

Documentation

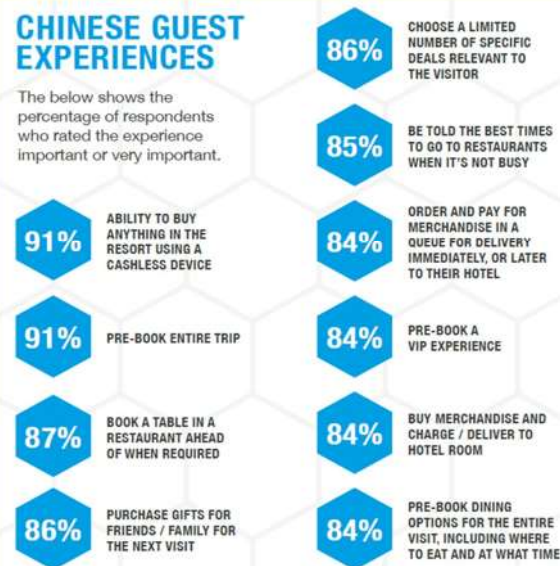

The time for partial and limited solutions is over

100% wants this when they plan and visit a theme park:

91% of Japanese and Malaysian theme park and resort visitors want to bypass queues by using a cell phone app to purchase a fast-track pass with specific timeslots

CHINESE GUEST EXPERIENCES

The below shows the percentage of respondents who rated the experience important or very important.

China, Japan and Malaysia may be in the lead of Digital living but the rest of the world is also learning it fast. (89% in US and UK want to Pre-Book entire trip)

88% want to pre-book their fast-track ride passes specific timeslots

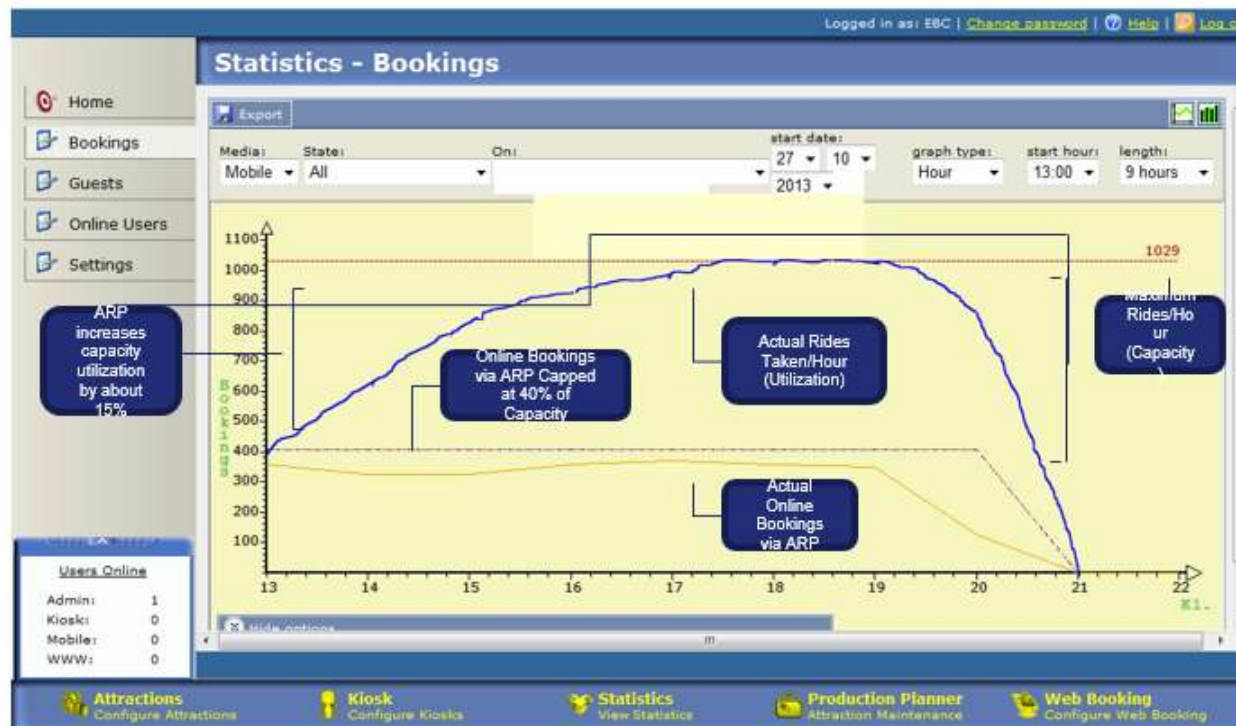

(Omnicore Theme Park Barometer, 2011)

Documentation

Operation management benefits: Pulls up the capacity utilization curve and flattens it by booking rides evenly across all available times

Put in your own number in the yellow cells and make your own calculations.

Guest calculator in relation to number of rides per day per guest									Guest calculator in relation to number of guest cap	
	Total guest cap per hour	Total ride cap per hour	Hours of operation	Total ride cap per day	# rides guest per day	# rides guest per day	# rides guest per day:	# rides guest per day:	Total guest per day	Total guest per day
	25000	62000	10	620000	5	6	7	1	25%	50%
Total guests day					124000	103333	88571	620000	62500	125000
New total incl. non riders %: 10					137778	114815	98413	688889	62500	125000
New total incl. non riders %: 20					155000	129167	110714	775000	62500	125000
Assumptions: All guests prebook and plan the visit, in advance or at the latest at arrival. They get an itinerary with the rides/activities they have booked. The guests can decide everything, except in what order to ride. Thereby the system can calculate the optimal route for all guests and ensuring all rides run at full capacity during all operating hours. If a total queue free set up not is practical, adjust to 50/50 or any other combination.										

Result : Guests biggest pain point is removed- queues- and ride capacity is increased with 20%. What perhaps is as important, is, that the way Th
