Cycle 4

Activists, journalists, affected communities, and analysts collect and capture live events around the world in real time to live stream and share this content with the artists and guests.

For example: the Australian fires, Isis, terrorism, Borneo burning, collapse of the ice sheet, destruction of the Monarch butterfly's primary breeding ground, economic stratification of democratic countries, the rise of authoritarianism, (etc, etc).

Experience Plan

Global Hot Spots

- **Climate**

- Antarctica
- Great Barrier Reef
- Kilimanjaro
- Patagonia
- Oceania

- **Refugee**

- Syria Human
- Myanmar Human
- Mexico Monarchs
- North Pole Polar Bears

- **Thought**

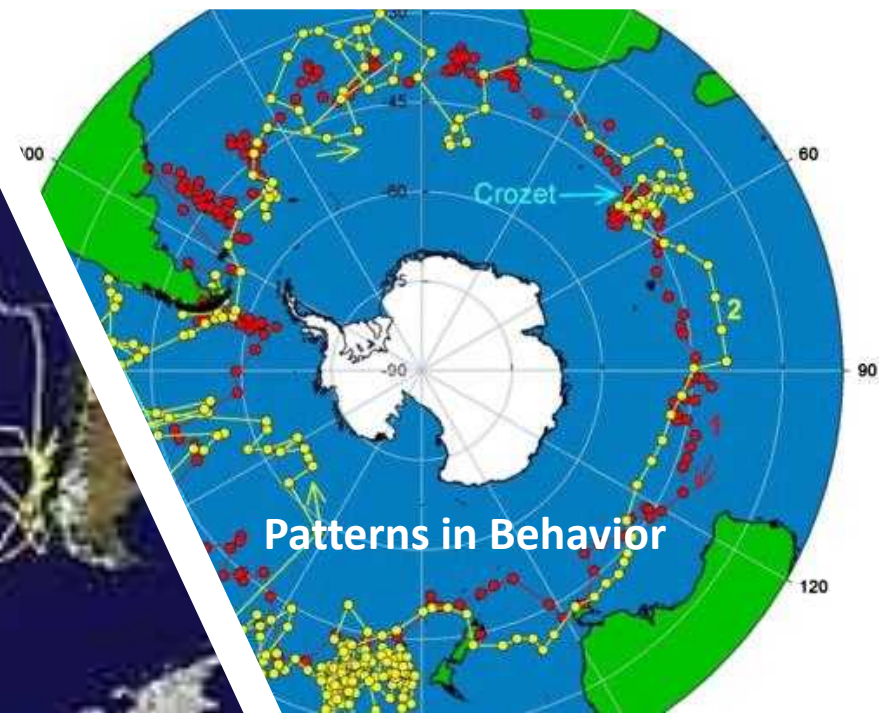

- Science vs fascism United States
- War on imagination

Animal Migration and Population Density

Flow Dynamics

Patterns in Behavior

What is the data telling us?

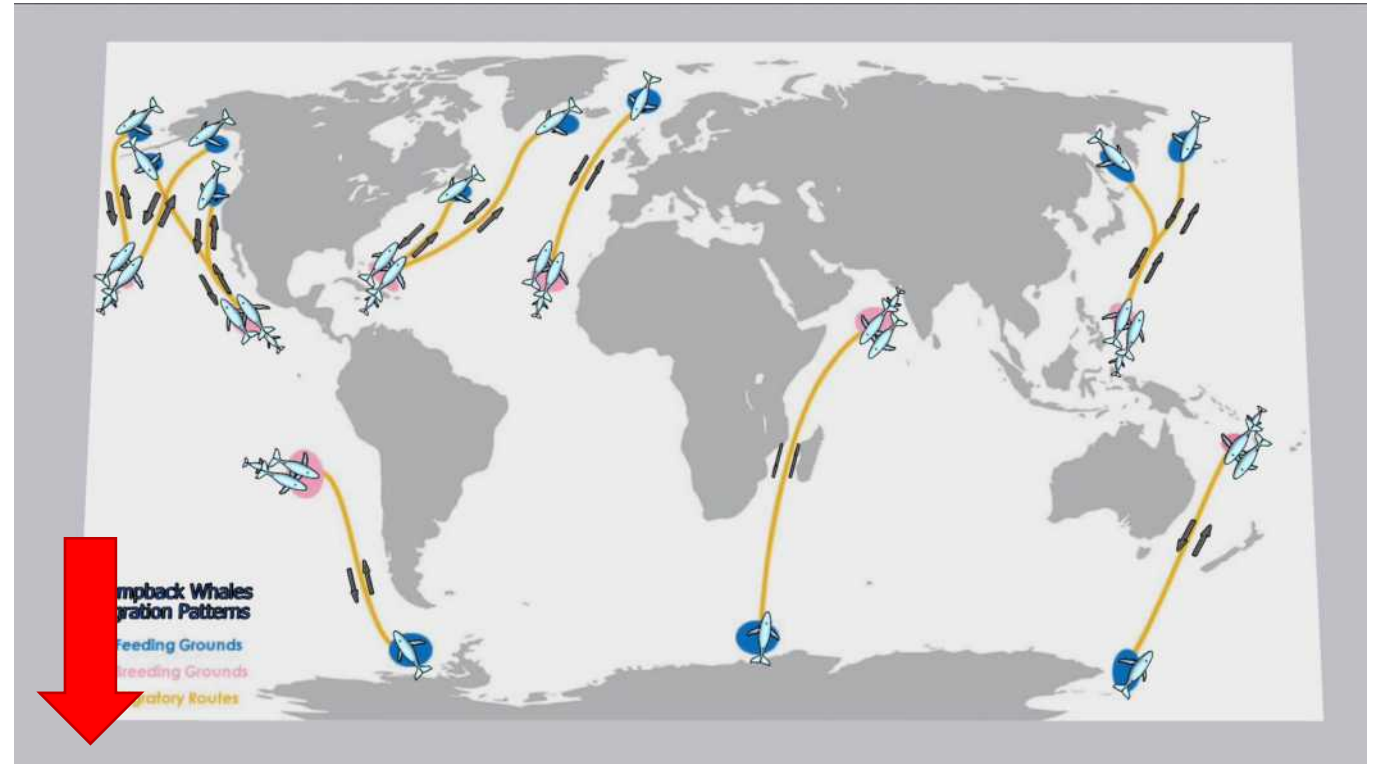

**How can we collect,
observe, learn, interpret,
extract, repurpose, use,
and recreate with it?**

**How can we use this data
to build bridges between
cultures, races, beliefs, and
lifeforms?**

- Using the game engine, global positioning, contemporary data, historical data, algorithms, and predicative analytics, the data regarding migrations patterns are extrapolated into visualizations and outputs to create individual pieces of art to advance machine learning and AI, and to inspire the work of other creatives, scientists, activists, policy makers, thought leaders and the public.
- These data sets are translated into geospatial expressions that can be projected onto static and kinetic art, structures, public spaces, and in the digital environment. Movement and interactions in the physical and digital space, create real time data sets which result in reactions that are interpreted to represent various other visualizations and manifestations of the data and activities resulting in outputs such as kinetic light panels, lights that are controlled and colored to illuminate the public space, online visualizers, computer drawn art, or music that other artists may create too.
- The output of this migration information and resulting migration / movement data creates another opportunity for creative assets that are beamed to artist studios and other intervention sites around the world. Other works positioned on the earth and data sets from other sites (such as migration patterns, temperature change, resource extraction, extinction events, and human impacts (such as war and refugee movement), can exchange dialog and content with this data set resulting in other interpretations and extrapolations into visualizations of light, sound, and movement at various site. Another example would be 5 axis sculpting of forms by a kuka arm that can sculpt abstract objects from this data.

Global Intervention

Cycle 5

Globally located artists (physical material artists, maker artists, and digital artists) react to the upstream content and events to create new and resonant downstream artworks and offer another interface opportunity to the public in real time.

Powerful interactions and data converge in a creative explosion, resulting in multiple manifestations of new art, new ideas, empowering action and dialog which result in seeding an awakening for self actualization and change.

Experience Plan

A Call to Action

Cycle 7

Motivated, awakened, and enlightened via self actualization, people are inspired to make changes in their personal lives, community, and country leading to new horizons for the planet and all of its inhabitants.

A Call To Action

Evolution / Revolution

Perception

Awakening

Transformation

Interconnected

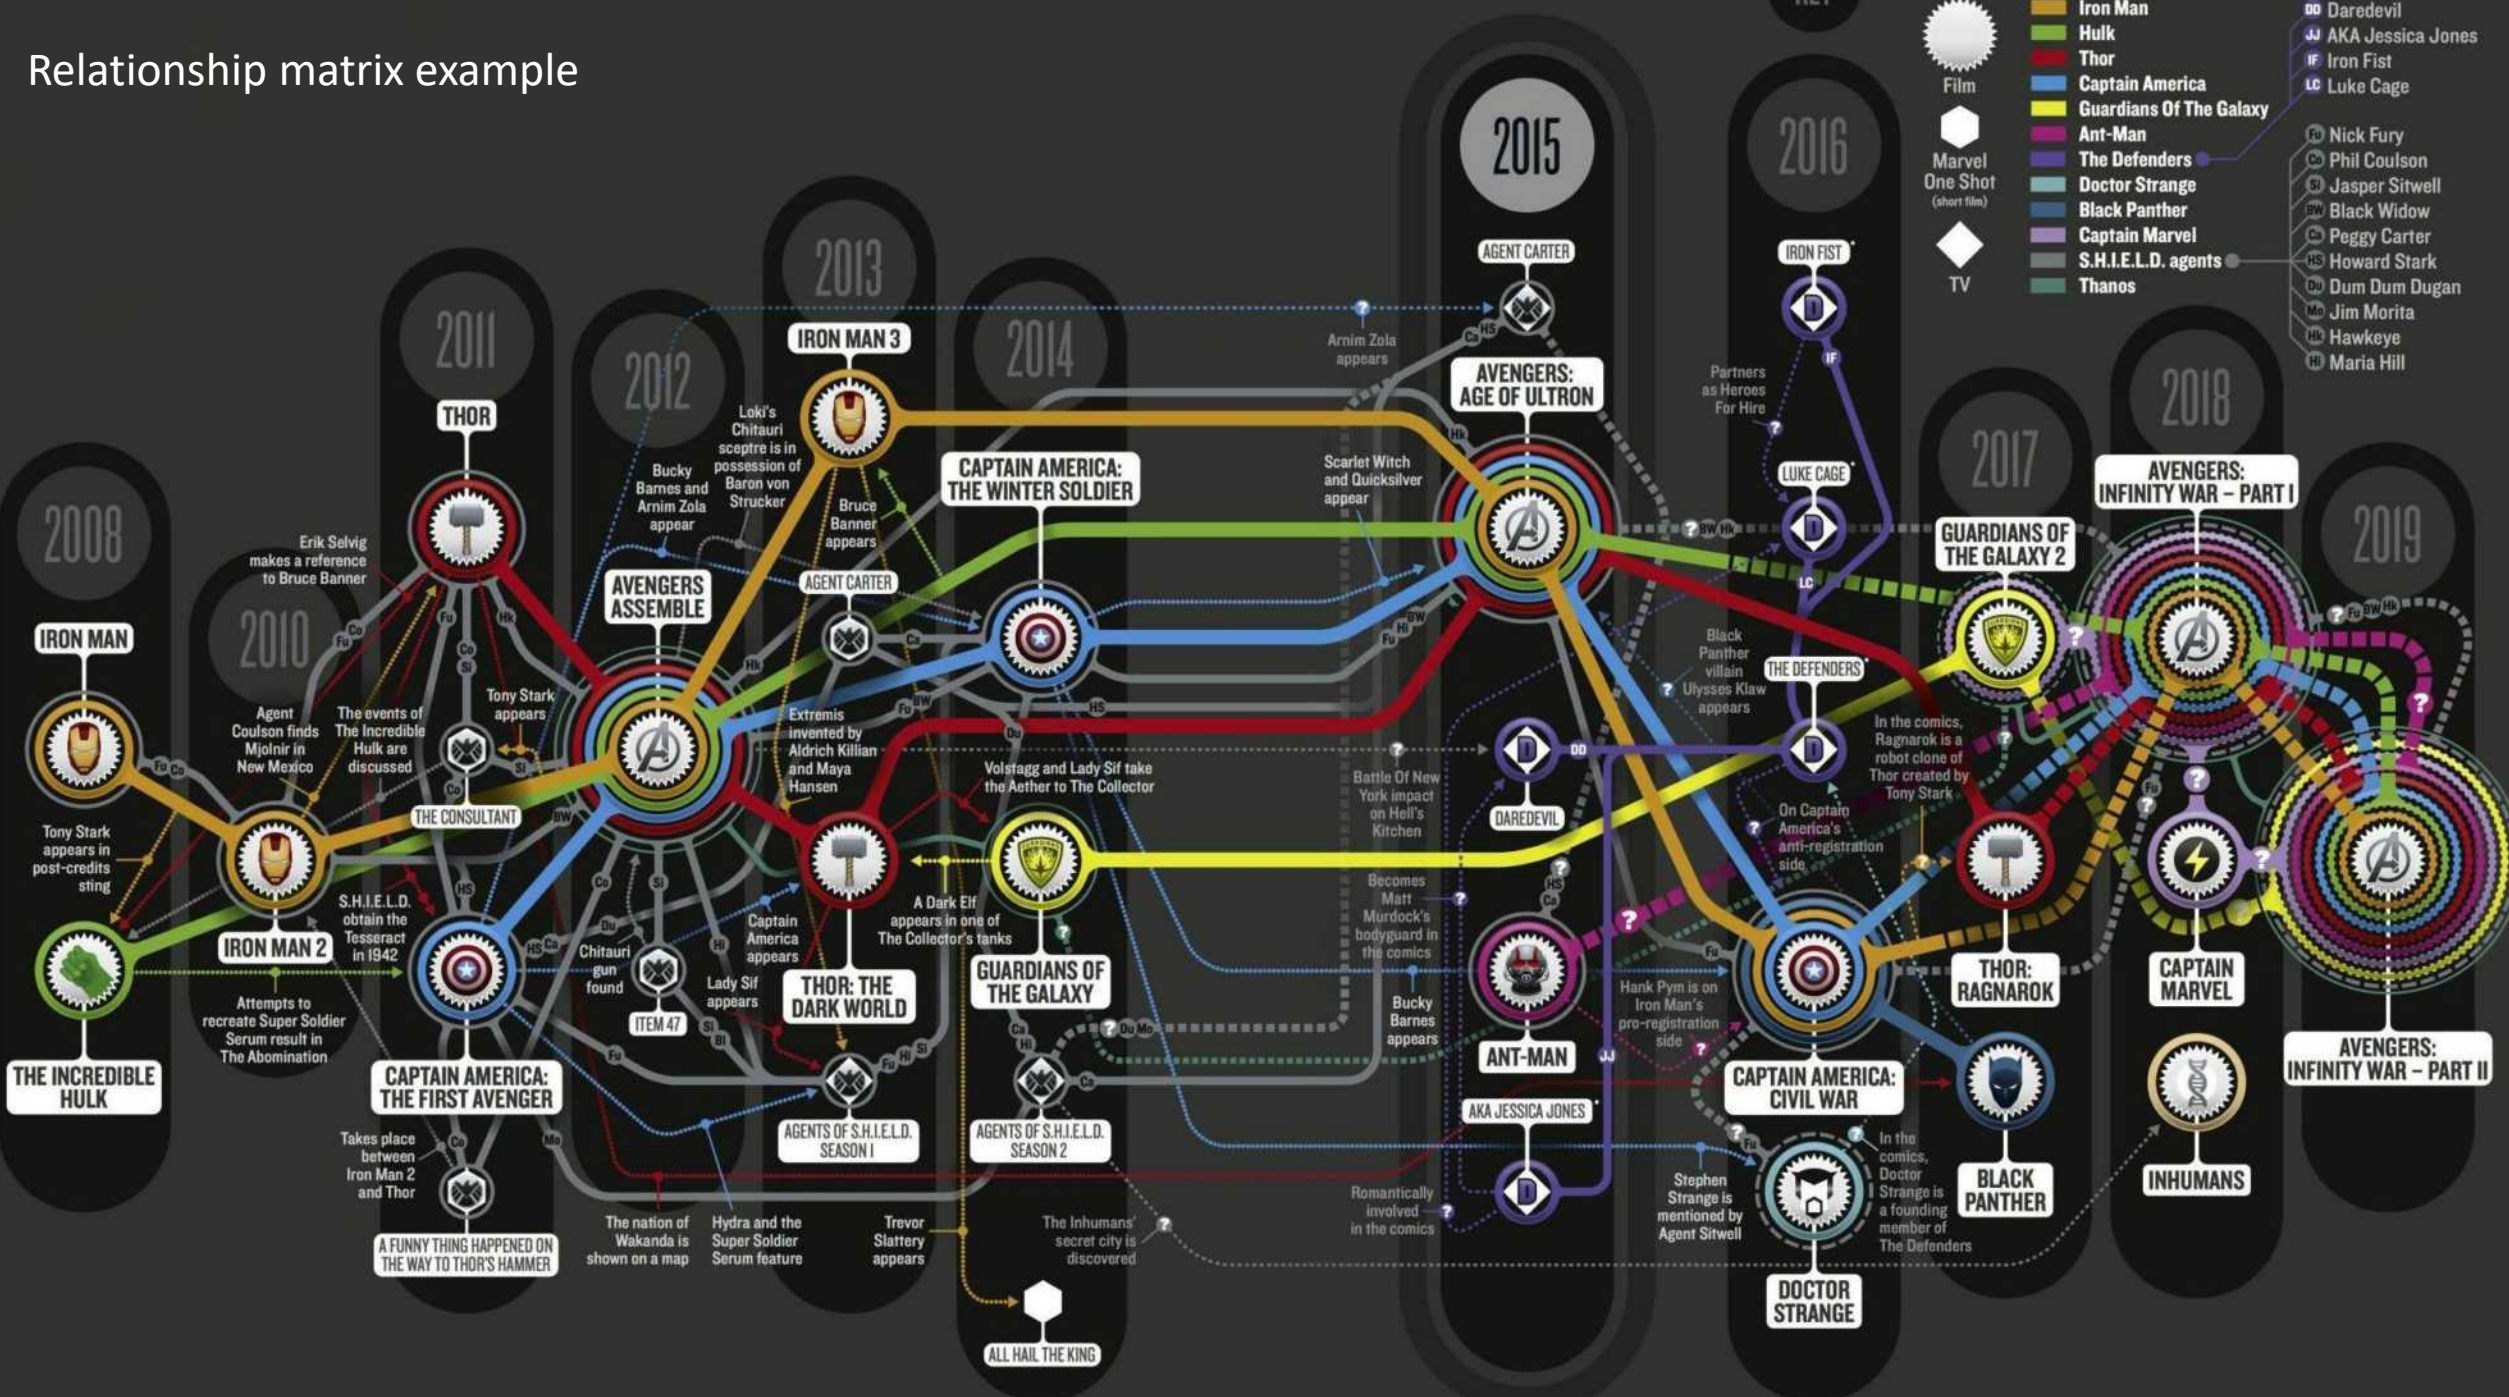

Ascendance

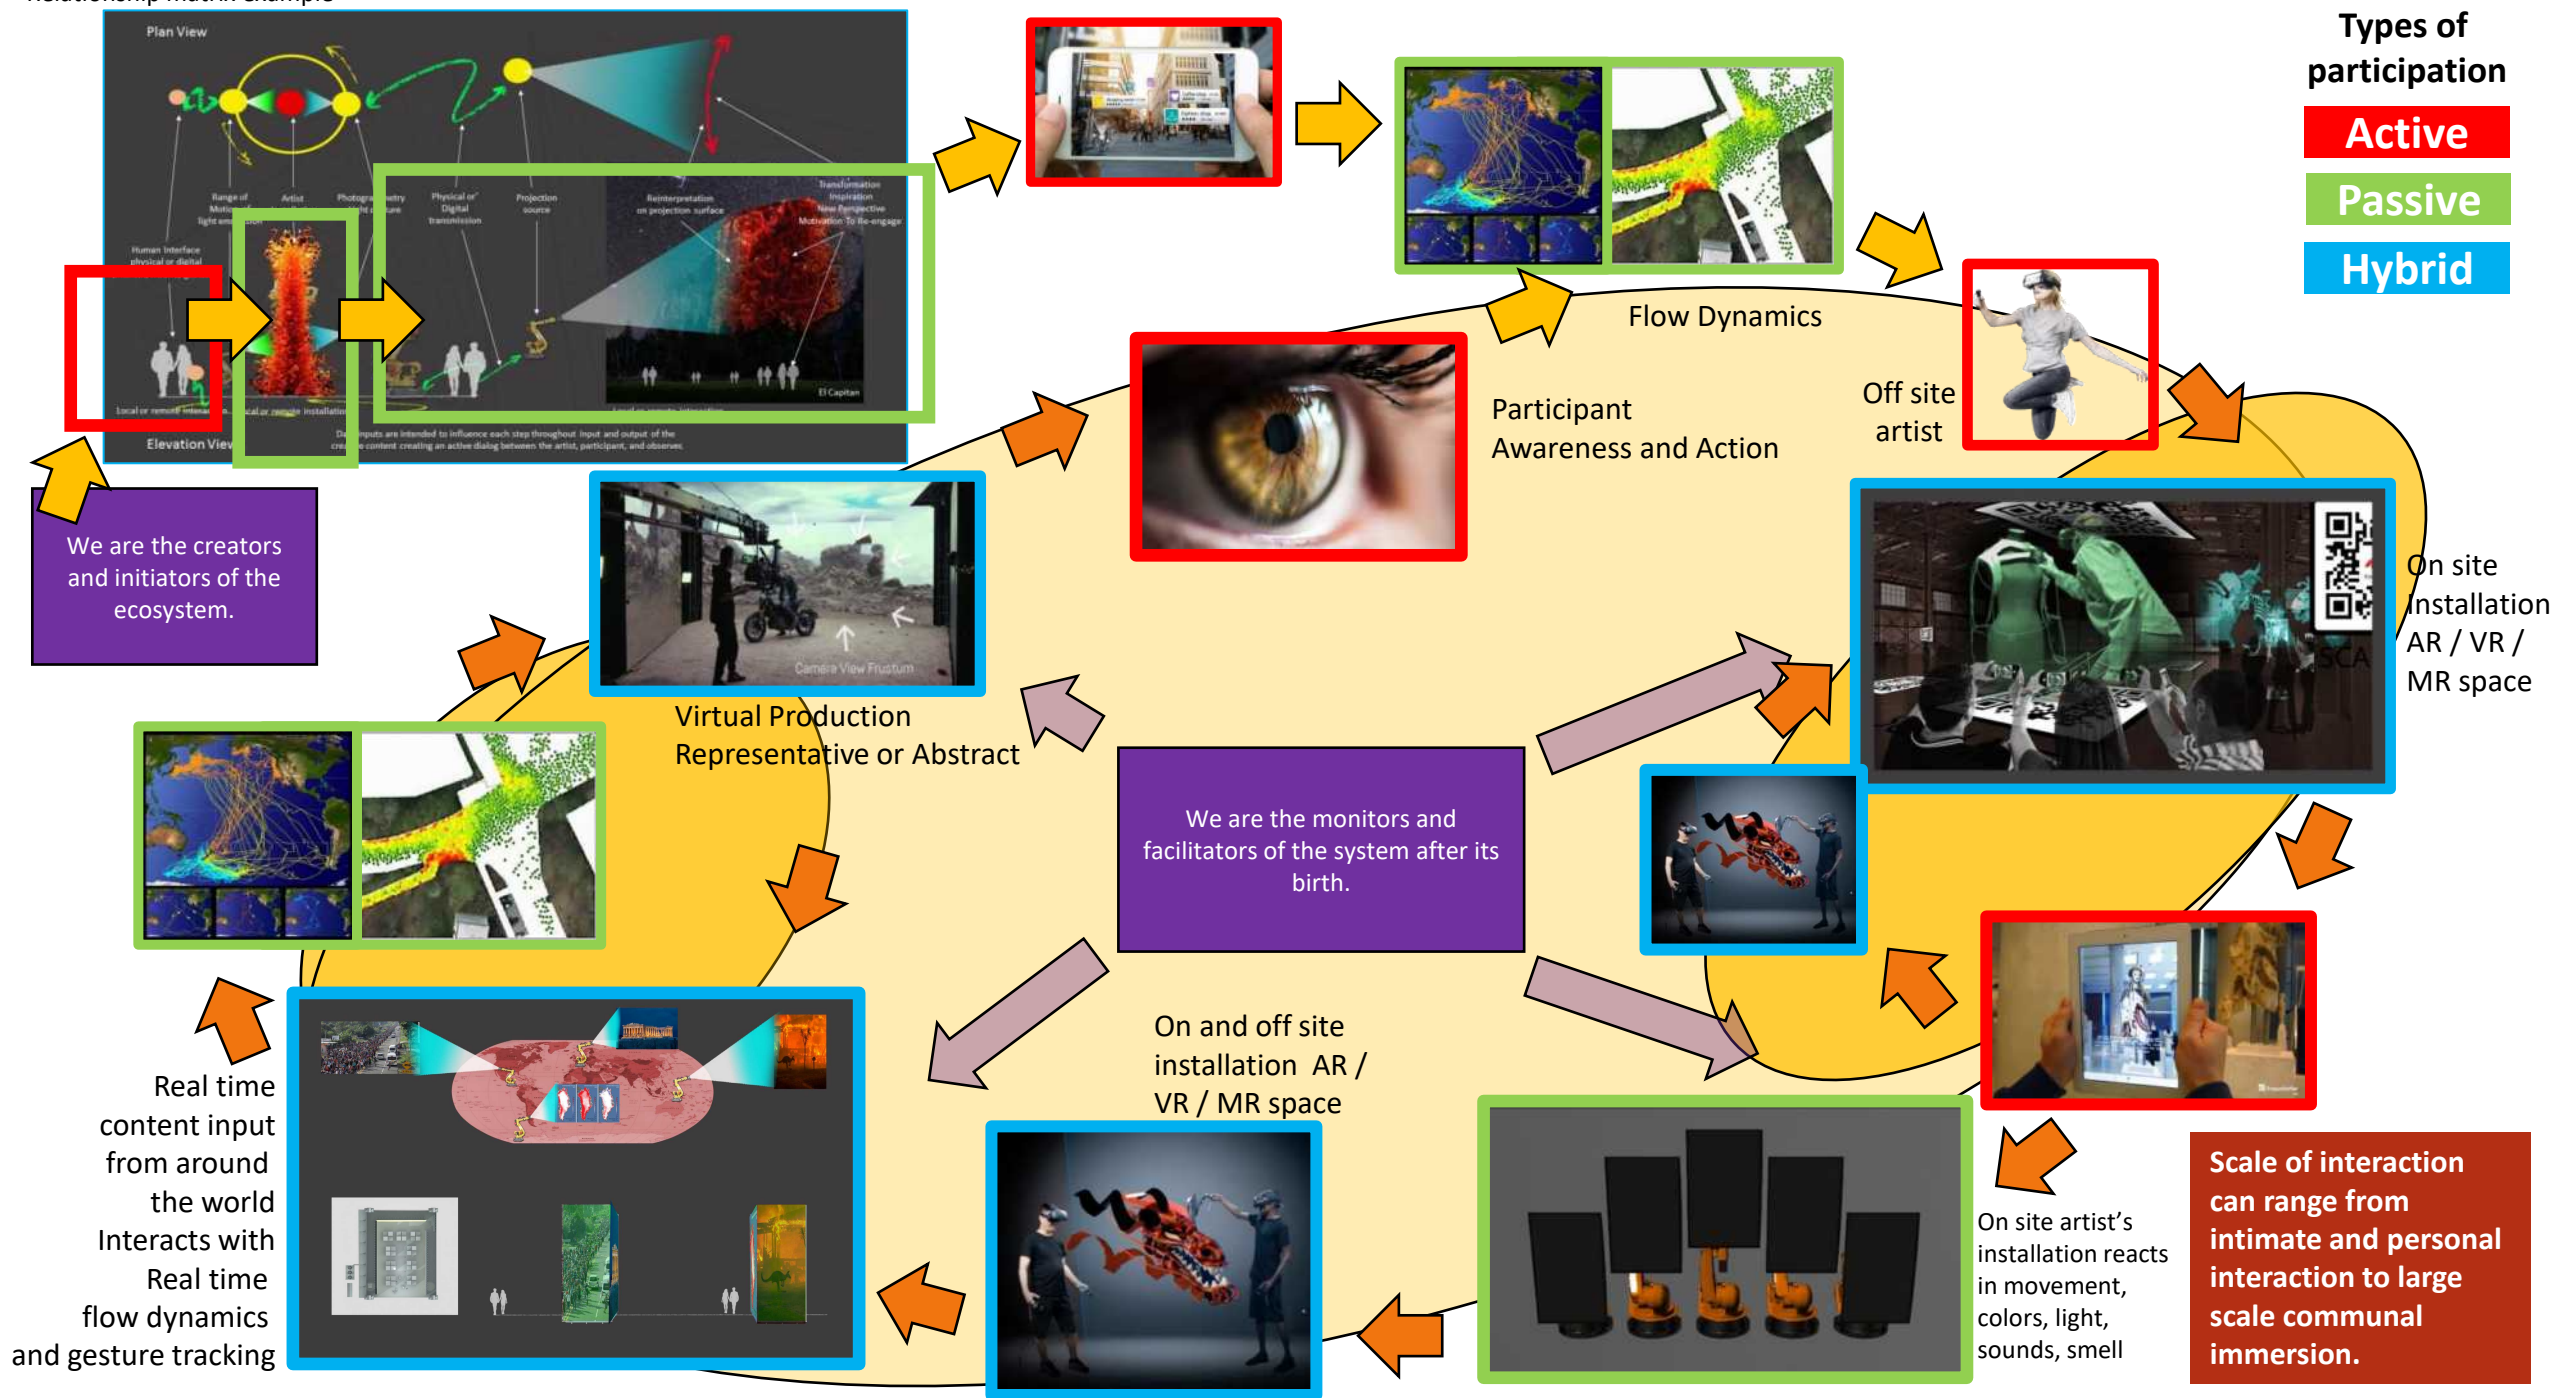

Transcendence

**How do these relationships
influence each other?
What is the connection?**

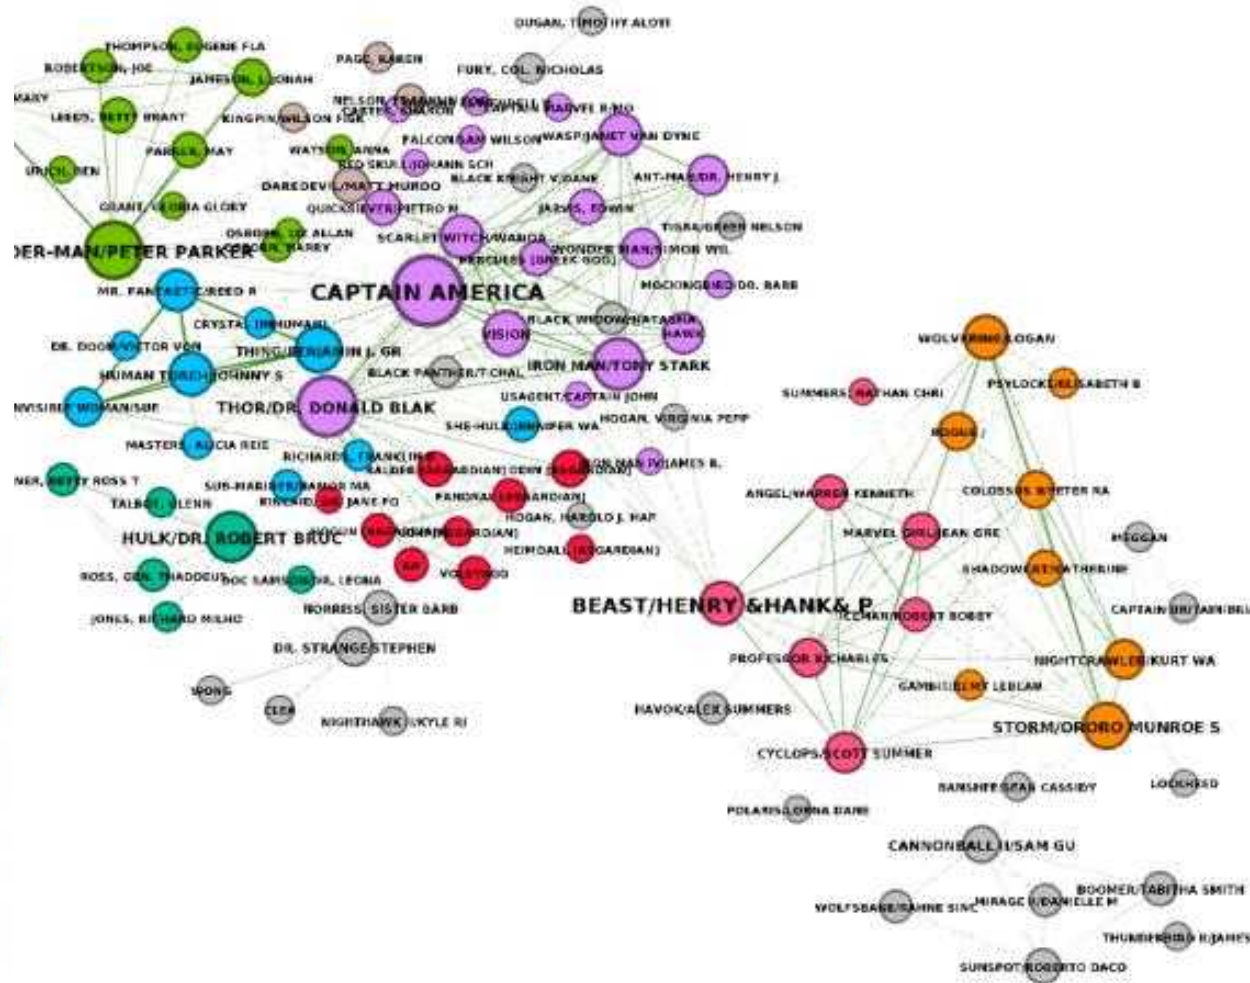

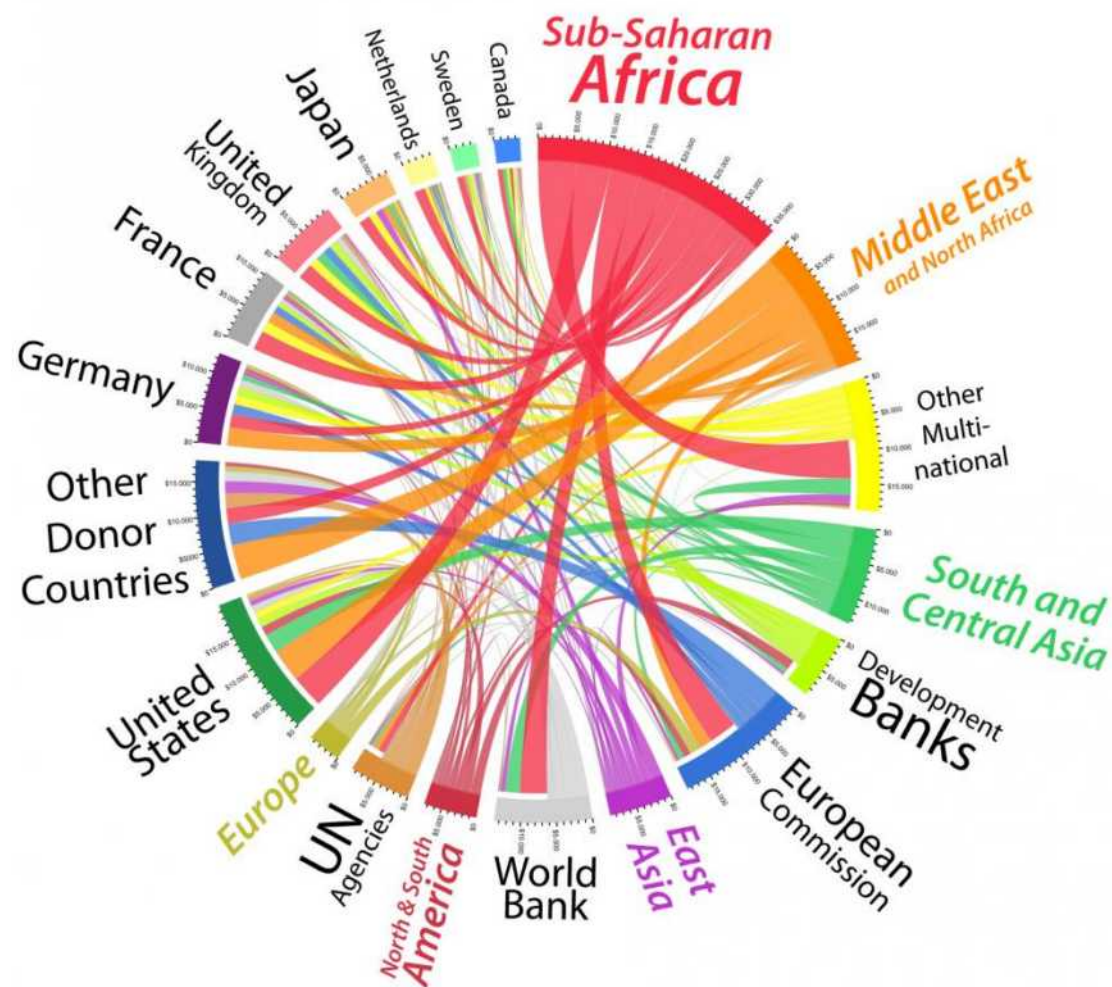

Relationship matrix example

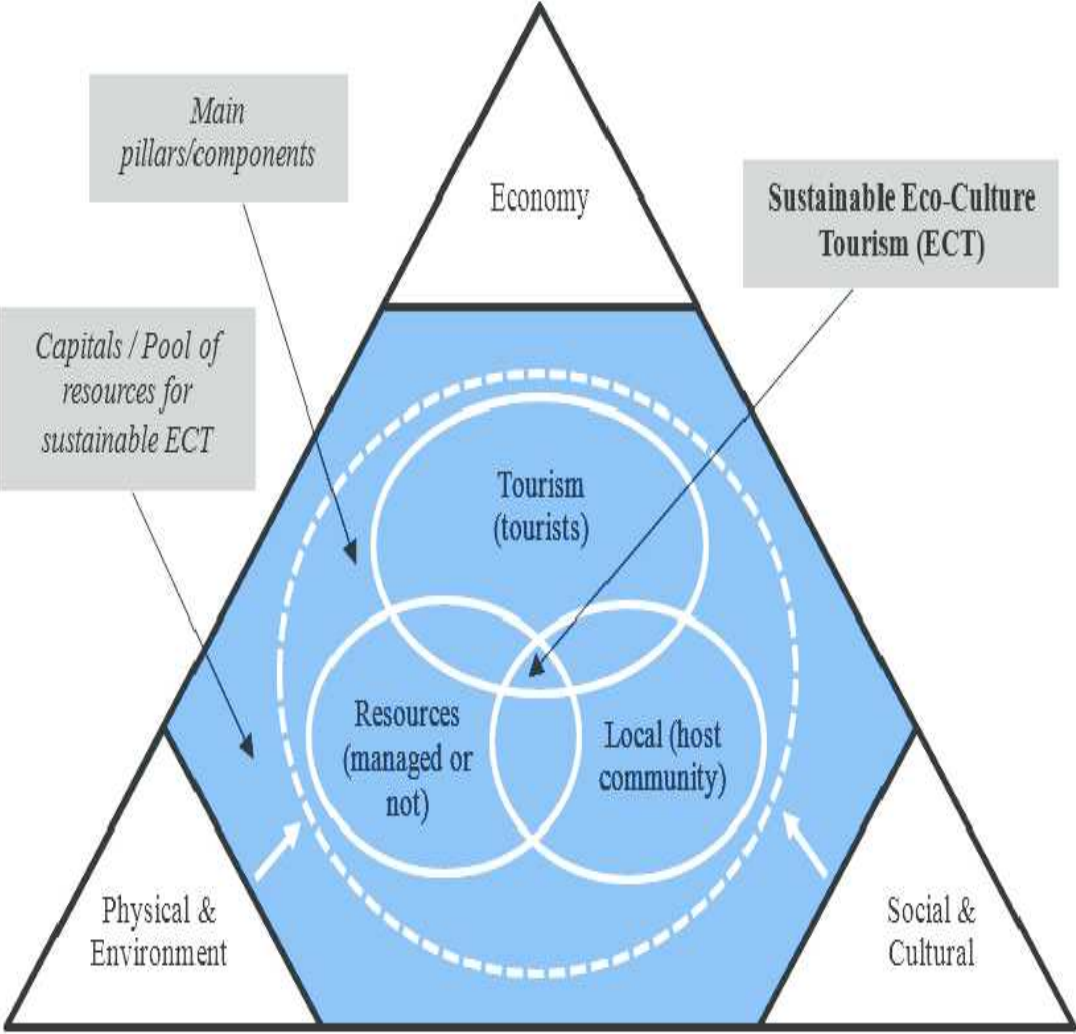

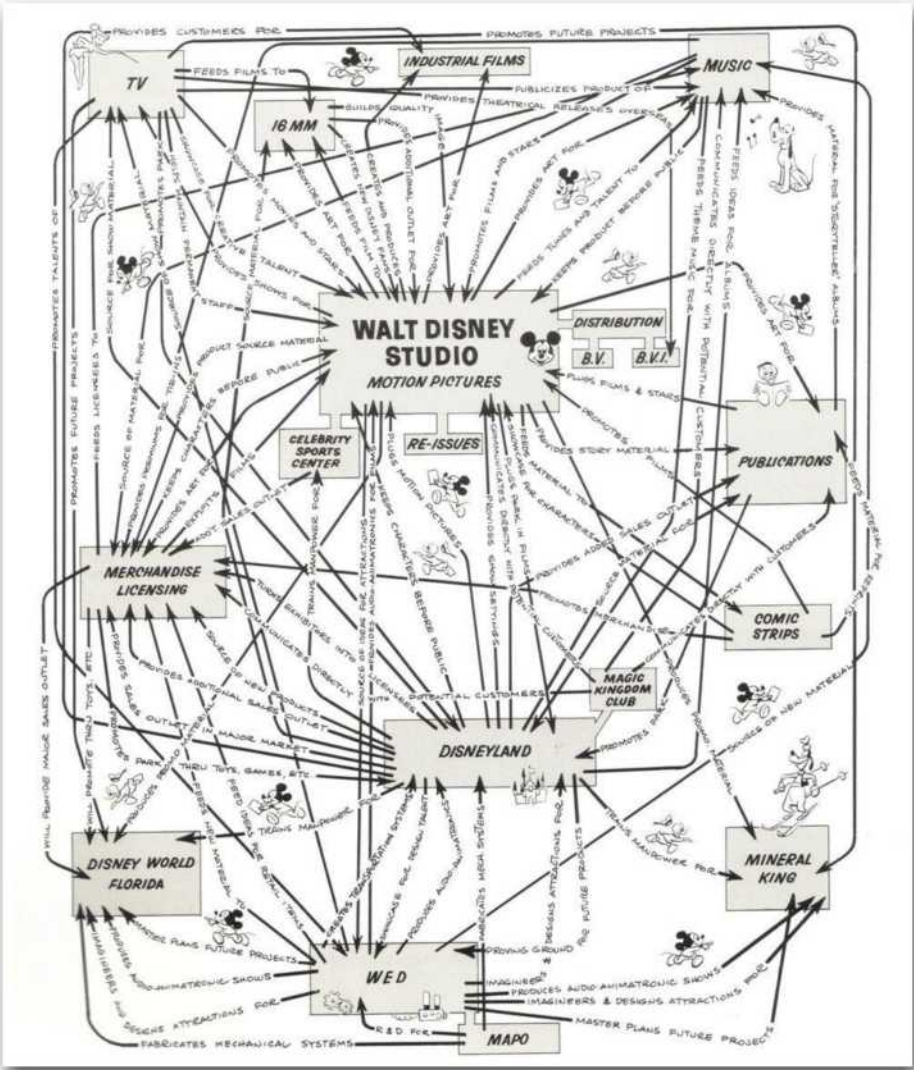

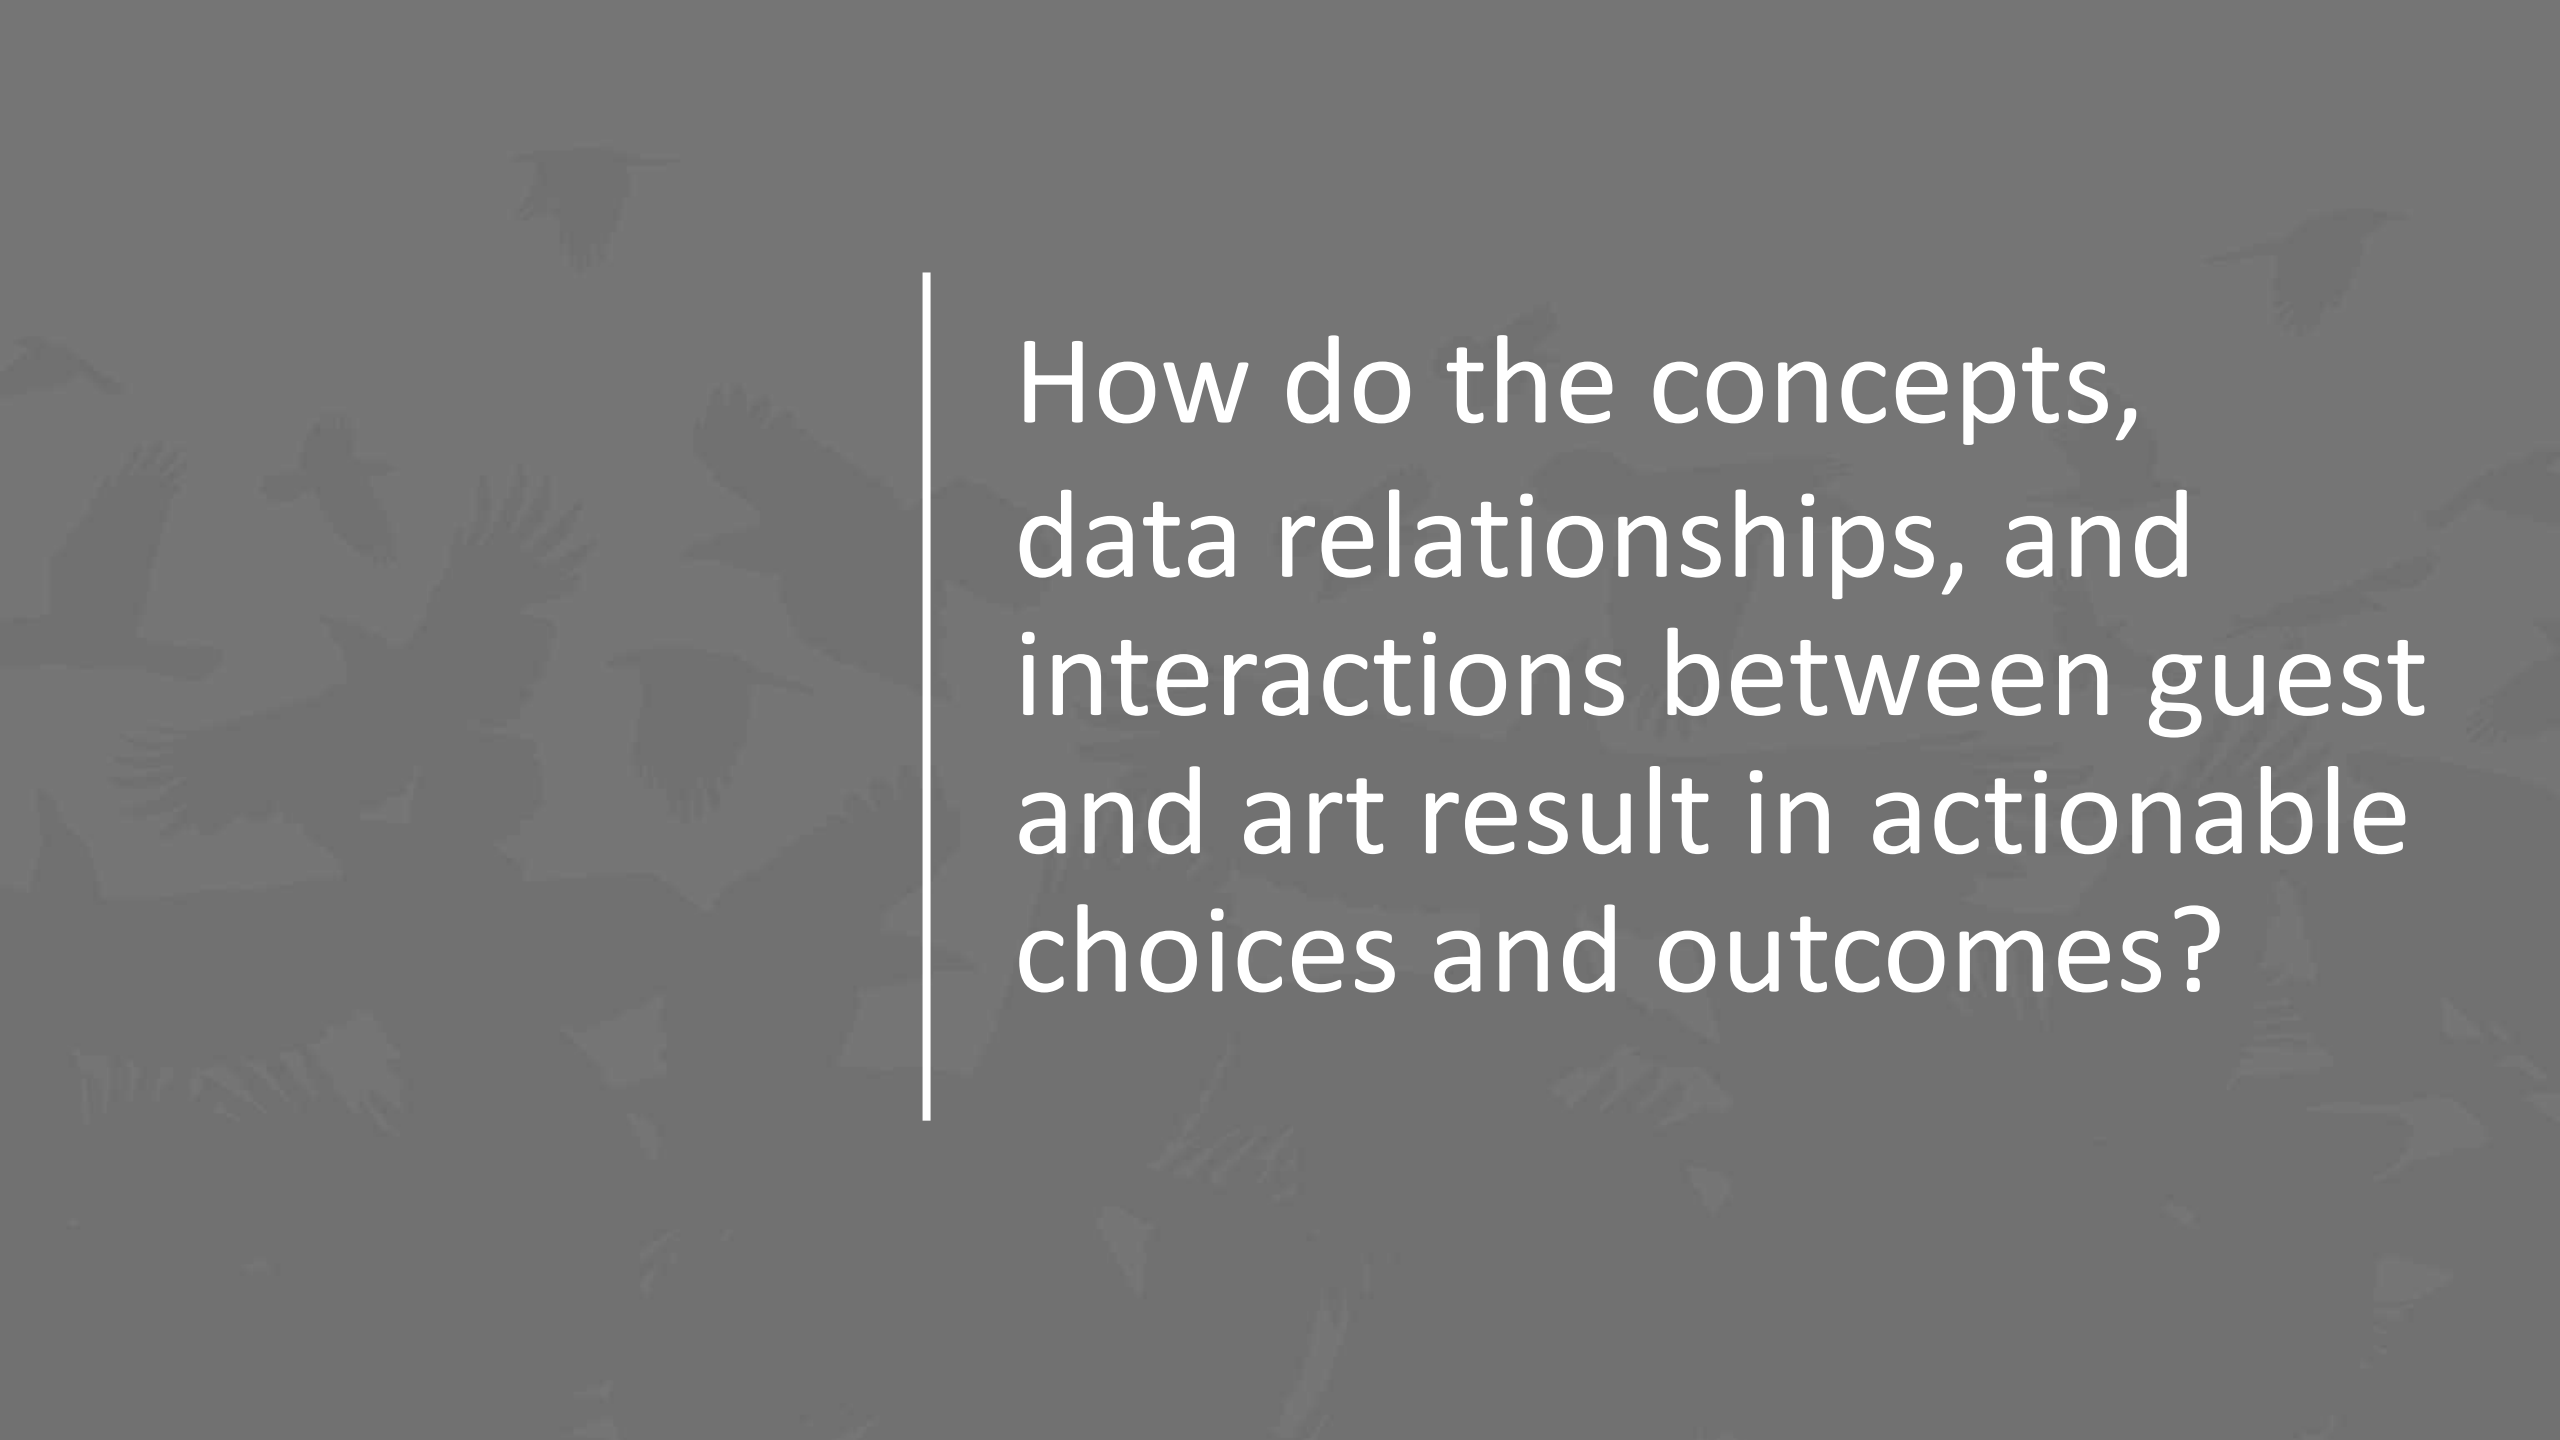

Where Does The Money Go?

A look at where **\$137 billion** in aid dollars went in 2007

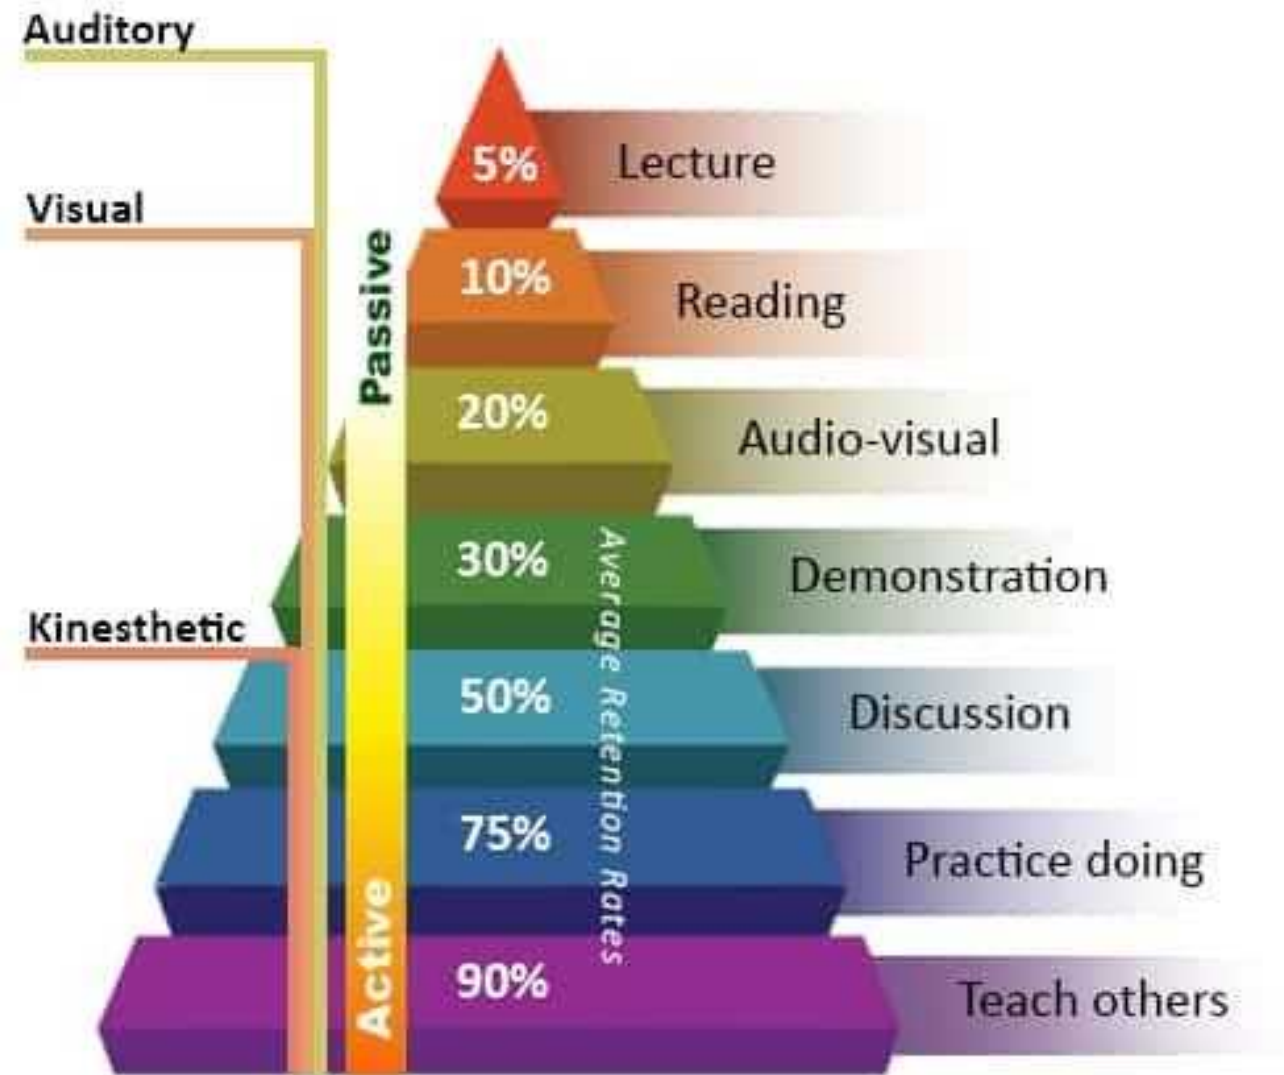

Relationship matrix example

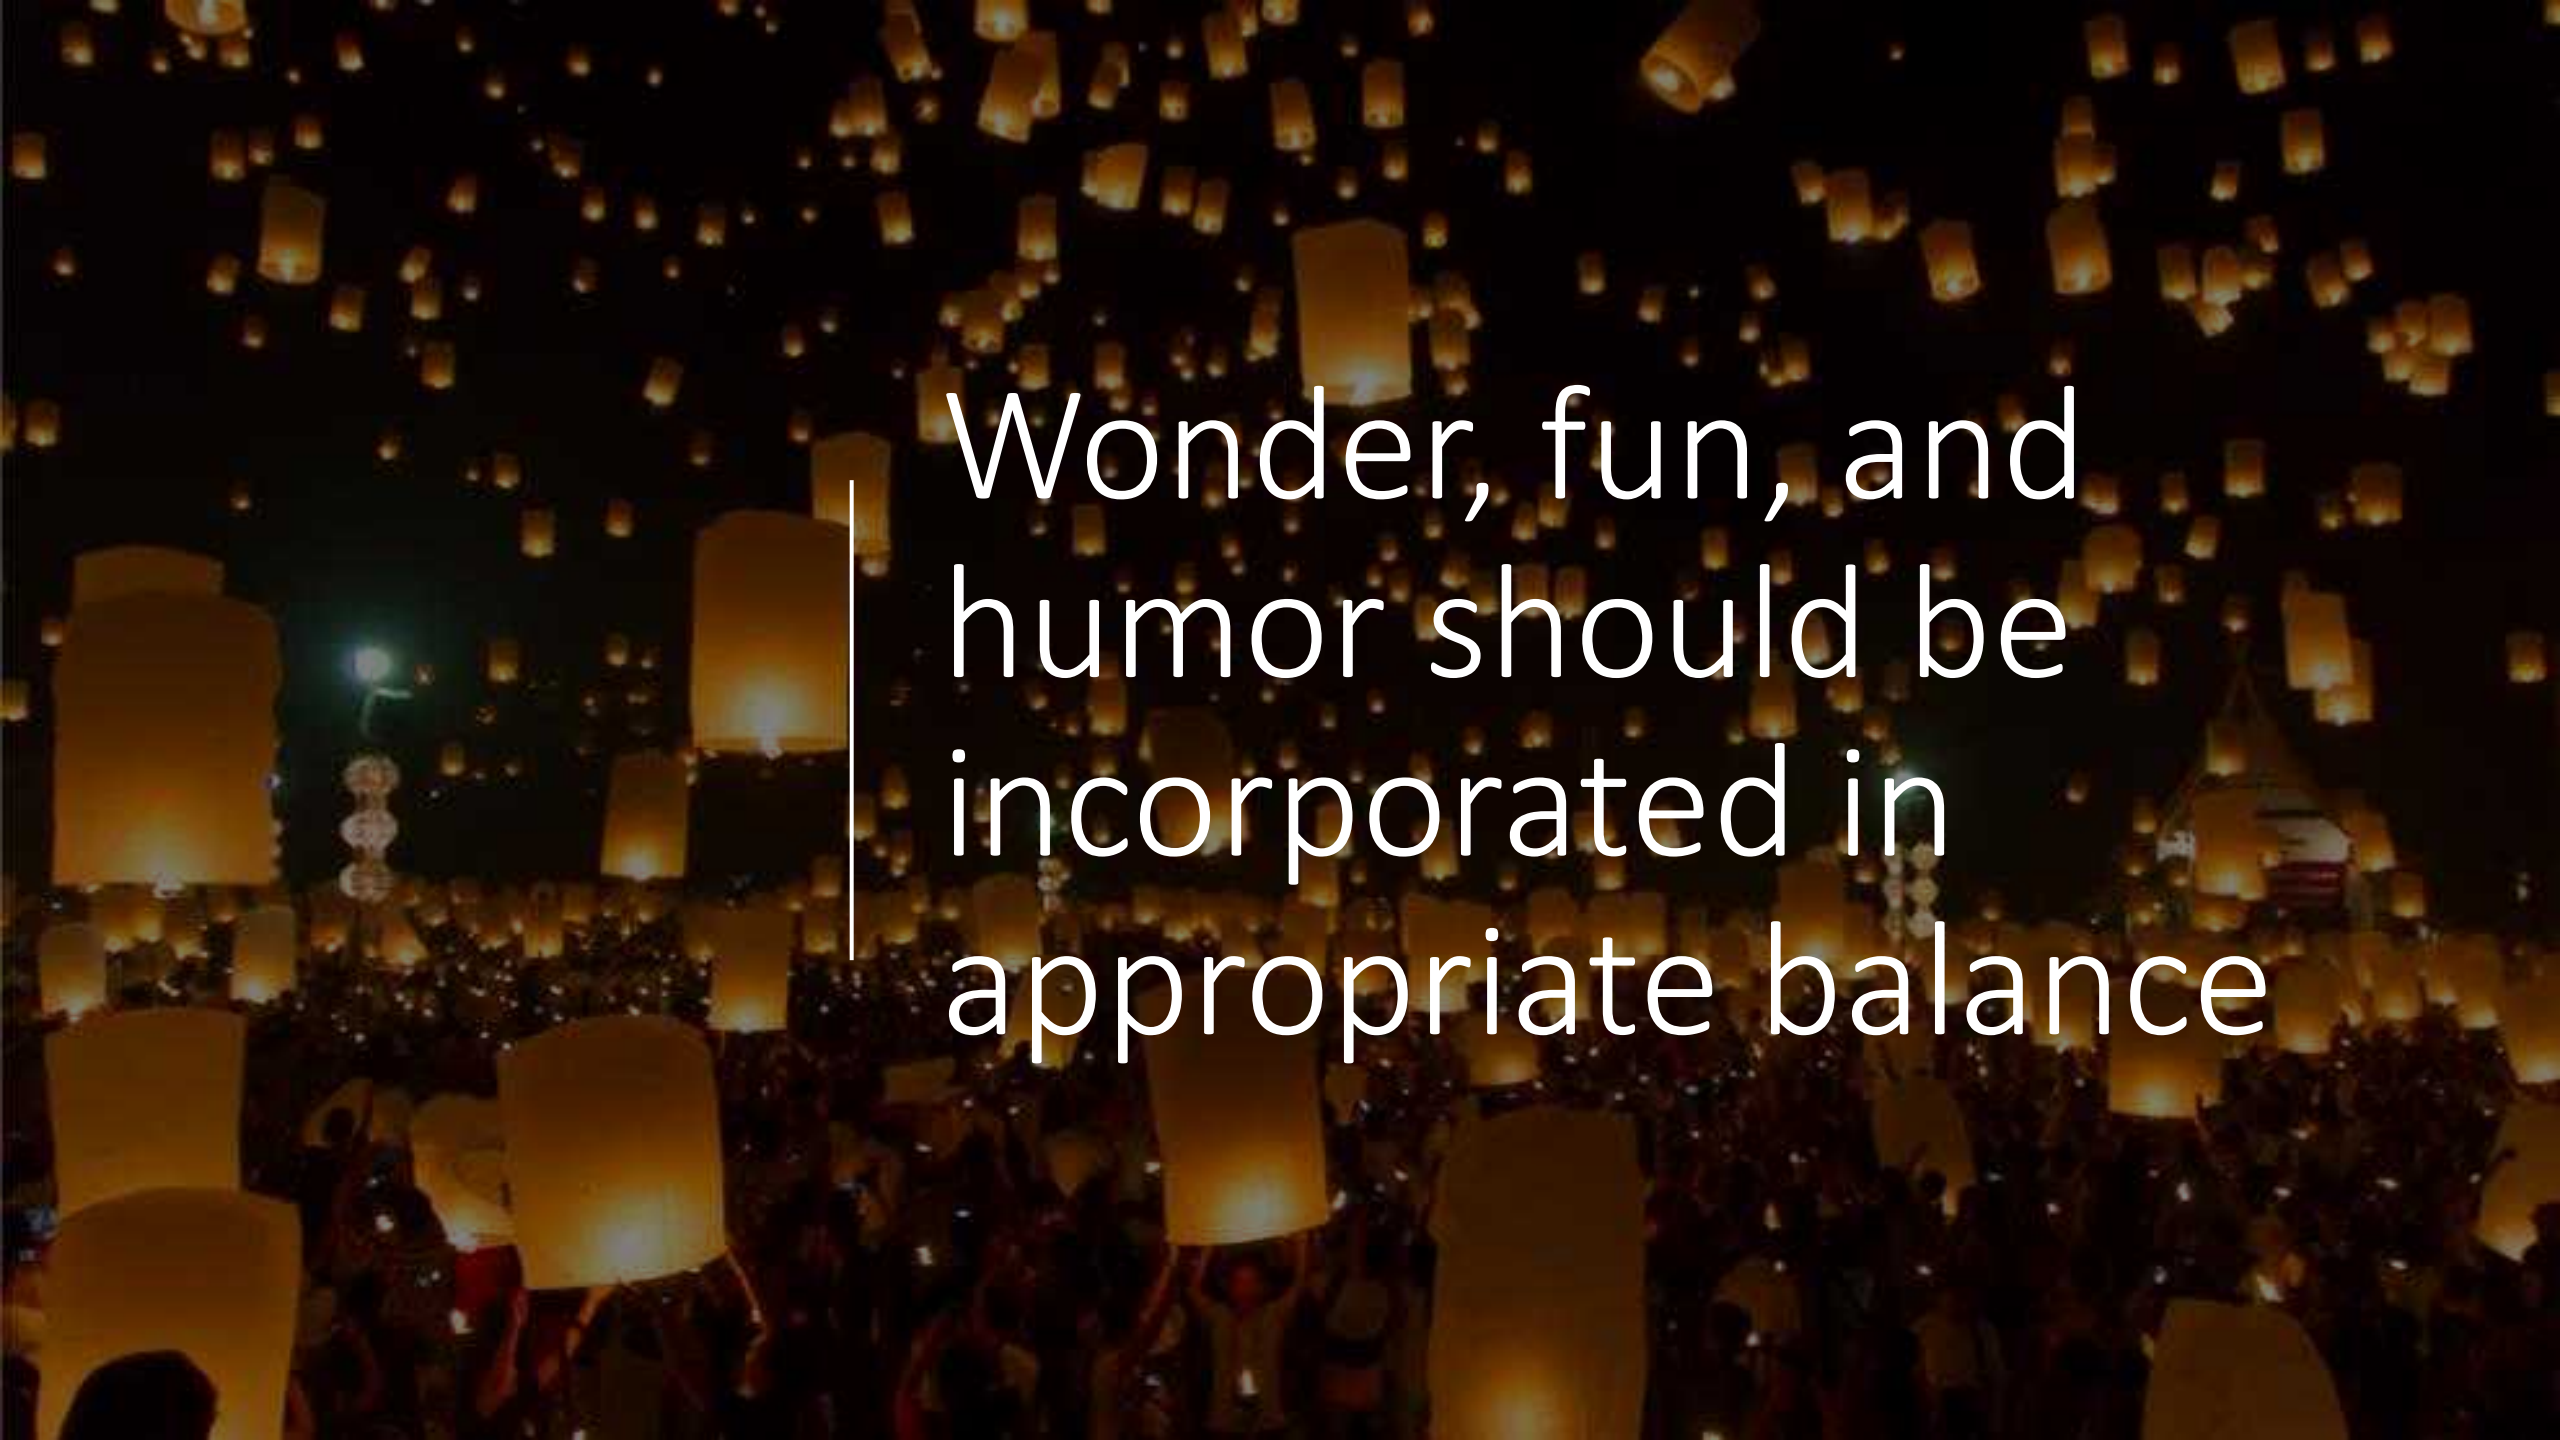

The background of the slide features a repeating pattern of dark silhouettes of birds in flight, scattered across a dark gray field. A thin white vertical line is positioned to the left of the text.

How do the concepts,
data relationships, and
interactions between guest
and art result in actionable
choices and outcomes?

Creating a platform where participants and observers have the opportunity to teach other is the path to action.

Adapted from the NTL Institute of Applied Behavioral Science Learning Pyramid

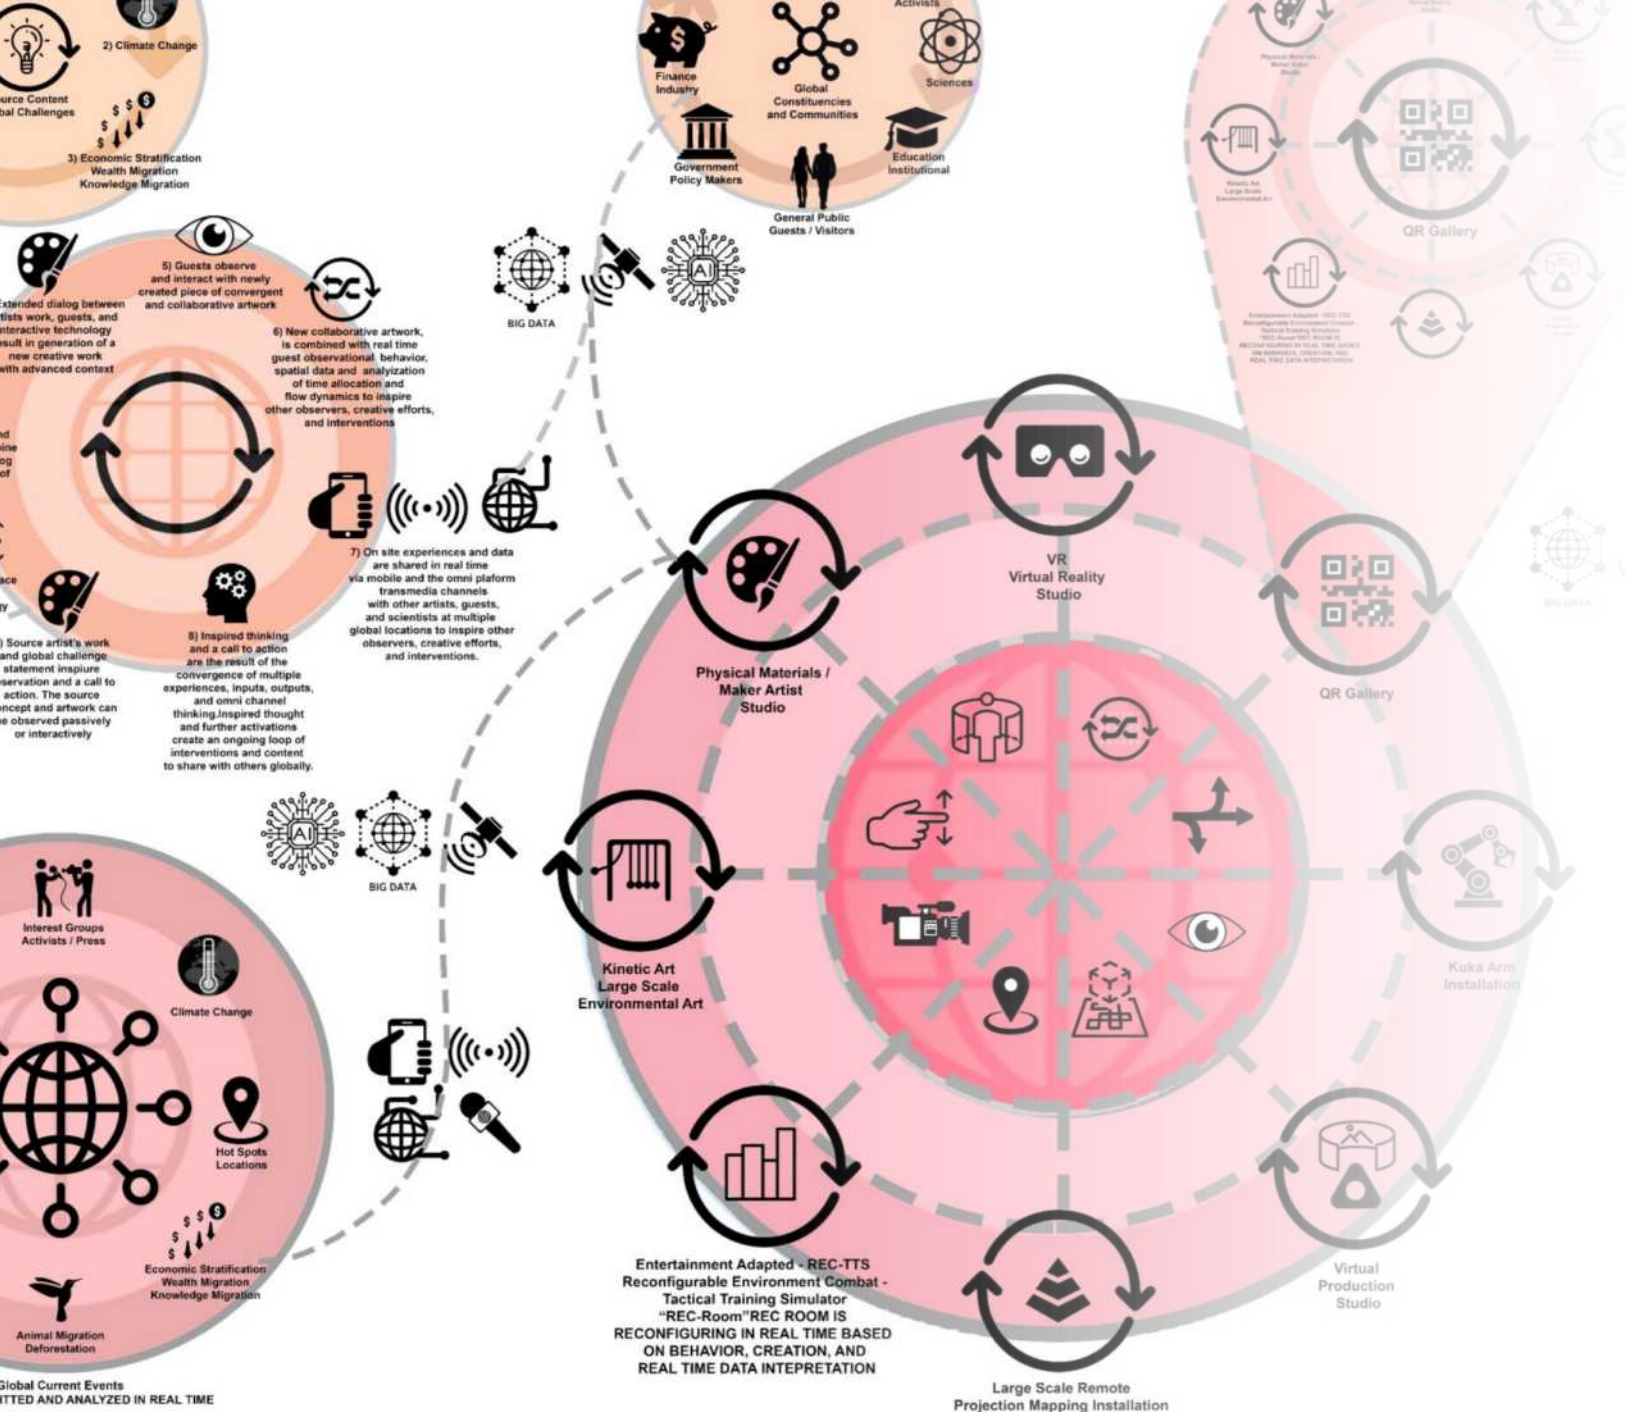

A large crowd of people at night releasing numerous glowing paper lanterns into the dark sky. The lanterns are small, rectangular, and emit a warm, yellow light. They are scattered throughout the frame, creating a dense field of light against the dark background. The crowd is visible at the bottom, with many people holding up their phones to capture the scene. The overall atmosphere is festive and celebratory.

Wonder, fun, and
humor should be
incorporated in
appropriate balance

Many small people, in small places,
doing small things can change the
world.

— *Eduardo Galeano* —

Where does
the game
engine fit in?

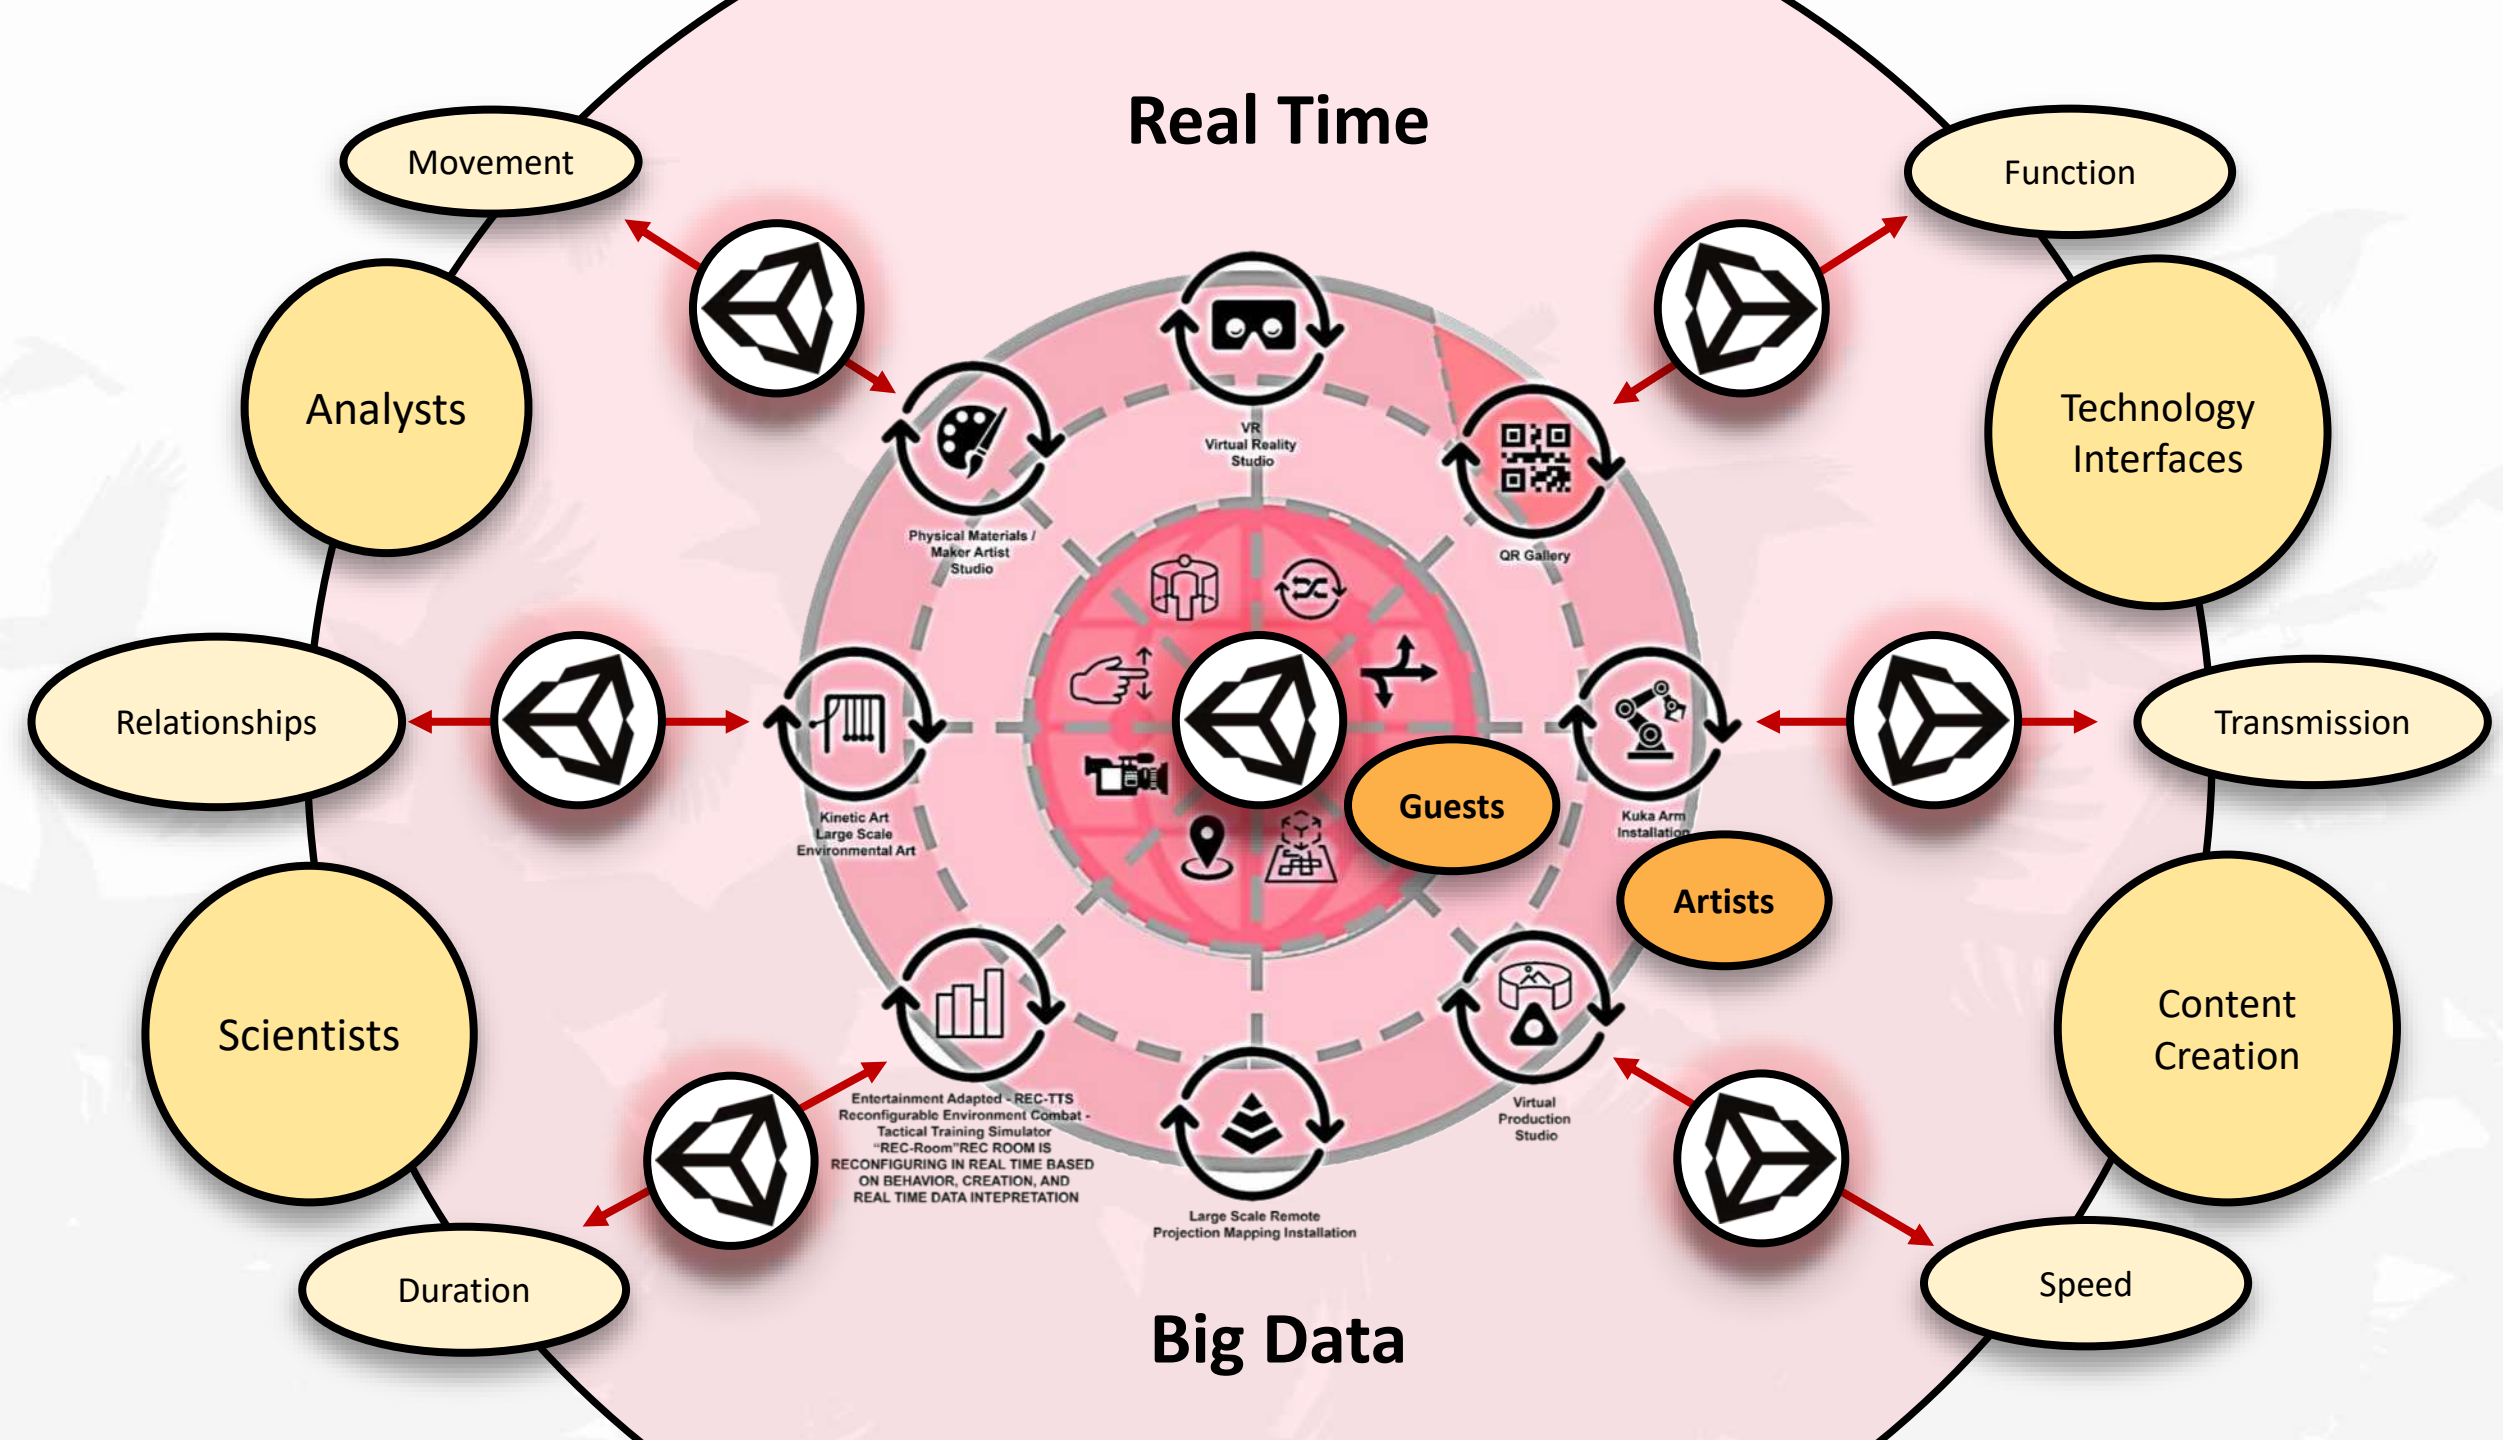

The game engine enables us to live in the moment – the act of intentional creation

How will the game engine power this intervention experience?

The game engine offers us the ability to collect data and support multi-branching relationships, actions, choices, and outcomes across visual, spatial, and digital planes, transcending location, yet respecting physics, to join people from all over the planet in a single shared experience real time the now.

This technology supports real time co-creation and a convergence of human interactions in a way and scale that has never previously existed.

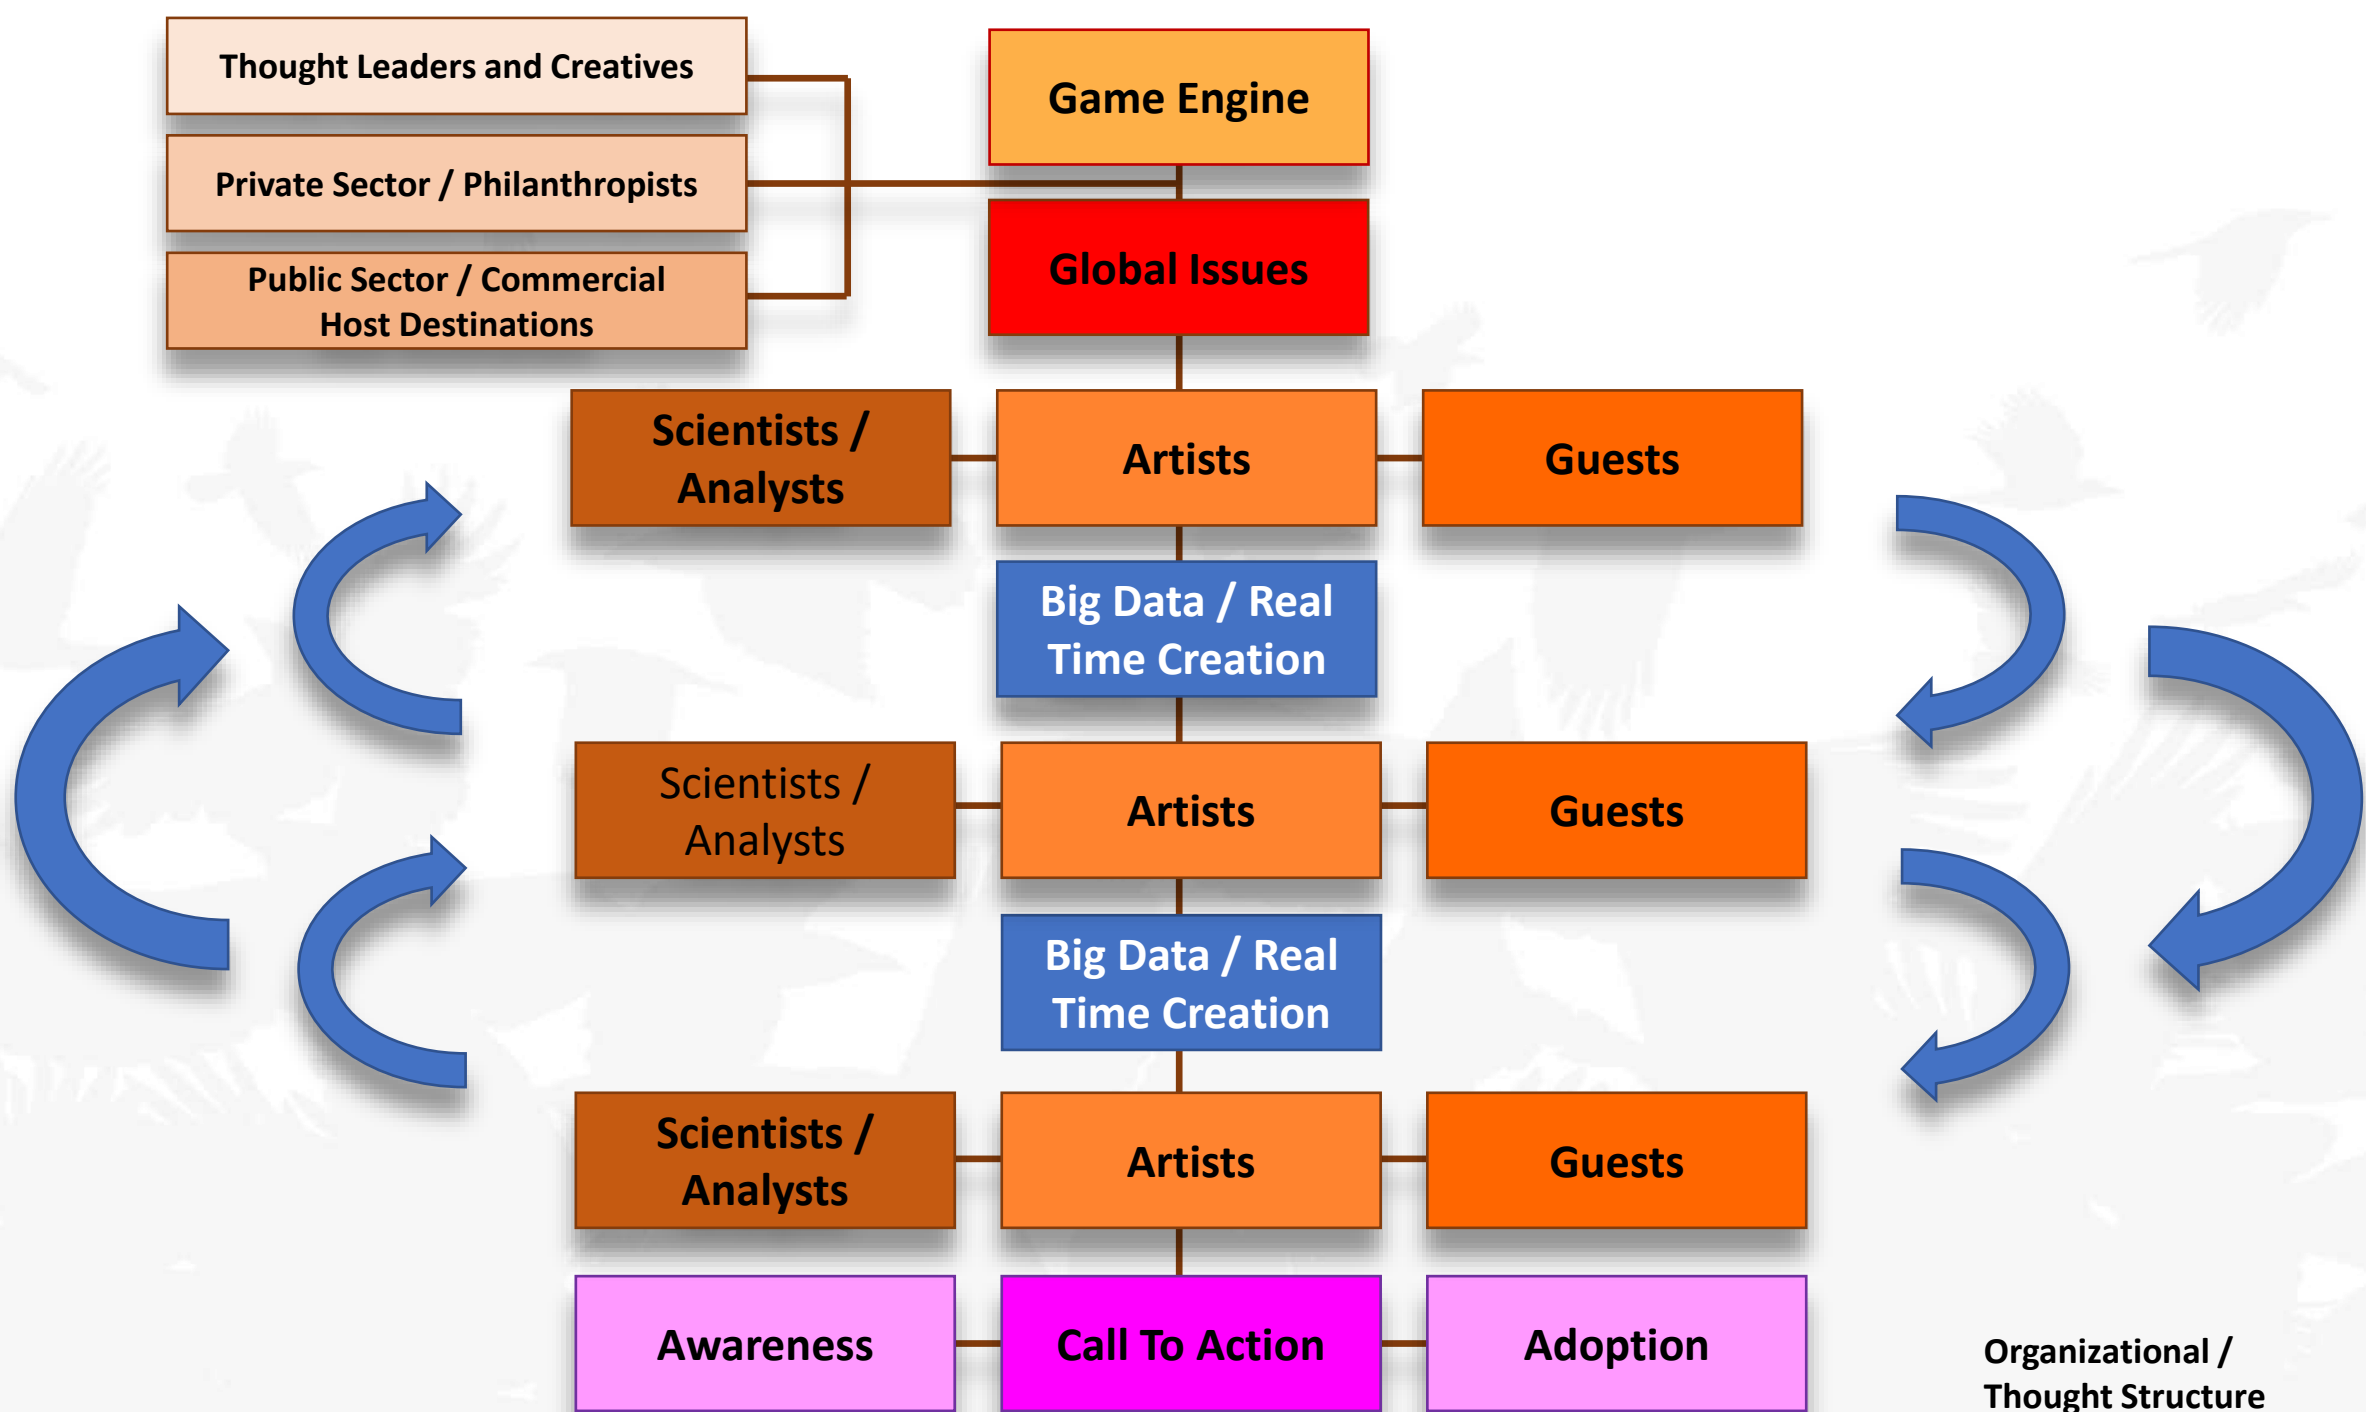

How will the artists, guests, scientists, analysts, and technology work together?

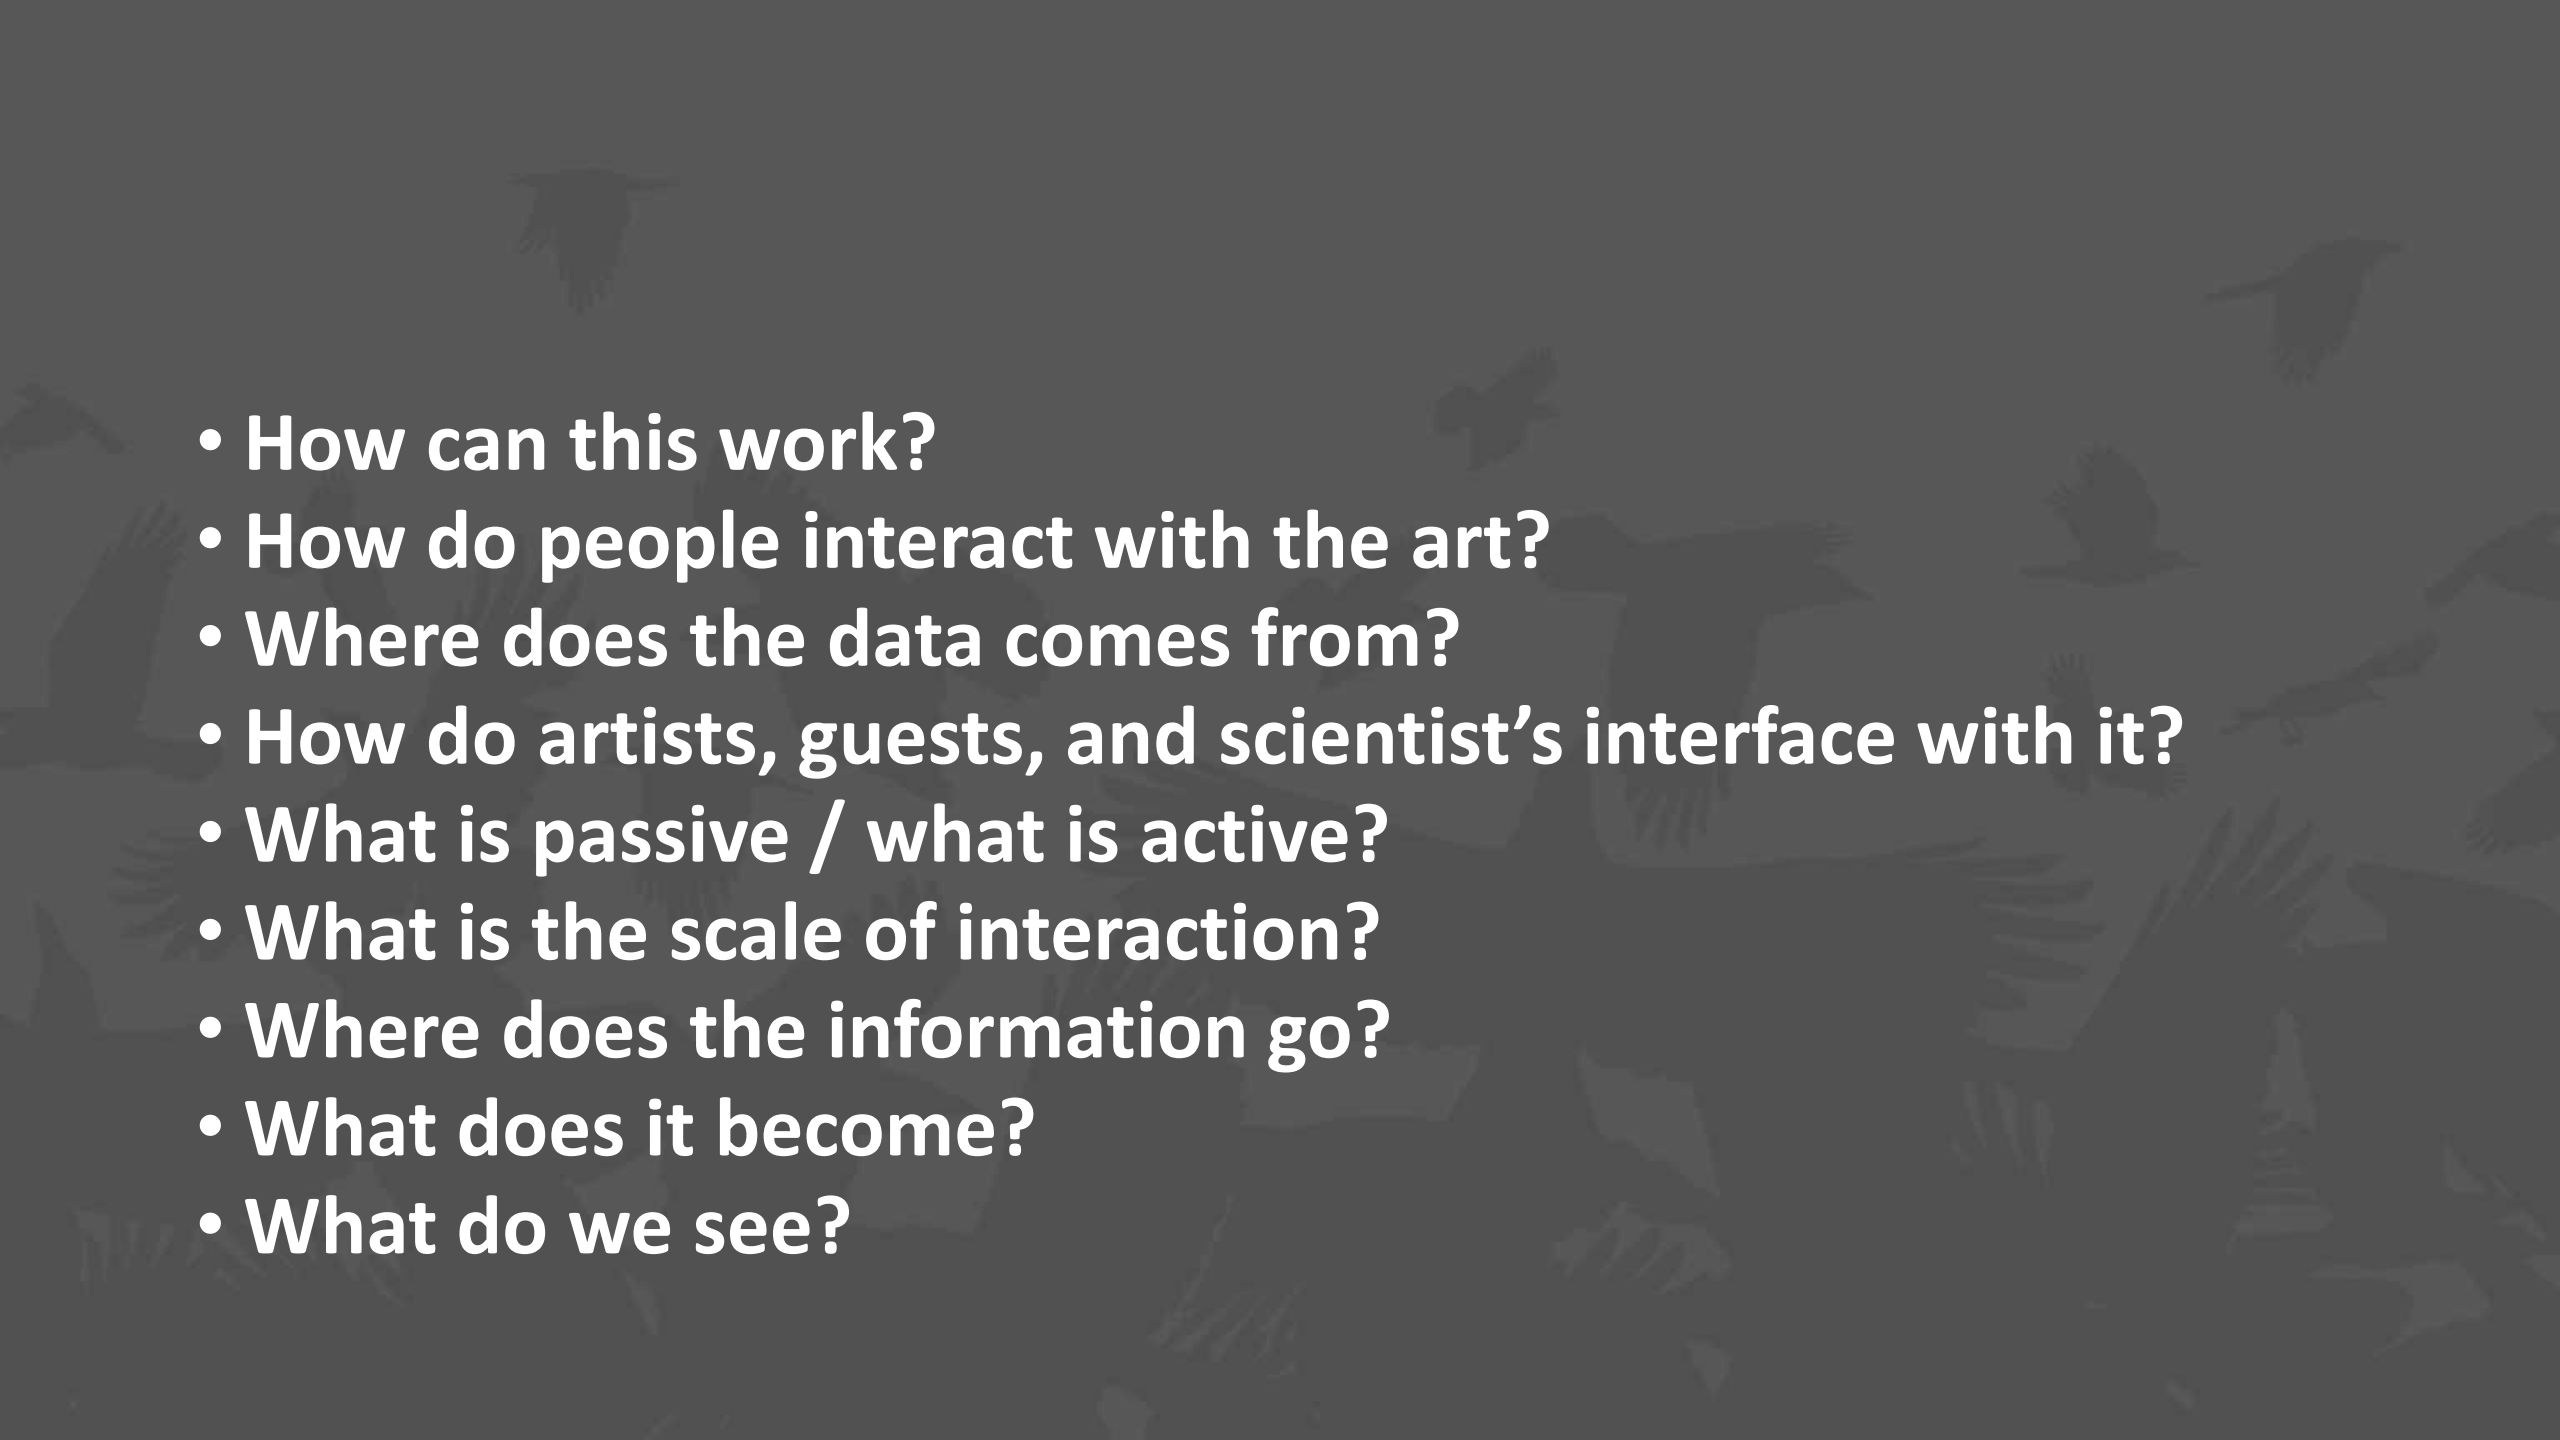

RAVEN**SUN**
CREATIVE

- 
- The background of the slide is a dark, monochromatic image featuring numerous birds in flight. The birds are depicted in various stages of wing movement, creating a sense of dynamic motion. They are scattered across the frame, with some appearing larger and more detailed than others, suggesting a vast flock. The overall tone is somber and artistic, providing a textured backdrop for the white text.
- How can this work?
 - How do people interact with the art?
 - Where does the data comes from?
 - How do artists, guests, and scientist's interface with it?
 - What is passive / what is active?
 - What is the scale of interaction?
 - Where does the information go?
 - What does it become?
 - What do we see?

Realization Scenario

1-1 or 1-2

Install 1 (or up to 5) Local Experience Interventions With Global Data Inputs

Physical / Local Interfaces*

Please note for the purpose of this discussion I have assumed artistic interface is local, it can indeed also be a remote function

Tour Locations

Hypothetical interface workflow examples

The scale of interaction is unlimited, ranging from intimate and personal interactions to epic large scale communal immersion.

Types of participation

- Active
- Passive
- Hybrid

Chapter 3:

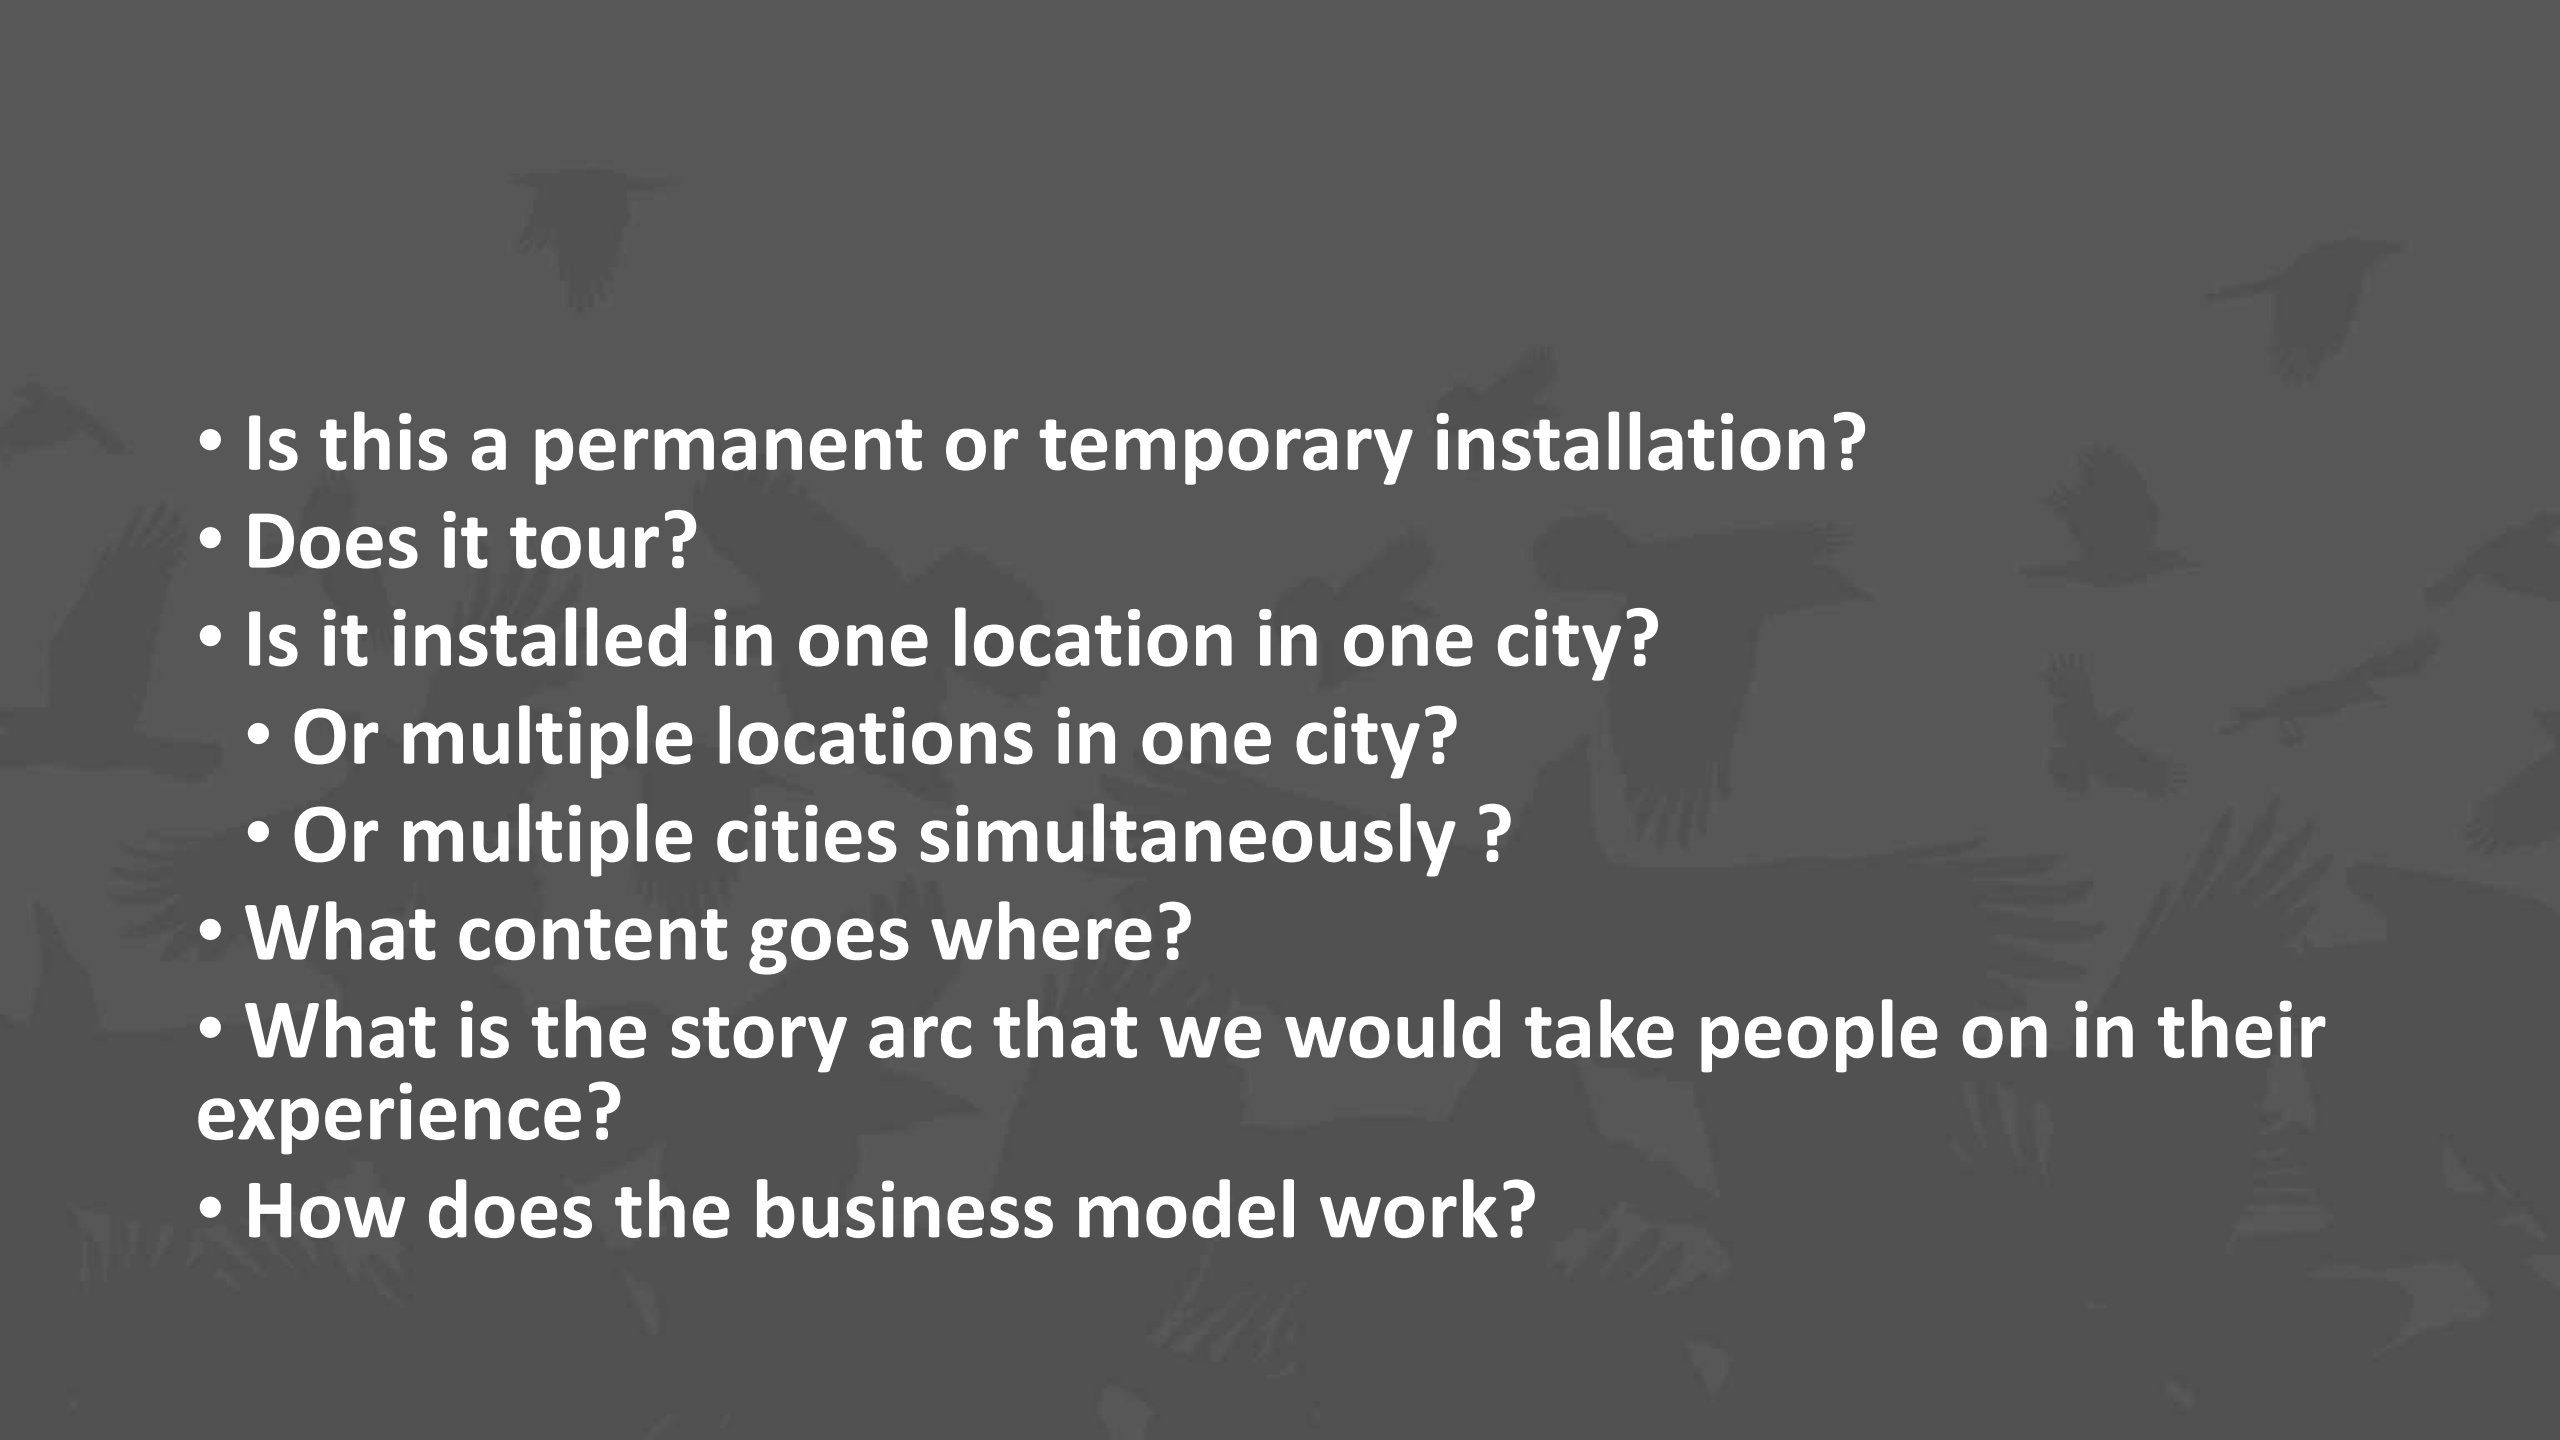

The Implementation

Yes It Can Be Done

Using our knowledge from previous global projects we deploy the best:

- Creative community
- Cutting-edge real time game engine technology
- Collaborative teamwork methods
- Multi-cultural international talent
- Data analysis
- Experiential design
- Military simulation
- Touring events
- Activations
- And proven business models

To create a successful and sustainable intervention.

- 
- The background of the slide is a dark, textured grey. It features a pattern of faint, light-grey silhouettes of birds in flight, scattered across the entire area. The birds are in various stages of flight, with wings spread, creating a sense of movement and depth.
- Is this a permanent or temporary installation?
 - Does it tour?
 - Is it installed in one location in one city?
 - Or multiple locations in one city?
 - Or multiple cities simultaneously ?
 - What content goes where?
 - What is the story arc that we would take people on in their experience?
 - How does the business model work?

Potential
Artist
Collaborators

Potential artist collaborators (beyond ourselves):

- Dale Chihuly
- Damien Hurst
- Steve Howe
- Ned Kahn
- Anselm Kiefer
- Andy Goldsworthy
- Santiago Calatrava
- Patrick Shearn (Poetic Kinetics)
- Janet Echelman
- Jason Bruges
- Star Kempf*
- Jean Tinguely*

*Deceased

- 
- **Potential artist collaborators:**
 - Each artist listed understands:
 - Group dynamics when creating work
 - Each guides / curates their work, as opposed to creating it themselves* (*Steve Howe and Star Kempf* execute(d) the work at scale themselves)
 - Scale
 - High volume human interaction in a large-scale exhibit space
 - The influence of time, space, light, position, environment, kinetic energy
 - The technical challenges of their chosen medium
 - None exhibit strong interactions with technology as part of the final dialog of their expression
 - Each is a passive artist. None currently exhibit a real time interaction with their audience that influences their piece and takes it beyond the context with which they created the piece

Anthony Howe

Patrick Shearn

Starr Kempf

Janet Echelmann

Stufish Entertainment Architects

Jean Tinguely

Example of Potential
Sponsors

A row of lit candles is shown against a dark background. The candles are lit, and their flames are visible. The background is blurred, showing more candles and light. The text is overlaid on the right side of the image.

Potential sponsors, partners, philanthropists, and / or event hosts need to be innovators and thought leaders that understand the relationship between:

- Creativity
- Inspiration
- Activation
- Behavior
- Engineering
- Marketing
- Financial models
- Spectacle
- High volume / high visibility events
- Environmental / social / global responsibility

- Richard Branson
- Elon Musk
- Bill and Melinda Gates
- Santiago Calatrava
- Frank Gehry
- Sheikh Mohammed bin Rashid Al Maktoum
- Khalifa bin Zayed bin Sultan Al Nahyan
- Oprah Winfrey
- Jeff Bezos
- Mackenzie Bezos
- Venice Biennale
- Art Basel
- Saatchi Art (investment fund)
- Anthea (Contemporary Art Investment Fund SICAV FIS)

The Implementation Model

Option 1

Commercial model approach

Phase 1

Individual static exhibits
Proof of Concepts for each exhibit

Phase 2

Individual small-scale locations,
each with varying business
model and variable data sets

Phase 3

Large scale exhibit with all
components present

Phase 4

International tour

Option 2

Commercial model approach

Phase 1

Attain Corporate Sponsorship

Individual static exhibits

Proof of Concepts for each exhibit

Phase 2

Large scale exhibit with all components present

Phase 3

International tour

Option 3

Grant / philanthropy model approach

Phase 1

Grant development

Phase 2

Individual static exhibits
Proof of Concepts for each
exhibit

Phase 3

Large scale exhibit with all
components present

Phase 4

Sponsorship / philanthropy

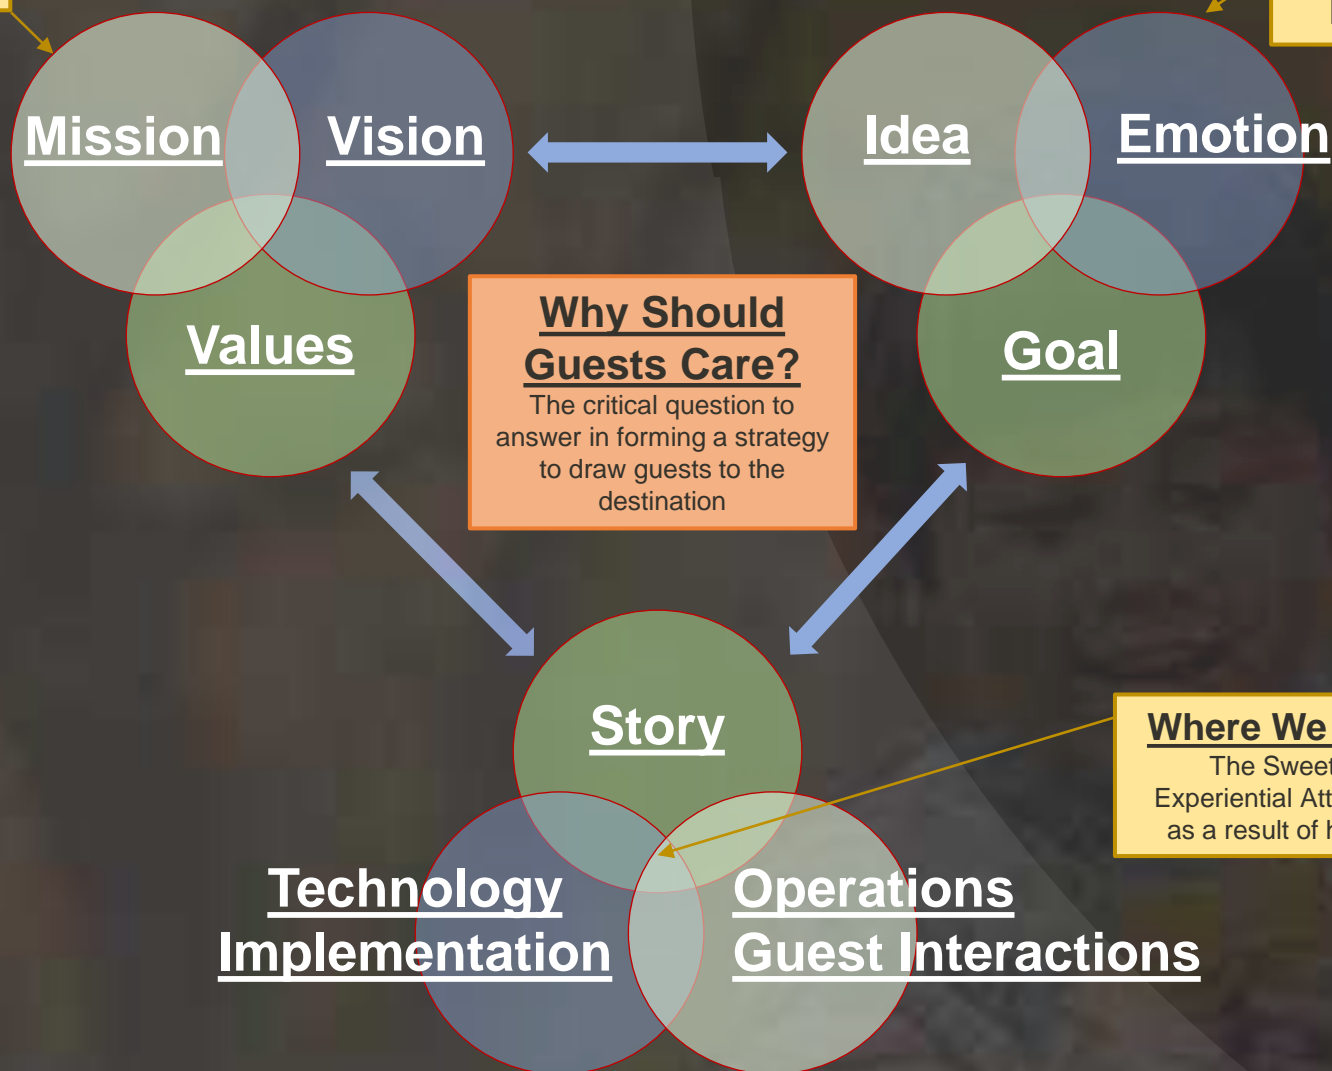

A close-up photograph of several hands of different skin tones stacked together in a circle, symbolizing teamwork and collaboration. The hands are positioned in the center of the frame, with fingers pointing towards the center. The background is slightly blurred, showing parts of people's clothing, including a striped shirt and a blue shirt. The overall lighting is soft and natural.

How would the
collaboration work?

Core Brand Attributes

Destinations succeed best when all of the brand attributes are understood and fully represented

How the Destination
Draws, Inspires, and Interacts
with the Guest to Ensure
Profitability for the Owner

What's
at
stake

We will have to explore
the balance between
altruism and commerce

What works in experiential entertainment

Story

Technology

Implementation

The Sweet Spot

Experiential
entertainment
succeeds
when properly
balanced solutions
are achieved

What Works in LBE

The Sweet Spot

Experiential
entertainment succeeds
when properly balanced
solutions are achieved

Creative

- Vision Keepers
- Emotional Connection
- Story and Narrative
- Visual Iconography
- Brand Promise
- Intellectual Property Realization
- Attraction Value Proposition

Technical

- Creative Problem Solvers
- Technology provides tools that enable the Creative to be told in a convincing, authentic, and innovative way
- Maintenance Planning
- Form Follows Function
- Ensures Guest Interaction is Intuitive, Digestible,
- Dependable

Operational

- Guest Interaction with the Brand Promise being realized
- Successful Ongoing Implementation of Creative and Technical Plans
- Successful Destination Operation
- Show Quality Assurance Programs
- Work with Technical and Creative teams to look ahead through the life cycle of the project and destination

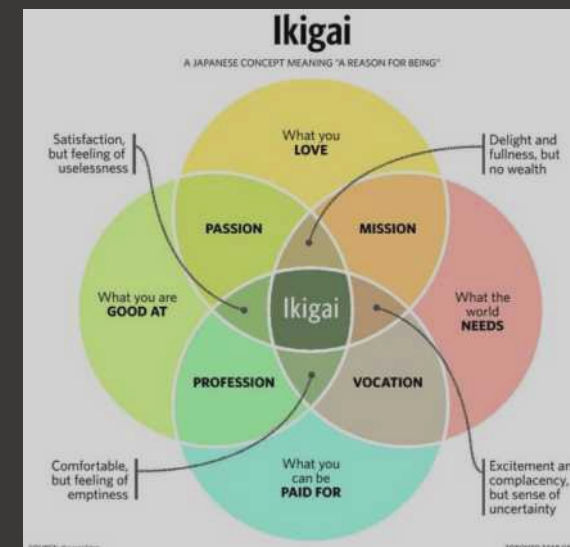

Each of us:

- is successful to some degree in our field of endeavors
- Has access to a different global market
- Has unique resources to bring to bear
- Has a different area of recognition
- Has skills that overlap and compliment
- Understand the language and mutual possibility of the other
- Can likely see and suggest possibilities and solutions that expand one another's ideas, thoughts, and capabilities, that were not immediately visible to our eyes alone

What can we achieve creatively as a collective?

Combining our collective spheres of knowledge, networks, and influence could enable new avenues of opportunity and impact beyond our individual efforts

We will need to assemble the right mix of People and Companies.

Collaboration can be challenging, requiring managing time, conflicts, control, and different agendas and interests.

We will need people who are passionate, open minded, and good communicators.

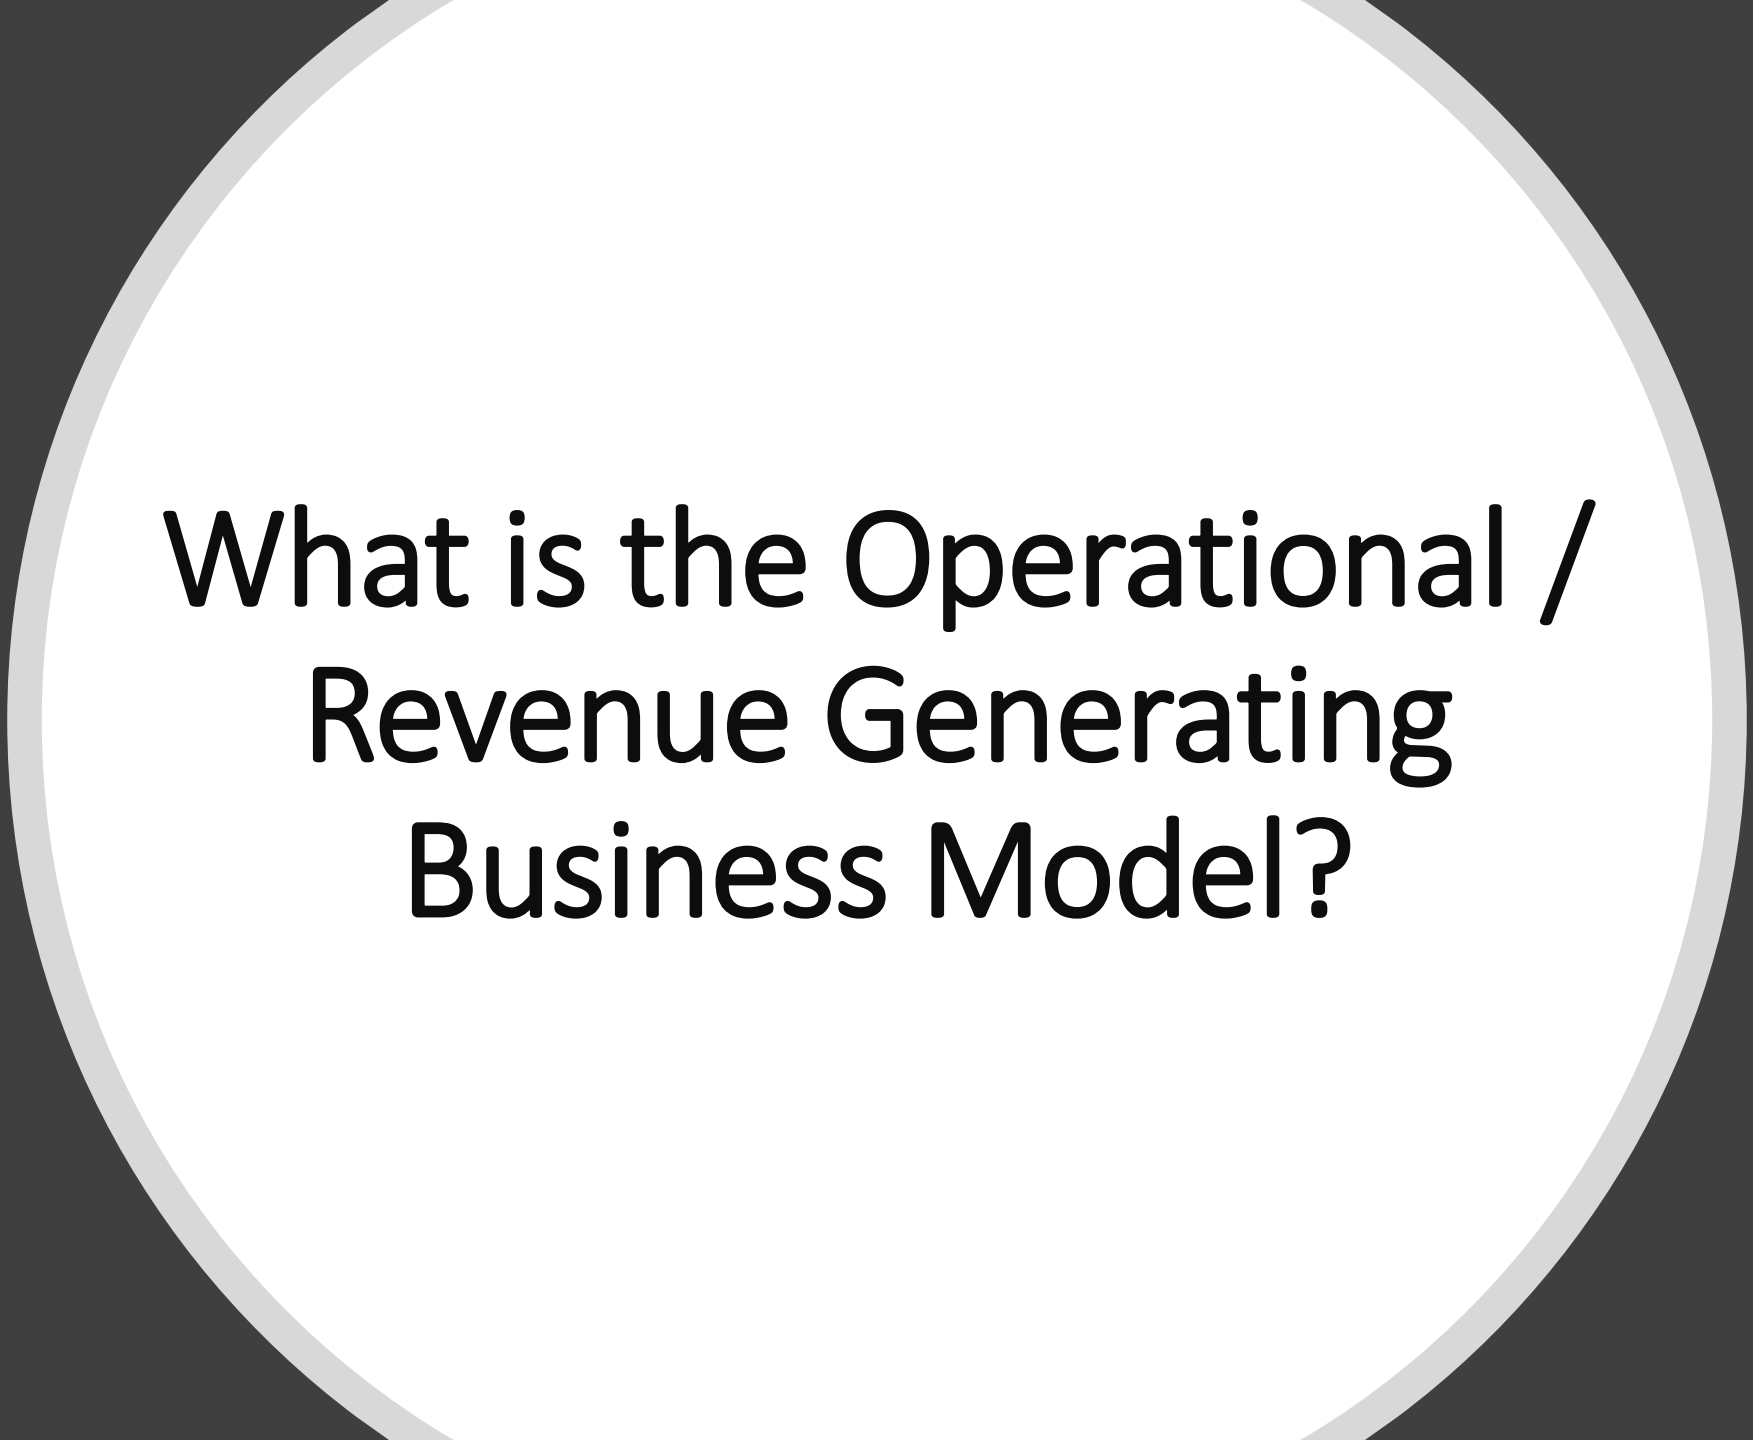

We will need to find the right corporate partners who share a common vision and set of values to achieve success.

Concepts developed by teams with representatives from four or more functional groups outperformed those developed by teams with representatives from just one functional group by 7 percentage points.

What is the Operational /
Revenue Generating
Business Model?

CASH FLOWS TO LICENSOR

Total cash flows to the licensor (Gottlieb) over a ten-year period are over \$106 million for a global park and over \$87 million if developed in Asia.

Per Capita Flow (Theme Park - Global) - Total Licensing Fee = 0%

A photograph of a dark, arched tunnel. The floor is made of stone tiles and is covered with some debris. A bright light is visible at the far end of the tunnel, creating a strong glow and illuminating the path ahead. The walls of the tunnel are dark and textured.

The journey of a thousand miles
begins with the first step
-Lao Tzu

A photograph of a person standing in front of a large, ancient rock temple carved into a cliff face. The temple features multiple levels with columns and a pediment. The scene is dimly lit, with the temple's facade being the primary light source. The text "Thank you for your consideration" is overlaid in white, with a vertical line to its left.

Thank you for
your consideration
